

Scrum

Exam Questions PSM-II

Professional Scrum Master II

NEW QUESTION 1

After several Sprints, a key stakeholder starts using the product. The stakeholder is surprised by the slow performance and complains to the Product Owner. The Product Owner comes to the Scrum Master asking for advice.

What is the best action for a Scrum Master to take?

- A. Wait until the next Sprint Retrospective as it is the most opportune time to modify the Definition of Done.
- B. Bring the concern to the testers in the Development Team and ask them to include performance testing.
- C. Explain to the Product Owner that it's up to the Development Team t
- D. decide on acceptable performance standards as they own the Definition of Done.
- E. Encourage the Product Owner to bring the performance concerns to the Development Team and work with them on how to improve performance, and ultimately have stronger Definition of Done.

Answer: D

Explanation:

The highest priority of agility is to satisfy the customer through early and continuous delivery of valuable software. Because the Development Team is the one doing the work and increments must meet performance standards, they can expand their Definition of Done to include more stringent criteria for higher quality.

NEW QUESTION 2

Which role would know the most about the progress toward a business objective or a release, and be able to explain clearly the alternatives?

- A. The Product Owner
- B. The Release Manager
- C. The Development Team
- D. The Scrum Master

Answer: A

NEW QUESTION 3

What factors are best considered when defining the Sprint length?

- A. How often team membership changes and the size of the Development Team.
- B. Having consistent Sprint length across all Scrum Teams.
- C. The level of expertise over the technology to be used, ability to release an Increment to the end users, and the risk of being disconnected from the stakeholders.

Answer: C

NEW QUESTION 4

Which of the following statements are true about the Scrum Master role?

- A. The Scrum Master assigns the tasks to Development Team members and ensures they are completed within the committed timebox.
- B. The Scrum Master helps those outside the Scrum Team understand which interactions are helpful and teaches the Development Team to keep the Scrum meetings within the timebox.
- C. The Scrum Master is responsible for updating the Scrum board and ensuring team members avoid conflicts.
- D. At the Sprint Review, the Scrum Master demonstrates the completed Increment and answers any QUESTION NO:s from the stakeholders.

Answer: B

Explanation:

The Scrum Master is responsible not only for coaching the Scrum Team but also the organization.

NEW QUESTION 5

What would be typical Scrum Master activities during the Sprint?

- A. Monitor the progress of the Development Team and assigning tasks.
- B. Remove impediments and facilitating inspection and adaptation opportunities as requested or needed.
- C. Avoiding conflicts and escalating to the line managers if conflicts occur.

Answer: B

NEW QUESTION 6

According to the Scrum Guide, where should the Daily Scrum be held?

- A. Wherever the Development Team decides is most suitable.
- B. In a room where management can attend.
- C. In the same location where the Development Team is seated.
- D. In front of the Scrum board.
- E. Wherever the Scrum Master decides is best.

Answer: A

Explanation:

Because the Daily Scrum is owned and managed by the Development Team, it is up to them to decide on the most effective place and time to hold the Daily Scrum.

NEW QUESTION 7

What Development Team structure is best suited to produce integrated increments?

- A. Every Development Team has the abilities to develop functionality from beginning to end throughout all technical layers.
- B. Each Development Team specializes in one technical layer of the system (e. GUI, database, middle tier, interfaces).
- C. GUI, database, middle tier, interfaces).

Answer: A

NEW QUESTION 8

Several Sprints into a project, a client is complaining to the Product Owner about the poor performance of the product. As a Scrum Master, how can you help the Product Owner?

- A. Coach the Product Owner on effective ways to communicate this concern to the Development Team and encourage the Product Owner to add the performance issue to the Product Backlog.
- B. Tell the Product Owner performance is defined by the Development Team.
- C. Note the issue for the next Sprint Retrospective.
- D. Notify the team responsible for system performance.

Answer: A

NEW QUESTION 9

A Development Team has a total of six members, 4 members who work full time in the office and 2 members who work part time at home. The Development Team is complaining that it is too difficult to synchronize every day and has suggested having the Daily Scrum every other day instead. What would be three key concerns if the Daily Scrum is held less frequently? (Choose three.)

- A. Impediments are raised and resolved more slowly.
- B. Opportunities to inspect and adapt the Sprint Backlog are reduced.
- C. Less information about the progress will be shared causing the Sprint plan to become inaccurate and reducing transparency over progress toward the Sprint Goal.
- D. The Scrum Master loses the ability to update the burndown chart adequately.
- E. The Product Owner cannot accurately inspect utilization of the individual team members.

Answer: ABC

Explanation:

The Daily Scrum is an internal meeting for the Development Team to inspect progress toward the Sprint Goal and to inspect how progress is trending toward completing the work in the Sprint Backlog. The Daily Scrum optimizes the probability that the Development Team will meet the Sprint Goal. Every day, the Development Team should understand how it intends to work together as a self-organizing team to accomplish the Sprint Goal and create the anticipated Increment by the end of the Sprint.

Reducing the frequency of the event will increase the length of the feedback loop and adds risk if the team deviates too far off course.

NEW QUESTION 10

Which role is responsible for determining when it is most appropriate to update the Sprint Backlog?

- A. The Product Owner
- B. The Development Team
- C. The Scrum Team
- D. The Scrum Master

Answer: B

Explanation:

The Development Team is responsible for tracking the remaining work of the Sprint.

NEW QUESTION 10

How should multiple Scrum Teams, working from the same Product Backlog, select the Product Backlog items their teams plan to work on?

- A. The Product Owner will present the work and the Development Teams will select the items they will work on.
- B. The Product Owner creates separate Product Backlogs for each Development Team.
- C. Each Scrum Team would select an equal number of items.
- D. The Product Owner assigns the work to each team.
- E. The Scrum Team with the highest productivity will select the items first.

Answer: A

Explanation:

The ones doing the work are the best ones to decide what they can do and how to do it.

NEW QUESTION 14

If burndown charts are used to visualize progress, what does a trendline through a release burndown chart indicate?

- A. When all work will be completed so the Scrum Team can start work on a new Product Backlog.
- B. When the project will be over if the Product Owner removes work that is equal in effort to any new work that is added.
- C. When the work remaining is projected to be completed if nothing changes on the Product Backlog or Development Team.
- D. The evolution of the return of investment on the project.

Answer: C

Explanation:

The trendline is based on the team's average velocity and the projective completion to zero is based on the team's velocity. The burndown chart is a helpful tool for Development Teams to self-manage BUT it is not mandatory as the teams will decide the best way to manage their own progress and promote transparency.

NEW QUESTION 17

What are typical Product Owner activities during Sprint 0?

- A. Creating a project plan based on the defined timeline.
- B. Ensuring there is enough work to do for at least three Sprints.
- C. Creating User Stories based on the requirements document.
- D. Allocating enough resources before starting Sprint 1.
- E. There is no such thing as Sprint.

Answer: E

Explanation:

There are no special Sprints. All Sprints are structured to produce potentially shippable product Increments.

NEW QUESTION 21

What should a Development Team do with non-functional requirements?

- A. Ensure they are addressed in every Increment.
- B. Assign them to the technical leads on the team.
- C. They will be addressed in the Integration Sprints.
- D. Add them to a separate non-functional requirements list.

Answer: A

Explanation:

Non-functional requirements should be worked on alongside functional development.

NEW QUESTION 25

A new member has just joined an existing Development Team that has been together for several Sprints. During the Sprint, the individual has been trying to share his ideas and viewpoints but is continuously ignored by the rest of the Development Team. Which three Scrum Values has the Development Team been neglecting? (Choose three.)

- A. Commitment
- B. Respect
- C. Transparency
- D. Focus
- E. Openness
- F. Courage

Answer: BEF

Explanation:

The Scrum Team members have courage to do the right thing and work on challenging problems. The Scrum Team agree to be open (to speak and listen) about all the work and the challenges with performing the work. Scrum Team members respect each other's skills, experience, and opinions.

NEW QUESTION 26

Scrum promotes self-organization.

Which of these statements would NOT support self-organizing?

- A. The Development Team deciding what work to do in a Sprint.
- B. Removing the need for documentation.
- C. Being a lightweight framework.
- D. Removing titles for Development Team members.

Answer: B

NEW QUESTION 30

Which two statements best describe a Sprint Goal? (Choose two.)

- A. Sprint Goals are defined when the completed work is reviewed at the end of a Sprint.
- B. Sprint Goals give the Development Teams flexibility and creativity on how to implement functionality during the Sprint.
- C. During the Sprint Planning, the entire Scrum Team collaboratively crafts a Sprint Goal based on a business objective that the Product Owner would like to achieve that Sprint.
- D. Sprint Goals can change as new insights emerge during the Sprint.

Answer: BC

Explanation:

The number of items selected from the Product Backlog for the Sprint is solely up to the Development Team. Only the Development Team can assess what it can accomplish over the upcoming Sprint.

The Sprint Goal is an objective set for the Sprint that can be met through the implementation of Product Backlog. It provides guidance to the Development Team

on why it is building the Increment. It is created during the Sprint Planning meeting. The Sprint Goal gives the Development Team some flexibility regarding the functionality implemented within the Sprint. The selected Product Backlog items deliver one coherent function, which can be the Sprint Goal. The Sprint Goal can be any other coherence that causes the Development Team to work together rather than on separate initiatives.

NEW QUESTION 32

Adding more resources in Scrum will proportionally increase the value delivered.

- A. True
- B. False

Answer: B

Explanation:

When working on complex problems in complex environments, adding more resources (people, money, tools, etc.) cannot guarantee increased value or success.

NEW QUESTION 35

Which of the following are time-boxed events in Scrum?

- A. Sprint Planning
- B. Daily Scrum
- C. Sprint Review
- D. Sprint Retrospective
- E. All of the above

Answer: E

NEW QUESTION 36

Your company has notified the stakeholders that they will be delivering the first release of a new product within ten Sprints. On the seventh Sprint, the Scrum Team discovers that they will not be able to include all of the expected features within the first release. The Product Owner believes if they remove some items from the Definition of Done they will be able to accelerate the development process. The Development Team objects to this idea as it will lead to technical debt. As a Scrum Master, what would be the best two ways to explain to the Product Owner the impact of technical debt? (Choose two.)

- A. As long as there is still technical debt in the current release, feature development for the next release cannot be started
- B. The Product Owner must first agree to this impact before allowing changes to the Definition of Done.
- C. Reducing the Definition of Done will introduce unknown errors as development progresses and functionality is added
- D. The system can become more difficult to stabilize as work progresses. Development for the actual release as well as future releases will be slowed down in unpredictable ways.
- E. Releasing the version upon a reduced Definition of Done creates false assumptions about the actual state of the system
- F. This will create many interruptions during the development of the next release as fixes will need to be done to the previous release caused from a reduction of quality.
- G. The amount of technical debt will need to be analyzed in order to understand the impact on subsequent releases in order to allocate additional Sprints at the end of the project.

Answer: BC

Explanation:

The Definition of Done helps the Scrum Team have a shared understanding of what it means for work to be complete, to ensure transparency. The Definition of Done is used to assess when work is complete on the product Increment. It also ensures that the work that is done is in usable condition and meets the Development Teams quality standards for future sustainability.

NEW QUESTION 38

Stakeholders are only allowed to meet with the Scrum Team at Sprint Review.

- A. True
- B. False

Answer: B

Explanation:

Getting feedback from Stakeholders is a crucial activity in Scrum. Working with stakeholders frequently ensures the team to focus on the right things to build. Although it is required to have Stakeholders at Sprint Review, they can also engage with the Scrum Team during Product Backlog Refinement, Sprint Planning or during the Sprint if the Scrum Team requires it.

NEW QUESTION 43

The outcome of a Sprint can be impacted by which of the following? (Choose all that apply.)

- A. The working relationships and skills of the people on the Scrum Team(s).
- B. The complexity and stability of the technology.
- C. The complexity of the requirements.

Answer: ABC

Explanation:

The knowledge, skills, behaviors of the team, and what's known and not known will impact not only how effective the team is but also the outcomes of what it can produce.

NEW QUESTION 44

At the eighth Sprint Review, the stakeholders are upset that the product being built is not what they expected and will incur additional costs that was not planned for.

What may have led to this?

- A. The Scrum Master has not been reporting on the progress of the Scrum Team
- B. The Product Owner has not been managing the Development Team's tasks effectively
- C. The Development Team has not been improving their velocity.
- D. The Scrum Master has not ensured that the project is transparent
- E. The Product Owner has not made the stakeholders aware of the progress of the project
- F. The stakeholders have not been attending the Sprint Reviews.
- G. The Scrum Master has not been attending the Daily Standup
- H. The Product Owner has not been using the Gantt chart correctly
- I. The Stakeholders have not been invited to the Sprint Retrospectives.

Answer: B

Explanation:

Scrum requires significant aspects of the process to be visible to those responsible for the outcome. This includes transparency with internal and external stakeholders.

NEW QUESTION 49

Who is responsible for ensuring the Product Backlog items are understood to the level needed?

- A. The Business Analyst.
- B. The Scrum Master.
- C. The Development Team.
- D. The Product Owner.

Answer: D

Explanation:

The Product Owner is accountable for managing the Product Backlog.

NEW QUESTION 52

A Scrum Master is keeping a list of open impediments, but it is growing and he/she has been able to resolve only a small portion of the impediments. Which would be the LEAST helpful technique in this situation?

- A. Consulting with the Development Team
- B. Prioritizing the list and working on them in order.
- C. Arranging a triage meeting with all project managers.
- D. Alerting management to the impediments and their impact.

Answer: C

Explanation:

Scrum does not have project managers and arranging a triage meeting would not help accelerate the removal of impediments.

NEW QUESTION 54

An organization is planning to form five new Scrum Teams to work on building a single product. A few of the future team members ask the Scrum Master who will coordinate the work between the different Scrum Teams.

What action should the Scrum Master take?

- A. Visit the five Development Teams daily to ensure alignment and that all Sprint Backlogs remain synchronized.
- B. Teach them that it is their responsibility to form the teams such that each team will have the necessary skills, knowledge, and competencies to create an integrated Increment by the end of every Sprint.
- C. Advise the teams to minimize dependencies by working on separate development branches and integrate at the end of four Sprint cycles.
- D. At the end of Sprint Planning, collect all Sprint tasks and create a consolidated plan for the entire Sprint.
- E. Teach the Product Owner to work with the technical leads on ordering Product Backlog in a way to avoid too much technical and development overlap during a Sprint.

Answer: B

Explanation:

Development Teams are structured and empowered by the organization to organize and manage their own work. This includes deciding how to form teams when multiple teams are needed. The resulting synergy optimizes the Development Team's overall efficiency and effectiveness. They are self-organizing. No one (not even the Scrum Master) tells the Development Team how to turn Product Backlog into Increments of potentially releasable functionality.

NEW QUESTION 59

How much work must a Development Team do to a Product Backlog item it selects for a Sprint?

- A. An equal amount of time on analysis, design, programming, testing and documentation.
- B. As much as it has informed the Product Owner will be done for every Product Backlog item it selects in conformance with the definition of "Done".
- C. All development work and at least some testing.
- D. As much as it can fit into the Sprint
- E. Any remaining work will be moved to a subsequent Sprint.

Answer: B

NEW QUESTION 61

You are the Scrum Master for four Scrum Teams working on one product. Several of the developers notify you that their teams will need full-time help of an external technical specialist in the upcoming two Sprints.
What key concerns should the Scrum Master take into account?

- A. Having enough work for all Development Team members.
- B. The benefit of Development Teams solving the problem themselves and the ability to produce integrated Increments.
- C. Maintaining a consistent velocity.
- D. Hiring additional resources to fill the void in skillset.

Answer: B

NEW QUESTION 65

The director of engineering in your organization always stresses the importance of meeting deadlines in order for the engineering department to be seen as a reliable source for the product management department. The director has calculated that the team's velocity needs to increase an additional 15% to meet the commitment he made to management for the release date of the product.
He asks Steven, the team's Scrum Master, to increase his team's velocity. Which would be the best two responses for Steven to take? (Choose two.)

- A. He explains how a team uses the velocity of a Sprint primarily to forecast work for the next Sprint, not to perfectly predict future productivity.
- B. He refers the director to the Product Owner for all information concerning the progress of development.
- C. He informs the director of organizational impediments he is aware of that prevent the team from being more productive.
- D. He suggests collaborating with him on how to remove these impediments.
- E. He educates his director how it is part of a team's self-organization to improve velocity.
- F. He invites the director to the next Sprint Retrospective to brainstorm on how they can improve.
- G. He helps the director understand that it typically takes a few Sprints for a team to gradually increase the velocity up to the level expected.
- H. Meanwhile he presents this to the team as a challenge and a company goal, leaving it however up to them to figure out exactly how to achieve this.
- I. He tells the director that this is not his responsibility in Scrum.
- J. He tells the director to work with the Product Owner to check whether the estimates on the Product Backlog are being respected during implementation.

Answer: AB

Explanation:

The Scrum Master serves the organization by helping employees and stakeholders understand and enact Scrum and empirical product development and causing change that increases the productivity of the Scrum Team.

NEW QUESTION 67

Steven, the Scrum Master, is approached by one of the Development Team members saying that they are not completing regression tests for all of the work they are performing to the level defined in the Definition of Done. They have discussed this with the Product Owner and decided to remove regression testing from the Definition of Done.
Which two actions are the most appropriate for Steven to take? (Choose two.)

- A. Reject the decision as the long term maintainability of the product will be negatively impacted by modifying the Definition of Done.
- B. Accept the decision as a mutual agreement has been made between the Development Team and the Product Owner.
- C. Ask the Development Team and the Product Owner what problem they are trying to solve by altering the Definition of Done and removing regression testing from it.
- D. In what ways will this decision impact transparency and quality?
- E. Ask the Development Team and the Product Owner if they are still able to produce potentially shippable product increments by altering the Definition of Done?

Answer: CD

Explanation:

As a servant/leader, the Scrum Master facilitates conversations through open ended questions in order to help the team members make the best possible decisions according to what is known at the time. He/she does not approve or reject team decisions but ensures the team stays within the boundaries of the Scrum framework.

NEW QUESTION 72

You have been hired as a Scrum Master for a company that has been doing business for over fifty years. In order to stay competitive, they have started an initiative to digitize their legacy systems. The company has several Scrum Teams working on different components that will be integrated to a single back office platform.

Your team is responsible for building the back office platform and integrating all other components. The Scrum Teams work in two week Sprints and are expected to deliver all functionality in six Sprints.

During development the requirement changes in the other components have been slowing down your team's progress. Because of these changes, your team has estimated that they will not be able to deliver all expected work within the original timeframe. The Scrum Teams working on the other components confirm that they are still on track to meet the expected delivery date. The program manager in charge of the digitization initiative is upset and angry with your team.

As a Scrum Master, what could you do to help the Product Owner?

- A. You suggest working with the program manager and the other teams on the ordering and the value of your team's open Product Backlog items to redefine the possible delivery date.
- B. You shorten your team's Sprints to be ready sooner.
- C. You remove all items from the Product Backlog for which development is forecasted to be beyond the expected date.
- D. These are likely to be low value anyhow.
- E. You suggest adding additional developers to the team in order to increase velocity and meet the original date.

Answer: A

Explanation:

The Scrum Master serves the Product Owner in several ways, including: Finding techniques for effective Product Backlog management; Helping the Scrum Team understand the need for clear and concise Product Backlog items; Understanding product planning in an empirical environment; Ensuring the Product Owner knows how to arrange the Product Backlog to maximize value.

NEW QUESTION 73

When does a new Sprint begin?

- A. Immediately after the next Sprint Planning.
- B. Immediately after the end of the previous Sprint.
- C. It depends on the Product Owner.
- D. Every Monday.

Answer: B

NEW QUESTION 75

Peter, the Product Owner, has been giving positive recognition to individual Development Team members who have moved their work to 'done' during the Daily Scrum. Peter wants to ensure the team is adhering to the ideal guideline on the burndown chart. What would be two valid actions for Steven, the Scrum Master, to take? (Choose two.)

- A. Steven talks with Peter about concerns of how his behavior might impact the team members and request that he stop attending for now.
- B. Steven coaches Peter on best practices for updating the burndown chart as it provides accurate information on how well the team is performing.
- C. Nothin
- D. Steven is optional at the Daily Scrum and it is the responsibility of the team to decide how to best run it.
- E. Steven coaches the Scrum Team about the purpose of the Daily Scrum.

Answer: AD

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values.

The Scrum Master is a servant-leader for the Scrum Team. The Scrum Master helps the Scrum Team understand which of their interactions are helpful and which aren't.

The Scrum Master helps everyone change these interactions to maximize the value created by the Scrum Team.

NEW QUESTION 78

What is a good way for a Scrum Team to ensure that security concerns are addressed and transparent?

- A. Add Security Sprints to resolve security concerns when needed.
- B. Have the Scrum Team create Product Backlog items for each concern and/or add security concerns to the definition of "Done".
- C. Create a separate backlog for security items and only work on the items when a specialist becomes available.
- D. Delegate the work to an external team.

Answer: B

Explanation:

The Product Backlog and the Definition of "Done" are artifacts that promote transparency.

NEW QUESTION 83

At the end of the eighth Sprint, the internal sponsors are upset and angry with the progress of the product being built. The current state of the product is not as expected and will require additional Sprints and more budget than originally anticipated at the start of the project.

What factors may have led to this? (Choose three.)

- A. The Product Owner has not been engaging with sponsors frequently enough and has not been kept aware of the overall progress of the project.
- B. The sponsors haven't been using the Sprint Reviews to actively engage, and inspect and evaluate progress.
- C. The scope changes have not been tracked adequately and the change request process has not been followed properly.
- D. The stakeholders have not been using the Daily Scrum effectively to track the Development Team's progress.
- E. The Scrum Master has not ensured transparency.
- F. The project plan proposed to the sponsors at the start of the project followed stringently.

Answer: ABE

Explanation:

One of the principles of agility includes working closely with business people. In order to manage stakeholder expectation, there must be open communication (through collaboration and transparency) throughout the project cycle. This maximizes alignment, helps with making business decisions, and reduces risk.

Although, the Scrum Guide does not directly state that the Scrum Master is responsible for ensuring transparency it is implicit. The Scrum Master is responsible for the process in which Scrum is adopted and enacted. Scrum is founded on empiricism and the Scrum Master helps those inside and outside the team work in an empirical environment which includes transparency (one of the three pillars of empiricism).

NEW QUESTION 86

A new Product Owner has joined an existing Scrum Team that has been working together for eight Sprints. The Development Team has grown to have a good understanding of the functionality and business for the product they have been building. The Product Owner, being new to the company, is unsure about his responsibilities.

As a Scrum Master explain what two acceptable ways of helping the Product Owner would be. (Choose two.)

- A. You advise the Product Owner to start building a good relationship with the stakeholders of the product. Ongoing interaction with them is important to regularly align with changing organizational or market expectation
- B. The Product Owner is also expected to invite the right stakeholders to the Sprint Review meeting.
- C. You inform the Product Owner that, in today's highly competitive markets, it is important that the Development Team is updated on changing business priorities on a daily basis
- D. The Daily Scrum allows the Development Team to adapt to the changes in scope without delay.
- E. You tell the Product Owner to make sure that there are no ambiguities or possible misunderstandings in the items on the Product Backlog when they are handed over to the Development Team

- F. This is best done by capturing the functional requirements during an analysis phase, resulting in documents that are considered as the working product of such analysis Sprints.
- G. You advise the Product Owner to rely on the Development Team and the stakeholders to formulate the Product Backlog, as they are the ones most knowledgeable.
- H. By asking QUESTION NO:s and working with them the Product Owner will quickly be up to speed.

Answer: AD

Explanation:

The ones that are closest to the work are the best ones to understand and explain what the work is and what the needs of the users and product are.

NEW QUESTION 91

By the end of the Sprint, a Product Backlog item in the Sprint Backlog does not meet the team's Definition of Done. What two things should happen with the item? (Choose two.)

- A. It will be inspected at the Sprint Review and if it is acceptable by the stakeholders then include it in the Increment.
- B. Do not include the item in the Increment for the Sprint.
- C. Split the item and add the estimation of the completed work to the current Sprint so not to impact the velocity and add the 'undone' work to the next Sprint.
- D. Estimate the remaining work needed to make it 'done' and add it to the Product Backlog for the Product Owner to decide what to do with it.

Answer: BD

Explanation:

At the end of a Sprint, the new Increment must be 'Done', which means it must be in useable condition and meet the Scrum Team's definition of 'Done'. Scrum Team members must have a shared understanding of what it means for work to be complete, to ensure transparency. This is the Definition of Done for the Scrum Team and it is used to assess when work is complete on the product Increment.

NEW QUESTION 95

An organization is using Scrum to build five new products. What would be the best two options for the number of Product Owners the organization should have? (Choose two.)

- A. There is one Product Owner for each product (so five in total). Each Product Owner may delegate, share and align work within their individual Product Backlog.
- B. Enough Product Owners to delegate as much work needed to maximize utilization of all Development Team members.
- C. There is one Product Owner responsible for all five products.
- D. This person is not allowed to delegate any of the Product Owner responsibilities as he/she is accountable for the success of each product.
- E. There is one Product Owner responsible for all five products.
- F. In order to scale his/her role, he/she can delegate some of the individual Product Owner responsibilities to others within each product but would still remain accountable for the value of the work produced.

Answer: AD

Explanation:

The Product Owner is the sole person responsible for maximizing the value of the product through the ordering and management of the Product Backlog. This reduces complexity in communication and understanding who to go to when there are QUESTION NO:s about the product. The Product Owner may delegate his/her responsibilities but still remains accountable for the outcome of those responsibilities.

NEW QUESTION 100

As a Scrum Master, what would you strive for if five new Scrum Teams were to work on one product?

- A. There should be five Product Owners, one for each Scrum Team.
- B. The product has one Product Backlog and one Product Owner.
- C. There should be five Product Backlogs and one Product Owner to manage them.
- D. There should be five Product Backlogs and five Product Owners.

Answer: B

Explanation:

For a single product there is one Product Backlog. For a single Product Backlog there is one Product Owner.

NEW QUESTION 105

Peter is a new Product Owner on a newly formed Scrum Team. Peter has projected a product completion date based on an estimated velocity of 21 completed points per Sprint. After the first 3 Sprints, the team has determined that their maximum velocity is 15 points and they are unable to create shippable increments at the end of each Sprint.

What is the best way to proceed?

- A. The Sprints have failed to produce shippable Increments there for opportunities to inspect and adapt is lost.
- B. The Scrum Master would encourage the organization to add more team members in order to increase the team's capacity.
- C. The Scrum Master would coach the team on improving their estimations and commitment to completing the Sprint Backlog.
- D. Extend the Sprint in order to complete the Sprint Backlog items.
- E. Inform Peter that the projected completion date is not correct.
- F. The Development team would estimate the remaining work to produce a shippable Increment and suggest making it "Done" before working on new feature.
- G. Based on empirical data, Peter can adjust the completion date and decide how to continue.

Answer: D

NEW QUESTION 107

The Development Team should have all the skills and competencies needed to:

- A. Turn the Product Backlog items it selects into a potentially releasable product increment of functionality.
- B. Do all of the development work in order to handoff to the testers in the subsequent Sprint.
- C. Complete the project within the estimate as committed to the Product Owner.

Answer: A

NEW QUESTION 108

What would be the best two ways to identify that a Development Team is self-organizing? (Choose two.)

- A. Management is able to know which members are working on which items.
- B. Creativity thrives and new possibilities are explored.
- C. The Development Team members are cross-functional and knows what it needs to do to deliver the all tasks committed to the Sprint Planning.
- D. The Development Team is able to resolve internal conflicts between members in order to continue working.

Answer: BD

Explanation:

In self-organized teams creativity thrives, conflicts can be resolved, and new possibilities are explored.

NEW QUESTION 112

The Scrum Master is no longer needed when teams become self-organized.

- A. True
- B. False

Answer: B

NEW QUESTION 115

In order to start the first Sprint, Scrum only requires a Product Owner with enough ideas, a Development Team to execute on those ideas, and a Scrum Master to guide the process.

- A. True

Answer: A

Explanation:

In complex domains, you are only able to know the outcomes in hindsight. Empiricism, from which Scrum was founded on, asserts that knowledge comes from experience and making decisions based on what is known. New knowledge will emerge as work is being done.

NEW QUESTION 116

Select the correct Scrum Team roles defined in Scrum.

- A. Development Team, Scrum Master, Product Owner
- B. Engineers, Business Analyst, Product Owner
- C. Stakeholders, Scrum Master, Project Manager, Product Owner
- D. Product Manager, Business Analyst, Development Team, Stakeholders

Answer: A

Explanation:

The Scrum Framework only recognizes these three roles although others may be needed to help the team build the most valuable product possible.

NEW QUESTION 121

What could be a reason for a Product Owner to delay the start of a new Sprint after the conclusion of the previous Sprint?

- A. The QA team has not finished testing the previous Increment before declaring it ready to ship.
- B. The stakeholders were disappointed with the Increment produced in the previous Sprint.
- C. There is no acceptable reason.
- D. A new Sprint starts immediately after the conclusion of the previous Sprint.
- E. The Product Owner needs additional time to identify the next initiatives.
- F. There's not enough work in the Product Backlog to work on in the upcoming Sprint.

Answer: C

NEW QUESTION 126

What should a Development Team do if it realizes it has selected too much work after starting the Sprint?

- A. Modify the definition of "Done" to ensure all Product Backlog items can be done by the end of the Sprint.
- B. Work with the Product Owner to remove some work or Product Backlog items as soon as possible.
- C. Add additional team members to handle the extra work.
- D. Continue working and update the Product Owner at the Sprint Review.

Answer: B

Explanation:

The Sprint Backlog is a living artifact that evolves and changes as more is learned or discovered.

NEW QUESTION 128

In Scrum, how would budgeting and financial forecasting be performed? (Choose two.)

- A. Frequently inspect the outcomes of the delivered Sprint Increments to understand how much value is being produced per investment spent.
- B. A single release may be funded with several Sprints where every Sprint is producing shippable increments.
- C. Budgeting is not necessary as the only funding necessary is the operational costs of the Scrum Teams.
- D. Fixed budgets are not allowed in Scrum.

Answer: AB

Explanation:

The cost of developing, delivering, and sustaining products can impact how the flow of value is managed throughout the life of a product. Each Sprint is an opportunity to inspect the investment (financial, time, effort, etc.) against the returned value (customer satisfaction, revenue, etc.) of the work that has been delivered. The team can then decide on what it should do next to maximize the value of the investment.

NEW QUESTION 130

Which statement best describes Scrum?

- A. A clearly defined methodology that defines the software development process.
- B. A manual for defining best practices for software development.
- C. A clearly defined and predictable process that follows the principles of Computer Science.
- D. A framework to address complex products in complex environments.

Answer: D

Explanation:

Frameworks allow those closest to the problem the flexibility to creatively and productively deliver products of the highest possible value. Each component of Scrum serves a specific purpose and is essential to Scrum's success and your usage of Scrum to develop complex projects.

NEW QUESTION 132

A Development Team member has notified the Scrum Master of a potential data security risk. What action should the Scrum Master take?

- A. Notify the test team.
- B. Add a Product Backlog item to address the security issue.
- C. Ask the Development Team member to share the issue with the team as soon as possible.
- D. Wait until the Sprint Retrospective to add security to the definition of "Done".

Answer: C

Explanation:

It is best to coach the Development Team members to collaborate on issues regardless of severity. They may consult the Scrum Master or Product Owner if needed.

NEW QUESTION 134

Multiple Scrum Teams working from the same Product Backlog must have the same Sprint start dates.

- A. True
- B. False

Answer: B

Explanation:

Multiple Scrum Teams could have the same Sprint start dates but it is not mandatory as the importance is on being able to integrate their shippable Increments at the end of their Sprints.

NEW QUESTION 136

What should the Development Team do if they are approached by someone outside the team and asked to add a "very important" item to a Sprint that is in progress?

- A. Add the item to the bottom of the Sprint Backlog.
- B. Replace an item in the current Sprint of equal size.
- C. Add the item to the top of the next Sprint Backlog.
- D. Inform the Product Owner so he/she can work with the person.

Answer: D

Explanation:

Allow the Product Owner to decide what to do with the item as he/she is responsible for the flow of value.

NEW QUESTION 139

Which is the best description of a Product Owner?

- A. Requirements developer.
- B. Value optimizer.
- C. Team leader.
- D. Go-between between development team and stakeholders.

Answer: B

NEW QUESTION 142

Which of these tools is mandatory for the Product Owner to use?

- A. Release burnup chart.
- B. Burndown chart.
- C. Version control.
- D. Project Gantt chart.
- E. None of the above.

Answer: E

Explanation:

The Product Owner can use any tool, method or practice that he/she finds fit in order for him/her to make the best decisions possible.

NEW QUESTION 144

An organization wants to apply Scrum to build a new product and has hired Steven to be the Scrum Master of three new teams that will build the first release. The organization is new to Scrum and asks Steven for advice on how to start.

Which two things should Steven first advise? (Choose two.)

- A. Each Scrum Team has its own Product Backlog with items only their team will be working on.
- B. One Product Backlog to represent all of the known work needed to be done for the product.
- C. Three Product Owners, one for each Scrum Team.
- D. Having one Product Owner to be accountable for maximizing the flow of value throughout the development process and provide transparency on the overall progress.

Answer: BD

Explanation:

The Scrum Master serves the organization in several ways, including: Leading and coaching the organization in its Scrum adoption; Planning Scrum implementations within the organization; Helping employees and stakeholders understand and enact Scrum and empirical product development.

NEW QUESTION 147

Which two scenarios would best represent a self-organizing Development Team? (Choose two.)

- A. The Development Team members are strictly focused on the work within their functional role and always handing off the work to other roles in a timely matter.
- B. Management works with the Scrum Master to optimize the Development Team's progress during the Sprint.
- C. Development Team members collaboratively select and re-plan their work throughout the Sprint.
- D. The Development Team invites external people to the Sprint Planning to help them create a complete and detailed Sprint Backlog.
- E. The Development Team creates its own Sprint Backlog, reflecting all work that is part of the Definition of Done.

Answer: CE

Explanation:

A self-organized team is a team that is able to self-manage and decide how best to accomplish their work.

NEW QUESTION 149

The Development Team can cancel the Sprint:

- A. When the availability of the Product Owner is less than expected.
- B. When the requirements for the work to be done become unclear or not understood.
- C. It can't
- D. Only Product Owners can cancel Sprints.
- E. When the Sprint Backlog is determined to be unachievable.
- F. When too many impediments occur.

Answer: C

NEW QUESTION 150

During the Sprint Review of a scaled development effort, each Scrum Team should demonstrate its individual Increment in a separate branch of the code.

- A. True
- B. False

Answer: B

Explanation:

If there are multiple Scrum Teams working on the system or product release, the Development Teams on all the Scrum Teams must mutually define the definition of "Done". Each Increment is additive to all prior Increments and thoroughly tested, ensuring that all Increments work together.

NEW QUESTION 151

During a Product Backlog refinement meeting, the Product Owner introduces a business objective that will be worked on for the next several Sprints. The Product Owner envisions several key features necessary to be delivered in order to meet the business objective. As the features will be using sensitive user data it will be subjected to external security audits. These non-functional security requirements were not applicable to previous Increments.

What are two good ways the Development Team can handle these high-security concerns? (Choose two.)

- A. They should be planned in parallel Sprints so not to disrupt the Development Team during feature development
- B. After security concerns have been finalized, they will be applied to the work that is already completed before new feature development can continue.
- C. They should be handled in a parallel Sprint by a separate security team so that security can be resolved through application enhancements without impacting the functional development.
- D. A complete list of security-related Product Backlog items needs to be created before starting a new Sprint.
- E. During the Sprint Retrospective, the Development Team assesses how to add these expectations to their Definition of Done so every future Increment will meet these security requirement
- F. If needed they can work with external specialists to better understand the requirements.
- G. They are added to the Product Backlog and addressed throughout the next Sprints, combined with creating the business functionality in those Sprints, no matter how small the business functionality.

Answer: DE

Explanation:

In order to ensure transparency, work that must be done to the product must be visible in either the Product Backlog or the Definition of Done.

NEW QUESTION 153

If there are multiple Scrum Teams working on the same product, all of the Scrum Teams must mutually define a Definition of Ready (DoR). The DoR is a checklist that the Product Owner must fulfill before a Product Backlog item can be presented at the Sprint Planning. This protects the Development Team from interruptions and disruptions during the Sprint.

- A. True
- B. False

Answer: B

Explanation:

Product Backlog items should be clear enough and have enough information for the Product Owner and Development to understand the work that needs to be done and to create a forecast of Product Backlog items to implement the Sprint Goal. Nothing stops the flow of Sprints, for example, we do not delay the Sprint because the items are not ready. In such cases, the “unready” items would be selected for the Sprint anyway and refined during the Sprint. In the case that the Product Backlog items are not clear enough, the Development Team forecasts the most likely Product Backlog items to meet the goal and create a Sprint Backlog based on a likely initial design and plan. Once the time-box for the Sprint Planning meeting is over, start the Sprint and continue to analyze, decompose, and create additional functionality during the Sprint. At the end of the Sprint, the Scrum Team can discuss in the upcoming Sprint Retrospective why this happened and what changes will make it less likely to recur.

NEW QUESTION 157

When multiple Scrum Teams are working from the same Product Backlog, also known as scaled Scrum, they must still work in conformance of the Scrum guide.

- A. True
- B. False

Answer: A

Explanation:

Scrum is a framework with built in flexibility to support multiple Scrum Teams working on a single product.

NEW QUESTION 160

What would be the responsibilities of a self-organizing Development Team?

- A. Update stakeholders on the daily progress and keep the burn-down chart updated.
- B. Select the Product Backlog items for the Sprint and do the work planned in the Sprint Backlog.
- C. Writing User Stories and reordering the Product Backlog.
- D. Deciding on the value of the product features and value estimations.

Answer: B

NEW QUESTION 162

Three Development Teams are currently building a single product and pulling work from the same Product Backlog. All three teams have identified that they will need Dan, a database specialist, to work full time in their team for the next several Sprints.

What should Steven, the Scrum Master, do to solve this potential problem?

- A. Manage the items in the Sprint Backlogs so that Dan can be utilized evenly for each team.
- B. Assign Dan to the team with the most urgent tasks first and then move him to the next team and so on until the required support is completed.
- C. Facilitate a discussion with all Development Teams on how they want to deal with this issue, and help them implement their preferred solution.
- D. Ask Dan to work with the HR department to recruit and hire additional database specialist
- E. In the meantime, have the Product Owner move items that do not depend on Dan to the top of the Product Backlog.

Answer: C

Explanation:

As a servant/leader, the Scrum Master facilitates conversations through open ended QUESTION NO:s in order to help the team members make the best possible decisions according to what is known at the time. He/she does not approve or reject team decisions but ensures the team stays within the boundaries of the Scrum framework.

NEW QUESTION 167

Which three statements best describe the purpose of having a Definition of Done? (Choose three.)

- A. It is a checklist to monitor the Development Team member's progress on a task.
- B. It provides guidance to the Development Team when they are forecasting their Sprint Backlog during the Sprint Planning.
- C. As the Development Team is doing the work, it provides guidance on the remaining work needed to create the potentially shippable Increment by the end of the Sprint.
- D. It helps the Development Team defer any pending work to subsequent Sprints.
- E. It creates transparency and provides a common understanding of the 'done' state of the Increment at the Sprint Review.
- F. It helps the Scrum Team decide how much time is needed before the Sprint can end.

Answer: BCE

Explanation:

When a Product Backlog item or an Increment is described as 'Done', everyone must understand what 'Done' means. Scrum Team members must have a shared understanding of what it means for work to be complete, to ensure transparency and is used to assess when work is complete on the product Increment. This Definition of Done provides the team guidance on what it takes to make the increment shippable.

NEW QUESTION 172

Cross-functional teams are specialized for working on specific system components (e.g. design, database, backend, frontend).

- A. True
- B. False

Answer: B

Explanation:

Cross-functional teams have all the skills and competencies needed to deliver end-to-end work.

NEW QUESTION 173

A Scrum Team must have a Product Owner and Scrum Master.

- A. False
- B. A Scrum Master is only necessary when requested or needed.
- C. True
- D. Each must be a full-time member on the Scrum Team.
- E. True
- F. Their participation and availability will impact the outcomes produced by the Scrum Team.
- G. False
- H. If a Product Owner is unavailable, he/she can be replaced by a Business Analyst.

Answer: C

Explanation:

A Product Owner or Scrum Master can be dedicated to one team OR participate as a member on more than one team. How much time they spend with each team will directly impact effectiveness of the team.

NEW QUESTION 176

Scrum has a role called "Project Manager."

- A. True
- B. False

Answer: B

Explanation:

The Scrum Framework only recognizes three roles although others may be needed to help the team build the most valuable product possible.

NEW QUESTION 181

What might be a valid reason for abnormally cancelling a Sprint?

- A. When the Development Team discovers it cannot meet their Sprint commitments.
- B. When the work becomes too difficult for the Development Team.
- C. When the sales department discovers features that add more value than the current work being done.
- D. When the Sprint Goal becomes obsolete.

Answer: D

NEW QUESTION 184

Who should be present to review and adjust the selected Sprint work if the Development Team determines that it will not be able to finish the complete forecast?

- A. The stakeholders and Scrum Master.
- B. The Product Owner and the Development Team.
- C. The Development Team and Project Manager.
- D. The Scrum Master, the Business Analyst and the Development Team.

Answer: B

NEW QUESTION 189

Steven, a Scrum Master, is approached by the Development Team members complaining that one of the senior engineers is using too much time during the Daily Scrums to share technical solutions.

Which are the best two actions for Steven to take? (Choose two.)

- A. Coach the Development Team to help them find a way to solve the problem, and for them to take ownership of the solution.
- B. Contact the team member's direct manager and to resolve this problem.
- C. Suggest that the team members timebox the amount of time each person can speak at the Daily Scrum to a maximum of two minutes.
- D. Suggest using a token to limit who is allowed to speak during the Daily Scrum.
- E. Speak with the person privately and coach him on the purpose of the Daily Scrum.

Answer: AE

Explanation:

The Scrum Master serves the Development Team in several ways, including: Coaching the Development Team in self-organization and cross-functionality; Facilitating Scrum events as requested or needed.

It is the Scrum Master's responsibility to teach the Scrum Team the value and objective of each Scrum event in order to help them maximize the benefits of each event in accordance to the Scrum values and theory.

NEW QUESTION 192

In what two ways is velocity and technical debt related? (Choose two.)

- A. They are not related because technical debt is non-functional and velocity is calculated based on end user functionality.
- B. As the Development Team is working on new Product Backlog items, they may unexpectedly run into technical debt that will result the team's velocity dropping.
- C. A Development Team can artificially increase velocity by allowing technical debt to be incurred.
- D. Adding estimates to technical debt will allow the Development Team to maintain constant velocity therefore ensuring predictability.

Answer: BC

Explanation:

Technical debt is a natural occurrence when developing complex products. It is a concept in software development that reflects the implied cost of additional rework caused by choosing an easy solution now instead of using a better approach that would take longer. And how it is managed will depend on the team AND context of the situation.

NEW QUESTION 194

During Sprint Planning, the Development Team was not able to confidently forecast a Sprint Backlog but the Scrum Team was able to create a Sprint Goal for upcoming Sprint. What action should the Scrum Master take?

- A. Postpone the Sprint in order for the Product Owner to refine the Product Backlog to the level needed.
- B. Extend the Sprint Planning time-box until the Development Team can forecast enough items to begin the Sprint.
- C. Forecast the most likely Product Backlog items to meet the goal and discuss in the upcoming Sprint Retrospective why this happened and what changes will make it less likely to recur.
- D. Request assistance from the technical architect.

Answer: C

NEW QUESTION 196

Which two behaviors would reflect Servant Leadership in a Scrum Master? (Choose two.)

- A. Facilitating Scrum Events as requested or needed.
- B. Coaching the Development Team, the Product Owner and the organization on how to work empirically.
- C. Staying away from internal Development Team interactions, maximizing their autonomy and freedom.
- D. Resolving every impediment for the Development Team.

Answer: AB

Explanation:

The Scrum Master is responsible for serving the team by facilitating and removing impediments to ensure there are minimal roadblocks in the way of the team. The Scrum Master also coaches the Scrum Team and organization to ensure the benefits of Scrum is realized.

"Removing every impediment for the Development Team" may seem like the right thing to do but by doing it this way, the Dev Team's ability to self-organize would be limited. There are some impediments that will depend solely on the Scrum Master and there will be some that require collaboration with the Dev Team. The former might be working with the finance department to renew services that the team is using. The latter might be lack of skills to make a particular item done. The Scrum Master can coach the team on finding different solutions to resolve the issue.

"Removing impediments" is good. "Removing every impediment for the Development Team" is not so good and sometimes not even possible.

NEW QUESTION 197

Steven, a Scrum Master, has been hired by an organization that is new to Scrum. He has been invited to meet the IT and product management team to kick-off the project. During the meeting the Product Owner asks how many Sprints will be needed to address the entire architecture and infrastructure before working on the features for the new product.

What are the two best responses for Steven to explain how such work is handled in Scrum? (Choose two.)

- A. You explain that product management should not worry about technical solution
- B. You inform them that the developers will work with the IT department when needed and keep the Product Owner updated on additional time required for each Sprint
- C. The additional effort will be added to the top of the Sprint Backlog before Sprint Planning.
- D. You explain that it is more effective when architecture and infrastructure emerge alongside the development of business functionalit
- E. The additional advantage is that business value is created more quickly and earlier.
- F. You confirm that architecture and infrastructure is needed before starting on business functionality butthe estimated budget will be difficult to estimat
- G. You suggest that the first Sprint will be dedicated towards building the technical foundation in order to get an accurate estimation for any additional budget and time required.

H. You coach the Product Owner and Development Team to add this work to Product Backlog to ensure transparency, have the Development Team estimate the work and do this in early Sprints while also creating some business functionality in the early Sprints.

Answer: BD

Explanation:

When working on complex problems in complex environments, it is difficult to fully predict all future needs and the best solutions will emerge as the work is being performed.

NEW QUESTION 201

What action can the Scrum Master take to ensure communication between the Development Team and Product Owner is effective?

- A. Ensure all communication goes through the Scrum Master first.
- B. Teach the Product Owner to talk in terms of technology and technical requirements.
- C. Observe the communications between them and facilitate discussions if needed or by request.
- D. Translate the technologies used by the Development Team in order for the Product Owner to make decisions.

Answer: C

Explanation:

One of the primary responsibilities of a Scrum Master is the ability to facilitate regardless of the context or setting.

NEW QUESTION 204

What guideline should the Scrum Master provide if the Product Owner asks how estimations should be made in Scrum?

- A. Estimates must be made in Story Points.
- B. Estimates must be in relative units.
- C. The Development Team is responsible for estimates.
- D. Estimates are made by the Product Owner.
- E. Estimates must follow the Fibonacci Sequence.

Answer: C

Explanation:

The people who will perform the work make the final estimates.

NEW QUESTION 207

The Development Team has suggested to move the Daily Scrum to every other day instead of every day. What is the most appropriate action for the Scrum Master to take?

- A. Learn why the Development Team wants this, coach the team on why the Daily Scrum is important and work with them to improve the outcome of the Daily Scrum.
- B. Support the self-organizing team's decision.
- C. Have the Development Team members vote on which days the Daily Scrum should occur.

Answer: A

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values.

NEW QUESTION 212

What action should a Scrum Master take if the Development Team has decided that Retrospectives are no longer necessary?

- A. Start facilitating more productive and useful Retrospectives.
- B. Suggest reducing the frequency of the Retrospectives.
- C. Extend the Sprint time-box in order to fit the Retrospectives.
- D. Comply with the team's decision.

Answer: A

NEW QUESTION 213

Part of the team's Definition of "Done" requires creating or updating technical documentation in order to maintain the product and/or features in the future. The team's technical writer will be on vacation during the Sprint. What should you do?

- A. Encourage the technical writers from other teams to form a specialized team to organize and plan the work for multiple teams.
- B. The Development Team members will write it as they are still responsible for creating the documentation to make the Increment done in conformance with their Definition of "Done."
- C. Wait until the technical writer returns before continuing with related items.
- D. Complete all development work first while adding technical documentation to the Product Backlog to be done in a subsequent Sprint.

Answer: B

Explanation:

All Product Backlog items selected for the Sprint are owned by the Development Team as a whole. Although individual members may work on specific tasks, the Development Team is still accountable for doing the work to deliver a shippable Increment.

NEW QUESTION 214

Which role is responsible for engaging with stakeholders?

- A. The team lead
- B. The business analyst
- C. The project manager
- D. The Development Team
- E. The Product Owner

Answer: E

NEW QUESTION 216

What is the most appropriate action for the Scrum Master to take if the Product Owner is having difficulties managing the Product Backlog?

- A. Have the Development Team order the work instead of the Product Owner.
- B. Have the Product Owner order the items based on size, having the Development Team work on the smallest items first.
- C. Offer the Product Owner help in understanding that the goal of ordering the Product Backlog is to maximize the flow of value.
- D. Delegate the work to the Assistant Product Owner.
- E. Delay the Sprint in order for the Product Owner to have enough time to prioritize the Product Backlog.

Answer: C

Explanation:

The Product Owner's primary concern is the flow of value reflected in the ordering of the Product Backlog.

NEW QUESTION 217

.....

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

PSM-II Practice Exam Features:

- * PSM-II Questions and Answers Updated Frequently
- * PSM-II Practice Questions Verified by Expert Senior Certified Staff
- * PSM-II Most Realistic Questions that Guarantee you a Pass on Your First Try
- * PSM-II Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
[Order The PSM-II Practice Test Here](#)
