Oracle

Exam Questions 1Z0-435

Oracle Business Process Management Suite 12c Essentials

About Exambible

Your Partner of IT Exam

Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

    All examinations will be up to date.

* 24/7 Quality Support

    We will provide service round the clock.

* 100% Pass Rate

    Our guarantee that you will pass the exam.

* Unique Gurantee

    If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1
When automatically generating an ADF form from a human task, the difference between using the "Auto- Generate Task Form" and the "Launch Task Form Wizard" is that the .

A. "Launch Task Form Wizard" option launches a six-step "BPM Custom Form Wizard" and the "Auto- Generate" option creates the ADF project, task flow, and ADF form with one key click
B. "Launch Task Form Wizard" option does not create a new ADF project every time it is run
C. "Auto-Generate" option gives you the choice to use an existing ADF page template as the form is being created.
D. "Launch Task Form Wizard" option automatically creates an ADF page template and task flow template

Answer: D

NEW QUESTION 2
Which pattern is best handled by using Adaptive Case Management?

A. straight-through processing requiring no manual intervention
B. deterministic, human-centric processes
C. knowledge-based work requiring collaboration
D. application integration processes

Answer: C

NEW QUESTION 3
A task is considered overdue when .

A. there are no more renewals
B. the current date is beyond the due date
C. the current date is beyond the expiration date
D. the current date is beyond both the expiration date and the due date

Answer: B

Explanation:
A task is considered overdue after it is past the specified due date. This date is in addition to the expiration policy. A due date can be specified irrespective of whether an expiration policy has been specified. The due date enables Oracle BPM Worklist to display a due date, list overdue tasks, highlight overdue tasks in the inbox, and so on.
Reference: https://lomonzhang.wordpress.com/2010/07/28/the-difference-of-%E2%80%98due-date%E2% 80%99-and-%E2%80%98expiration-date%E2%80%99in-oracle-human-tasks/

NEW QUESTION 4
Which two statements are true about business architecture modeling in BPM Suite? (Choose two.)

A. It fosters a top-down approach that allows for discovery of an organization's processes.
B. It is required before BPMN modeling can begin for a specific process.
C. It is supported by enterprise maps, value chain models, and strategy models created in BPM Studio.
D. It allows you to define high-level processes that span an entire organization.
E. It uses familiar BPMN notation to graphically describe high-level process areas.

Answer: AD

Explanation:
Business Architecture is a methodology for performing high-level analysis of the business processes within your organization. These processes can be high-level processes that span an entire organization or specific, low-level processes performed within a specific group.
Business Architecture uses a top-down approach that allows for discovery of your organization's processes. You can define and evaluate high-level goals and map them to specific strategies for achieving them. You can also run reports on Business Architecture components to evaluate performance.
Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU880

NEW QUESTION 5
In which two tools can you explore the path taken by a running process instance? (Choose two.)

A. Enterprise Manager
B. Process Composer
C. Weblogic Console
D. Business Process Workspace

Answer: AD

NEW QUESTION 6
What determines the life span of the value in a subprocess data object?

A. process
B. task
C. subprocess
D. project

Answer:

D

NEW QUESTION 7
Which two statements are true about using Process Player to test a process? (Choose two.)

A. All activities must be implemented for a process before you can run it with Process Player.
B. When you are running a process by using Process Player and it reaches a user task that has an associated form, you must display the form to select the task outcome.
C. As a process runs in Process Player, the BPMN diagram is animated to show the flow through the model.
D. Before running Process Player, you must map all roles in your process to at least one user or group in your organization.

Answer: BD

NEW QUESTION 8
Which statement is true for a BPMN subprocesses?

A. It has access to the data variables of the main process.
B. Data have to be explicitly passed back and forth between the main process and the subprocess.
C. The subprocess can be reused and called from other processes.
D. The sequence flow inside a subprocess can be diverted and joined to the main flow without going through an end event.

Answer: C

NEW QUESTION 9
To establish the integration between BPM Suite and BAM 12c, you need to .

A. do nothing as they are integrated out-of-the-box
B. set the DisableProcessMetricsMBean setting to false on the SOA server
C. set the DisableProcessMetricsMBean setting to false on the BAM server
D. set the DisableMonitorExpressMBean setting to false on the SOA server

Answer: B

NEW QUESTION 10
Which two components in a BPM project can be promoted to become a case activity? (Choose two.)

A. Mediator
B. BPEL
C. Human task
D. Business rule
E. BPMN
F. Spring

Answer: CE

Explanation:
 A case definition contains various case activities that represent the different work that the user can perform in the context of a case. Oracle BPM allows you to define case activities based on:
▪a Human Task
▪a BPMN process
Reference: http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87410

NEW QUESTION 10
By default, which two tasks participant roles can change the outcome of a task? (Choose two.)

A. Admin
B. Approvers
C. Assignees
D. Creator
E. Owner
F. Reviewer

Answer: CE

Explanation:
 The task owner can change both the outcome of the task and the assignments.
The assignee can raise questions about the work, by adding comments into the task to communicate to the owner or followers about their progress. For example, if an assignee cannot complete the task, they can either change the assignee back to the owner, or add a comment into the task while changing the task status to "need assistance".

NEW QUESTION 11
Which statement is accurate about verbal rules and business phrases?

A. Verbal ruled can be created in Business Process Composer, but not in BPM Studio.
B. For a particular verbal rule, conditions and actions can include derived business phrases or user- defined business phrases, but not both.
C. Derived business phrases are automatically created by using facts and globals in the rules dictionary.
D. Verbal rules must be created in a separate ruleset from general rules and decision tables.

Answer: BC

NEW QUESTION 14
Which two statements accurately explain how the Call activity behaves in a BPMN model? (Choose two.)

A. When using a Call activity to invoke a reusable process, the data object values of the calling process are automatically made available to the called process.
B. The Call activity can invoke a reusable process from within the current process
C. If the process is to be invoked by a Call activity, the called process must start with one None Start Event.
D. At a Call activity, the calling process does not wait until the called process or subprocess returns.

Answer: BC

Explanation:
The call activity allows you to call a reusable process from within the current process.
Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app_bpmn_ref_bpmcu.htm#BPMCU87375

NEW QUESTION 16
Which human task pattern is best suited for a single approver scenario where the role is resolved through group membership? (Choose two.)

A. User
B. Group
C. Initiator
D. FYI
E. Management

Answer: A

Explanation:
Single Approver: Use this option for a single user to act on a task. If the task is assigned to a role or group with multiple users, then one member must claim the task and act on it.
Reference: http://docs.oracle.com/cd/E28280_01/user.1111/e15175/bpmug_ws_perform_tasks.htm

NEW QUESTION 21
Value chain models allow you to specify more details about a process area that may have been identified in an enterprise map. Which two statements are true about how the details are specified in a value chain model? (Choose two.)

A. A value chain model is the starting point for process decomposition in business architecture modeling.
B. A step can be broken down into a separate value chain model to create a hierarchical group of value chain models.
C. It documents goals, objectives, and strategies for a business area.
D. A step can be linked to a BPMN process model.
E. There is typically just one value chain model for an entire organization.

Answer: B

Explanation:
Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU99994 (4.1.2)

NEW QUESTION 22
To assign a global unique identifier (GUID) to a variable, you use a(n) .

A. simple expression
B. XPath expression
C. XSLT transformation
D. call to a JavaScriot function

Answer: B

NEW QUESTION 25
Which two statements accurately identify capabilities available for rules testing? (Choose two.)

A. You can create a test suite or a test template without first creating a design function.
B. You can test rulesets by creating a business rules function that calls the decision function.
C. You can use Enterprise Manager to test rules via a decision function.
D. You can mark individual test suites as "draft" to turn them off for test validation.

Answer: BD

Explanation:
You can test rulesets by creating a decision function and calling the decision function from Rules Designer with an Oracle Business Rules function.
Draft Test check box to turn off the test validation.
Reference: http://docs.oracle.com/middleware/1213/bpm/rules-user/testing.htm#ASRUG982

NEW QUESTION 27
Which option is constraint on promoting a BPMN process to be a case activity?

A. The BPMN process has to be modeled as an asynchronous process.

B. The BPMN process cannot contain human tasks.
C. The BPMN process must be in the same project as the case.
D. The BPMN process requires that the reply from the process contains at least one parameter.

Answer: A

Explanation:
 The BPMN process must already exist. You can use synchronous and asynchronous BPMN processes. The case activity only supports message start and end points
Reference: http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87432

NEW QUESTION 30
Which action enables support for virtualization through libOVD?

A. Update the order of the WebLogic authentication providers to put the LDAP providers first.
B. Use Enterprise Manager or WLST to add the virtualize=true property to the SOA Common Properties MBean.
C. Use Enterprise Manager or WLST to add the virtualize=true property to the domain level Identity Store Configuration.
D. Update the domain directory to include a valid libOVD adapter configuration file under the config/ fmwconfig folder.

Answer: C

NEW QUESTION 32
Which two can be added as members of a static approval group? (Choose two.)

A. Users
B. Groups
C. Application roles
D. other approval groups
E. WebLogic administrators

Answer: AD

Explanation:
 Members of a static approval group can be either users or other approval groups.
Reference: http://docs.tpu.ru/docs/oracle/en/fmw/11.1.1.6.0/user.1111/e15175/bpmug_ws_admin.htm

NEW QUESTION 34
Which two statements are correct about business indicators? (Choose two.)

A. They can be captured at measurement marks.
B. Dimensions allow the user to capture numerical values.
C. All business indicators are captured at sampling points and a subset is captured at measurement marks.
D. Counters are used for interval start and interval stop measurements.

Answer: AC

Explanation:
 A Measure Business Indicator is used to capture something that can be measured.
The BPMN Service Engine automatically stores the data in the dimension business indicators in the pre- defined and custom sampling points defined for your process.

NEW QUESTION 39
Which two statements are true about configuring service tasks? (Choose two.)

A. A service task can be configured to invoke a process or service asynchronously.
B. Although you call a file adapter as a service from your BPMN diagram, no linkage between your BPMN process and the external reference appears in the SOA Composite Editor.
C. You can invoke a BPEL process by using a service task.
D. The implementation of a service task can be either a process call or a service call.

Answer: BC

NEW QUESTION 42
Which two statements are true about BPM Suite product architecture? (Choose two.)

A. The Process Asset Manager is a container of reusable, shared, implementation assets available to all processes within a BPM project.
B. Business architecture modeling is supported by a third-party product that Oracle resells as part of the BPM Suite 12c product family.
C. BPM Suite leverages SOA Suite infrastructure and tooling to support key design-time and run-time features.
D. case Management is an Oracle add-on product to add adaptive case management support to BPM Suite.
E. BPM Suite supports BPMN process modeling notation in both BPM Process Composer and BPM Studio.

Answer: AD

NEW QUESTION 45
Which two statements are accurate about how ADF Business Components can be used in a task flow for a human task? (Choose two.)

A. They can create and insert a new row in a database table.
B. They can invoke wildcard control flow rules in the task flow.
C. They can initialize the information displayed on a form when given an ID from the process payload.
D. They can declaratively map database information back into the process payload.
E. They can invoke task flow call activities.

Answer: BE

NEW QUESTION 49
Which statement is true about BPM Suite's round trip simu-lation feature?

A. Round trip simulation is a feature of a Process Player.
B. Basing a simulation on actual process runtime data can help you find bottlenecks in a process model.
C. Unit test suites can be automatically generated based upon round trip simulation data.
D. During round trip simulation generation, process bottlenecks are identified and highlighted on the model.

Answer: B

NEW QUESTION 51
You are analyzing the different methods available to manage the life cycle of the OWSM policies
in your SOA/BPM environment. Identify two statements that correctly describe OWSM policy attachments. (Choose two.)

A. Although you can boss attach and detachsecurity policies in JDeveloper, you can detach themonly in Enterprise Manager.
B. An application developer typically uses JDeveloper to create new security policies rather thanselect them from a prebuilt list.
C. When you use JDeveloper to associate a security policy with a web service, the policy is notreally attached until application development.
D. OWSM policies can be attached and detached with WLST.

Answer: CD

NEW QUESTION 54
Which two statements are true about the defined Oracle JMS Adapter outbound connection?

A. It supports connections to JMS distributed queues.
B. It uses default credentials when connecting to the remote JMS provider.
C. It supports zero message loss via distributed transactions.
D. It requires the JMS consumer to explicitly commit transactions.

Answer: AB

Explanation:
 Reference: http://docs.oracle.com/cd/E23943_01/web.1111/e15493/prog_details.htm

NEW QUESTION 57
Which statement is true about the skip condition in a BPEL activity?

A. The activity gets executed hen the skip condition expression evaluates toTrue.
B. The skip condition expression is evaluated before the activity instance is created.
C. The activity gets executed when the skip condition expression evaluates toFalse.
D. The activity gets executed when the skip condition expression throws a fault.

Answer: C

Explanation:
 Reference: https://docs.oracle.com/cd/E14571_01/dev.1111/e10224/bp_conditn.htm

NEW QUESTION 59
Which two are objectives that you can achieve by using business rules to direct human workflow?

A. Load balance tasks among users based upon server utilization.
B. Redirect the process flow as specified in the PBMN model.
C. Escalate and reassign a task to the manager of the current assignee.
D. Skip all subsequent routing and mark a task as complete.

Answer: BC

Explanation:

Reference: http://www.oracle.com/ocom/groups/public/@otn/documents/webcontent/172298.pdf

NEW QUESTION 61
You pass some data from a process variable as a parameter into a human task. At a later time, the variable is then updated in a parallel stream of execution in the
BPEL process while the human task is still executing before it is actioned by the assignee.
What does the assignee see after opening the task in the workspace and looking at the parameter?

A. The parameter contains the values of the process variable as it was when the task was created.
B. The parameter contains the values of the process variable as it is at the current time (that is, when the user opened the human task in the workspace).

C. The parameter is empty and the task must be restarted to pick up the new values of the process variable.
D. It is not possible to determine what the assignee sees from the information provided.

Answer: C

NEW QUESTION 66
......

C. The parameter is empty and the task must be restarted to pick up the new values of the process variable.
D. It is not possible to determine what the assignee sees from the information provided.

Answer: C
