

Microsoft

Exam Questions AZ-600

Configuring and Operating a Hybrid Cloud with Microsoft Azure Stack Hub

NEW QUESTION 1

- (Exam Topic 1)

You need to identify the certificate for the integrated system in Chicago. The solution must meet the technical requirements.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Certificate issuer:

	▼
Enterprise CA	
Public CA	
Self-signed	

Certificate subject name:

	▼
adminmanagement.northcentralus.litwareinc.com	
adminportal.northcentralus.litwareinc.com	
management.northcentralus.litwareinc.com	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

When deploying Azure Stack Hub in disconnected mode it is recommended to use certificates issued by an enterprise certificate authority. This is important because clients accessing Azure Stack Hub endpoints must be able to contact the certificate revocation list (CRL).

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-pki-certs?view=azs-2008>

NEW QUESTION 2

- (Exam Topic 1)

You need to identify the procedure for creating the subscriptions on the integrated system in Chicago. The solution must meet the technical requirements.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Configure an offer that has a state of:

	▼
Decommissioned	
Private	
Public	

Create the subscriptions by using https://:

	▼
adfs	
adminportal	
portal	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-subscribe-plan-provision-vm?view=azs-2008> <https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-create-offer?view=azs-2008>

NEW QUESTION 3

- (Exam Topic 1)

You need to implement the management app. The solution must meet the technical requirements. What should you use?

- A. a PowerShell session to litwareinc.com
- B. a browser session to litwareinc.com
- C. a PowerShell remoting session to the PEP
- D. a browser session to the administrator portal

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-manage-portals?view=azs-2008>

NEW QUESTION 4

- (Exam Topic 2)

You need to recommend a business continuity and disaster recovery plan for the dev1 and dev2 regions that meets the technical requirements.

Which two recommendations should you make? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Implement the Infrastructure Backup Service
- B. Use an Azure Marketplace backup tool in each region to protect the virtual machines that run in the other region
- C. Implement Azure Site Recovery
- D. Use Infrastructure as Code (IaC) by using Azure Resource Manager templates

Answer: BD

NEW QUESTION 5

- (Exam Topic 2)

You remove all the workloads from the int1 region and change the registration model to capacity.

You prepare additional Azure AD tenants for each partner. You need to configure multitenancy.

Which two actions should you perform for each guest tenant? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Run the Register-AzSWWithMyDirectoryTenant cmdlet and specify <https://management.int1.northwind.com> as the endpoint.
- B. Run the Register-AzSGuestDirectoryTenant cmdlet and specify <https://management.int1.northwind.com> as the endpoint.
- C. Run the Register-AzSGuestDirectoryTenant cmdlet and specify [https:// adminmanagement.int1.northwind.com](https://adminmanagement.int1.northwind.com) as the endpoint.
- D. Change the registration model to pay-as-you-use.
- E. Run the Register-AzSWWithMyDirectoryTenant cmdlet and specify [https:// adminmanagement.int1.northwind.com](https://adminmanagement.int1.northwind.com) as the endpoint.

Answer: AC

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-enable-multitenancy?view=azs-2008>

NEW QUESTION 6

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that uses an Active Directory Federation Services (AD FS) identity provider and capacity-based billing.

You have a plan named Plan1 that has the following quota configurations for Microsoft.Compute:

- Maximum number of Availability Sets: 10
- Maximum number of virtual machines: 50
- Maximum number of virtual machine cores: 100
- Maximum number of virtual machine scale sets: 10

You link two offers named Offer1 and Offer2 to Plan1.

Two user subscriptions named Customer1 and Customer2 are created based on Offer1. A user subscription named Customer3 is created based on Offer2.

Customer1 receives a warning that it provisioned 50 virtual machines.

You need to ensure that Customer1 can provision an additional 25 virtual machines within its existing subscription. The solution must NOT affect the quotas of the other user subscriptions.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add NewPlan as an add-on to Offer1
- B. Create a new plan named NewPlan that has the maximum number of virtual machines quota set to 75
- C. Add NewPlan to the Customer1 user subscription
- D. Create a new plan named NewPlan that has the maximum number of virtual machines quota set to 25
- E. Update the quota for Microsoft.Compute in Plan1 to have the maximum number of virtual machines set to 75
- F. Create a new offer named Offer3 based on Plan1 and create a new user subscription for Customer1 by using Offer3

Answer: AD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/service-plan-offer-subscription-overview?view=azs-2008>

<https://docs.microsoft.com/en-us/azure-stack/operator/create-add-on-plan?view=azs-2008>

NEW QUESTION 7

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that has 12 nodes. All the nodes run the latest firmware available from the OEM. The integrated system also has a hot spare node.

You receive an alert concerning the hardware on one of the nodes.

You need to replace the node as soon as possible. The solution must minimize disruptions to user workloads. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

From the user portal, run the Repair action.

Replace the node.

From a privileged endpoint (PEP) session, run the `Stop-AzureStack` cmdlet.

From the administrator portal, stop the node.

From the user portal, stop all the virtual machines that use unmanaged disks.

From the administrator portal, run the Repair action.

From the administrator portal, shut down the node.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-replace-node?view=azs-2008> <https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-node-actions?view=azs-2008&tabs=az1> d5

NEW QUESTION 8

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. You need to update the Azure Event Hubs service.

Solution: From a privileged endpoint (PEP) session, you run the `Install-AzsUpdate` cmdlet. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-update-monitor?view=azs-2008>

NEW QUESTION 9

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. You need to update the Azure Event Hubs service.

Solution: From an internet-connected computer, you run the `Update-AzureRmManagementGroup` cmdlet. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 10

- (Exam Topic 3)

You have an Azure Stack Hub integrated system.

You need to create a new offer that can be used only by an operator to provision user subscriptions. The solution must simplify the process for users to create resources.

Which type of offer should you create?

- A. public with a base plan only
- B. delegated with a base plan only
- C. private with a base plan only
- D. decommissioned

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-delegated-provider?view=azs-2008>

NEW QUESTION 10

- (Exam Topic 3)

You have an Azure Stack Hub integrated system.

You need to ensure that you can recover managed and unmanaged disks that are deleted from user subscriptions.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Modify the retention period for deleted storage accounts

Create a storage account that uses the Cool access tier

Open the configurations for the Storage resource provider

Connect to the administrator portal

Connect to the user portal

Connect to the privileged endpoint (PEP)

Open the configurations for the Compute resource provider

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-manage-storage-accounts?view=azs-2008>

NEW QUESTION 14

- (Exam Topic 3)

Your company is a Cloud Solution Provider (CSP).

You plan to create an Azure subscription for a new Azure Stack Hub integrated system and configure Azure Stack Hub to be available to multiple customers. Your company will also have its own workloads deployed to the Azure Stack Hub.

You need to perform the deployment so that usage data for future customers is directed to their Azure subscription.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a Pay-As-You-Go (PAYG) subscription.

Create an Azure Partner Shared Services (APSS) subscription.

Enable multitenant billing.

Associate the user subscriptions to a Digital Partner of Record (DPOR).

Register Azure Stack Hub.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A picture containing text Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-add-manage-billing-as-a-csp?view=azs-2008> <https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-csp-howto-register-tenants?view=azs-2008&t>

NEW QUESTION 18

- (Exam Topic 3)

You have an Azure Stack Hub integrated system that connects to the Internet. The integrated system uses an Azure Active Directory (Azure AD) identity provider. You need to update the Azure App Service resource provider.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Download the App Service installer to a computer that can connect to the Azure Stack Hub endpoints
- B. Run appservice.exe as a local administrator
- C. From the Updates blade of the administrator portal, select the Resource providers section
- D. From the Updates blade of the administrator portal, select the infrastructure section
- E. From the administrator portal, select the update, download the update, and then install the update

Answer: AB

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-app-service-update?view=azs-2008&pivots=s>

NEW QUESTION 22

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. The integrated system uses an Enterprise Agreement (EA) for licensing.

You are creating an Azure Resource Manager template to generate a marketplace item for a virtual machine that runs Windows Server 2019 Datacenter and a custom application.

You need to ensure that Windows Server is licensed by using the bring-your-own-license model. Solution: You add OsType: Windows to the Azure Resource Manager template.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 25

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. The integrated system uses an Enterprise Agreement (EA) for licensing.

You are creating an Azure Resource Manager template to generate a marketplace item for a virtual machine that runs Windows Server 2019 Datacenter and a custom application.

You need to ensure that Windows Server is licensed by using the bring-your-own-license model. Solution: You add licenseType: None to the Azure Resource Manager template.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-windows-server-faq?view=azs-2008&tabs=az>

NEW QUESTION 30

- (Exam Topic 3)

You have an Azure Stack Hub integrated system.

You need to delegate the management of offers to a user named User1.

Which three actions should you perform in a sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
From the administrator portal, create a subscription	
From the administrator portal, create a plan that contains a subscription service and an offer based on the plan	
From the administrator portal, create a plan and a delegated offer based on the plan	
From the user portal, create a subscription	
From the delegated provider user portal, sign up for the offer	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-delegated-provider?view=azs-2008>

NEW QUESTION 32

- (Exam Topic 3)
Which three components are required to configure an Azure Stack Hub infrastructure backup? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. an SMB file share in the trusted network perimeter
- B. credentials that have write access to storage
- C. an Azure Blob storage account
- D. an encryption certificate
- E. an SMB file share in Azure

Answer: ABD

Explanation:

Reference:
<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-backup-reference?view=azs-2008>

NEW QUESTION 34

- (Exam Topic 3)
You have an Azure Stack Hub integrated system that uses an Azure Active Directory (Azure AD) tenant named fabrikam.com as an identity provider. The integrated system region name is region1, and the external domain name is fabrikam.com.
The integrated system has the following domains enabled for multitenancy:
> fabrikam.onmicrosoft.com
> contoso.onmicrosoft.com
> fabrikam.com
> contoso.com
You need to disable multitenancy for contoso.com.
How should you complete the PowerShell script? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

-ResourceGroupName \$RGName

- visit - <https://www.certshared.com>

- D. Get-PfxCertificate
- E. New-AzsHubDeploymentCertificateSigningRequest

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-validate-pki-certs?view=azs-2008>

NEW QUESTION 43

- (Exam Topic 3)

You have an Azure Stack Hub integrated system. You perform infrastructure backups twice daily.

User workloads are protected by using Azure Site Recovery.

The architect of the user workloads is planning a business continuity disaster recovery (BCDR) strategy. You need to recommend to the architect which resources to include in the BCDR strategy.

Which two resources should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Azure Key Vault secrets
- B. plans, quotas, and offers
- C. role-based access control (RBAC) permissions and roles
- D. user subscriptions
- E. Azure Resource Manager templates for resources used by Azure Stack Hub virtual machines
- F. Azure Site Recovery workloads

Answer: EF

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/architecture/hybrid/azure-stack-vm-dr>

NEW QUESTION 45

- (Exam Topic 3)

In which three situations should you update the registration of an Azure Stack Hub integrated system? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. when you add or remove nodes for capacity-based billing
- B. when you change the billing model
- C. when you add or remove nodes for consumption-based billing
- D. when you renew an annual capacity subscription
- E. when you enable Azure Stack Hub for multitenancy
- F. when you update the Azure Active Directory (Azure AD) home directory

Answer: ABD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-registration?view=azs-2008&tabs=az1%2Caz2>

NEW QUESTION 46

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system that connects to the Internet. The integrated system uses an Enterprise Agreement (EA) for licensing.

You are creating an Azure Resource Manager template to generate a marketplace item for a virtual machine that runs Windows Server 2019 Datacenter and a custom application.

You need to ensure that Windows Server is licensed by using the bring-your-own-license model. Solution: You remove the licenseType section from the Azure Resource Manager template. Does this meet the goal?

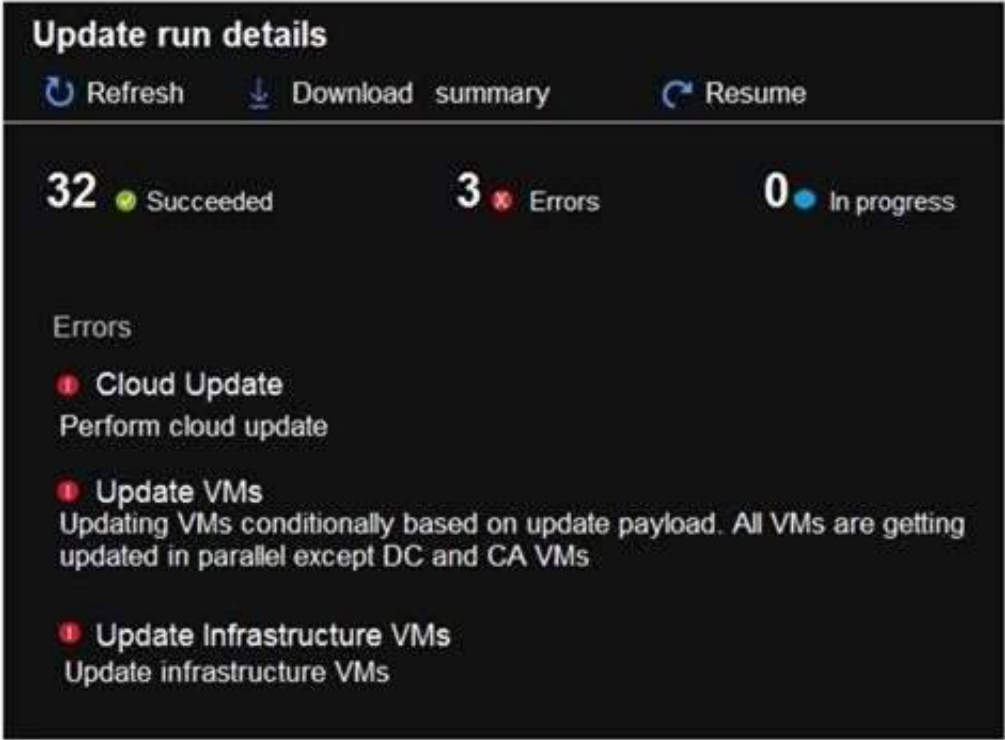

- A. Yes
- B. No

Answer: B

NEW QUESTION 49

- (Exam Topic 3)

You start the update of an Azure Stack Hub integrated system. The Update run details are shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

Currently, the update status is [answer choice].

running with three errors
succeeded with three errors
failed and the update will retry automatically
failed and the update will NOT retry automatically

In this situation, the Azure Stack Hub operator should [answer choice].

cancel the update
contact Microsoft Support
run the Repair-AzsScaleUnitNode cmdlet
run the Restart-AzsInfrastructureRole cmdlet
run the Stop-AzureStack and Start-AzureStack cmdlets

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-apply-updates?view=azs-2008>

NEW QUESTION 54

- (Exam Topic 3)
- You plan to deploy two Azure Stack Hub integrated systems named AZStack1 and AZStack2. AZStack1 must meet the following requirements:
- > Connect to the Internet.
 - > Have minimal capital expenditures.
 - > Use the minimum number of on-premises servers for identity.
 - > Have no existing licenses for Windows virtual machines deployed. AZStack2 must meet the following requirements:
 - > Be disconnected from the Internet.
 - > Use the minimum number of on-premises servers for identity.
 - > Support the syndication of Azure Stack Hub Marketplace items.

Which identity provider and licensing model should you use for each integrated system? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

AZStack1:

	▼
Capacity and Active Directory Federation Services (AD FS)	
Capacity and Azure Active Directory (Azure AD)	
Pay-as-you-use and Active Directory Federation Services (AD FS)	
Pay-as-you-use and Azure Active Directory (Azure AD)	

AZStack2:

	▼
Capacity and Active Directory Federation Services (AD FS)	
Capacity and Azure Active Directory (Azure AD)	
Pay-as-you-use and Active Directory Federation Services (AD FS)	
Pay-as-you-use and Azure Active Directory (Azure AD)	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-connected-deployment?view=azs-2008>

NEW QUESTION 55

- (Exam Topic 3)

You have an Azure Stack Hub integrated system.

A scale unit node has a hardware failure.

You replace the physical server based on the field replacement unit (FRU) documentation of the OEM hardware vendor.

You need to reintroduce the node to the scale unit. Which PowerShell cmdlet should you run?

- A. Enable-AzsScaleUnitNode
- B. Repair-AzsScaleUnitNode
- C. Start-AzsScaleUnitNode
- D. Restart-AzsInfrastructureRole
- E. Add-AzsScaleUnitNode

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-node-actions?view=azs-2008&tabs=az1#repair>

NEW QUESTION 60

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Stack Hub integrated system.

The security department at your company wants a list of all the users who can manage the integrated system from the privileged endpoint (PEP).

You need to create the list.

Solution: You connect to the administrator portal and view the users who are assigned the Owner role for the default provider subscription.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-stack/reference/pep-2002/get-cloudadminuserlist>
