

Microsoft

Exam Questions PL-100

Microsoft Power Platform App Maker

NEW QUESTION 1

- (Exam Topic 1)

You need to meet the requirements for sales representative that submit status reports. How should you configure the flow?

- A. Add a parallel branch that uses the value of a dynamic content variable
- B. Add a number functions action that evaluates the risk value by using a static variable to determine if an email is required
- C. Add a condition that evaluates the risk value by using a dynamic content variable
- D. Add a data operation action that evaluates a dynamic content variable

Answer: C

Explanation:

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received. Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.

NEW QUESTION 2

- (Exam Topic 1)

You need to roll back the mobile app to an earlier version.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Identify the currently published version and view version notes.	<input type="checkbox"/> View the session details page for the app in Power Apps Studio. <input type="checkbox"/> View environment details for the app in the Power Admin portal. <input type="checkbox"/> View details for the app in the Power Apps Maker portal.
Revert to an earlier version of the app.	<input type="checkbox"/> Select Restore on the previous version of the app. <input type="checkbox"/> Export the previous version of the app and import as a new version. <input type="checkbox"/> Delete versions of the app until the desired version is the most recent.

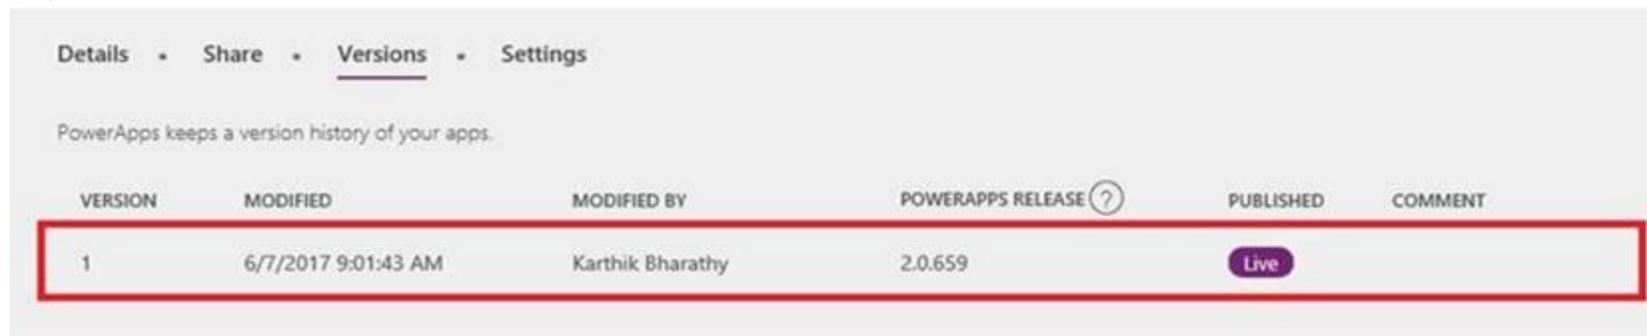

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

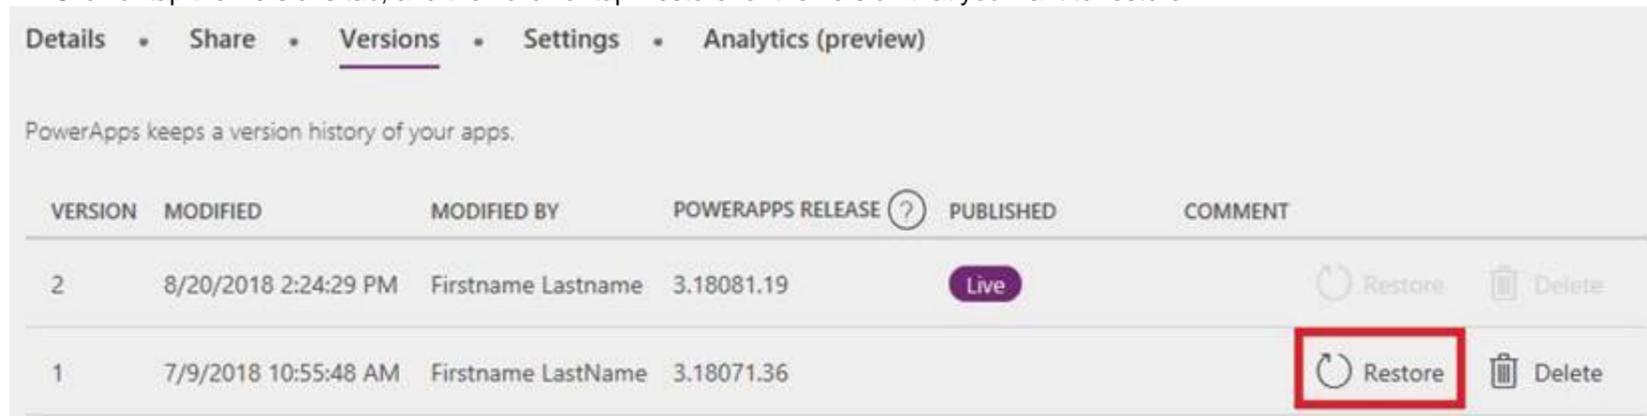

Box 1: View the sessions details page for the app in Power Apps Studio

Use PowerApps Studio, select the App, and choose and you will be directed to the app's Versions tab in PowerApps portal. There should be one version marked Live.

Box 2: Select Restore on the previous version of the app. Restore an app from your account

- > Open powerapps.com, and then click or tap Apps in the left navigation bar.
- > Near the right edge, click or tap the info icon for the app that you want to restore.
- > Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

Reference:

<https://powerapps.microsoft.com/sk-sk/blog/saveandpublish/> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app>

NEW QUESTION 3

- (Exam Topic 1)

You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Property
Provide a visual indicator when the app is offline.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;"> Visible OnSelect DisplayMode Fill </div> </div>
Store data when the app is offline.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;"> OnSelect LoadData SubmitForm Now </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Fill

Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.

Fill – The background color of a control. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 4

- (Exam Topic 2)

You need to connect to the data source for the Job Setup app. What should you do?

- A. Configure a scheduled synchronization with the Common Data Service database
- B. Configure SQL Server database permissions
- C. Create a stored procedure that retrieves time records for a specific employee
- D. Configure an on-premises data gateway

Answer: D

Explanation:

Scenario: The Job Setup entity must store its data in the existing on-premises SQL Server instance.

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, Power Apps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/gateway-reference>

NEW QUESTION 5

- (Exam Topic 2)

You need to implement features for the solution.

Which Power Platform component should you use for each feature? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Feature	Component
Mobile app for Sales Log workbook	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;"> Canvas app Model-driven app Power Virtual Agents chatbot </div> </div>
Embed KPIs for sales quotas by region	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;"> Content Pack Power BI Desktop Power BI service </div> </div>
Transfer of key sales information to the Job Setup entity	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <div style="padding: 2px;"> Power Automate Business process flow Power Virtual Agents </div> </div>

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Model-driven app

The Sales app must meet the following requirements:

- > Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.

Compared to canvas apps, model-driven apps in PowerApps are based on underlying data — specifically, the data stored in Common Data Service (CDS).

Box 2: Power BI Desktop

You can create a KPI in Power BI Desktop.

- > Open your report editor in Power BI Desktop then select a report on which you are working.
- > On your right, you will see a Visualizations pane and a Fields pane.
- > From the Visualizations pane, select the KPI visual.
- > Etc.

Box 3: Power Automate

NEW QUESTION 6

- (Exam Topic 2)

You need to meet the requirement for the time tracking app.

Which controls should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Automatically record the duration of work when a job number is read.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; font-size: small;">▼</div> <div style="padding: 2px;">Card</div> <div style="padding: 2px;">Rating</div> <div style="padding: 2px;">Slider</div> <div style="padding: 2px;">Timer</div> </div>
Read the employee's number into the app.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; font-size: small;">▼</div> <div style="padding: 2px;">Barcode-scanner</div> <div style="padding: 2px;">Card</div> <div style="padding: 2px;">Image</div> <div style="padding: 2px;">Shape</div> </div>
Display a photo of an employee when the employee badge is read.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; font-size: small;">▼</div> <div style="padding: 2px;">Camera</div> <div style="padding: 2px;">Card</div> <div style="padding: 2px;">Icon</div> <div style="padding: 2px;">Image</div> </div>

A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Timer

A Timer control in Power Apps is a control that can determine how your app responds after a certain amount of time passes.

Box 2: Barcode scanner

The Barcode scanner control for canvas apps scans barcodes, QR codes, and data-matrix codes on an Android or iOS device.

Box 3: Image

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source. If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-new-barcode-scanner> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image>

NEW QUESTION 7

- (Exam Topic 2)

You need to modify the entity form to resolve the customer request number issue. What should you do?

- A. Use a calculated field
- B. Change the data type of the customer request number field to Lookup
- C. Change the data type of the customer request number field to Autonumber

Answer: C

Explanation:

Scenario: Users report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number.

Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/autonumber-fields>

NEW QUESTION 8

- (Exam Topic 2)

You need to resolve the user's issue with the time tracking app.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a component to the time tracking screen for tracking total time.
- B. Create a new component inside of the component library for the time tracking app.
- C. Upload the component to AppSource.
- D. Add the Total Time field to the screen and set the value of the field property to Rollup

Answer: AB

Explanation:

Scenario Issue: Users want to be able to see their weekly total time entered from all screens.

A component library provides a centralized and managed repository of components for reusability. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>

NEW QUESTION 9

- (Exam Topic 2)

You need to configure the system to meet the requirements.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Feature	Setting
Create the relationship between the Job Setup and Time Tracking entities.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">1:N</div> <div style="padding: 2px;">N:N</div> <div style="padding: 2px;">Self-referential</div> </div>
Configure ownership for the Time Tracking entity.	<div style="border: 1px solid black; padding: 2px;"> <div style="text-align: right; padding-right: 5px;">▼</div> <div style="padding: 2px;">Business-owned</div> <div style="padding: 2px;">Organization-owned</div> <div style="padding: 2px;">User or Team owned</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: 1:N

Scenario: A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.

Box 2: User or Team owned

Scenario: Employees must only be able to access their own time tracking records from the app.

User or team: Data belongs to a user or a team. Actions that can be performed on these records can be controlled on a user level.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/types-of-entities>

NEW QUESTION 10

- (Exam Topic 3)

A coworker creates a canvas app.

The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(
Toolbox,
{
    Tool: "Hammer",
    Quantity: 1
},
{
    Tool: "Screwdriver",
    Quantity: 2
}
)
```

You are updating the canvas app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	<input type="radio"/>	<input type="radio"/>
A local collection is created to store data if a data source named Toolbox does not already exist.	<input type="radio"/>	<input type="radio"/>
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Records are added, not updated. Box 2: Yes

The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)

DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.

Item(s) - Required. One or more records or tables to add to the data source. Box 3: No

No records are cleared. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-clear-collect-clearcollect>

NEW QUESTION 10

- (Exam Topic 3)

An automobile company uses Power Apps. The company uses a model-driven app to manage customers and repairs.

The Customer table has a custom column of type text named Best time to call. On the Repair form, employees require the Best time to call column to be displayed next to the customer name.

You need to modify the model-driven app to display the Best time to call column. Which two steps should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add The Best time to call column to the quick view Repair form.
- B. Create a quick view form for the Repair table.
- C. Create a quick view form for the Customer table.
- D. Add the Best time to call column to the quick view Customer form.

Answer: CD

NEW QUESTION 13

- (Exam Topic 3)

You are creating a canvas app.

You need to display a limited list of choices to the end user. You must standardize the values and appearance of the list across all forms.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a drop-down field in the app
- B. Create a Global Option Set
- C. Add a new business rule
- D. Add a component to the component library

Answer: AB

Explanation:

A global Option Set can be shared across entities. Reference:

<https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/>

NEW QUESTION 16

- (Exam Topic 3)

You are creating a multi-page canvas app that loads tabular data from an external data source. Once loaded, the data must be available to all screens within the canvas app.

You need to reduce the number of times that the app must retrieve data from the data source. Which two data stores can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. parameter
- B. global variable
- C. collection
- D. environment variable

Answer: CD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-data-sources>

NEW QUESTION 21

- (Exam Topic 3)
 HOTSPOT

A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:

- * Create a model-driven app.
- * Design navigation for the app
- * Show an approval name field on the form if the amount is greater than \$1,000.

Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Create model driven app.	App designer App designer Solution checker App checker
Design app navigation.	Site map Site map Solutions area Table designer
Show approval name field if amount > \$1,000.	Table designer Form designer Table designer Business rule designer

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Activity	Feature
Create model driven app.	App designer App designer Solution checker App checker
Design app navigation.	Site map Site map Solutions area Table designer
Show approval name field if amount > \$1,000.	Table designer Form designer Table designer Business rule designer

NEW QUESTION 26

- (Exam Topic 3)

A company creates a Power Apps app that allows service representatives to record information about on-site client visits. Service representatives perform a one-hour site visit with each client each quarter.

Service representatives use the app to perform the following activities:

- > View their scheduled visits for the day.
- > Record notes from service visits.
- > Schedule service technicians for issues uncovered during site visits.
- > Scan and upload service quote forms to a folder named Service Quote folder on Microsoft OneDrive once the customer has signed a service quote.

Service quotes that are over \$10,000 are automatically sent to the service manager for review and approval. Visits that are not closed at the end of the day are automatically moved to the following day unless it is the last day of the quarter. All client visits not performed for the quarter are escalated to the service manager for follow-up.

You need to create flows to meet the requirements.

Which type of flows should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Type of flow

Move client visits not completed for the day.

	▼
Scheduled flow	
Automated flow	
Adaptive card flow	
Team flow	

Approve service quote.

	▼
Automated flow	
Button flow	
Scheduled flow	
Team flow	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Adaptive card flow

Adaptive Cards are a platform-agnostic method of sharing and displaying blocks of information without the complexity of customizing CSS or HTML to render them.

Directing content to Teams channels:

Post your own adaptive card as the Flow bot to a channel

This action posts an adaptive card as a Flow bot to a specific Teams channel. In this case, you will be prompted for Teams instance, and a channel where the card will be posted. The flow-maker will have to have access to the Teams instance in order to post an adaptive card there. In this case, only URL buttons function by redirecting to the URL configured within the flow.

Box 2: Button flow

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

Reference:

<https://docs.microsoft.com/en-us/power-automate/overview-adaptive-cards> <https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens>

NEW QUESTION 27

- (Exam Topic 3)

You are creating an app for a company. You need to evaluate the default solution.

Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You can change the prefix of the publisher of the default solution
- B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in the publisher
- C. If you create an environment variable in a solution, the variable uses the prefix defined in the publisher
- D. You can change the version number of the default solution

Answer: AC

Explanation:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-y>

NEW QUESTION 28

- (Exam Topic 3)

You are a technical assistant for a legal services organization. The company uses SharePoint to manage documents and Microsoft Dataverse as the data store. The company has strict rules about access, permissions, and privacy.

Lawyers and paralegals use Microsoft Teams for communications and collaboration. Employees use personal devices to access legal files. You do not have access to the admin area in Microsoft Power Platform.

You need to ensure that these rules are observed consistently and managed in one place.

Which type of app should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	App type
Access client billing details	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; padding-bottom: 2px;"> </div> <div style="padding: 2px;">Canvas app in Microsoft Teams</div> <div style="padding: 2px;">Canvas app in SharePoint</div> <div style="padding: 2px;">Model-driven app in SharePoint</div> <div style="padding: 2px;">Model-driven app in Microsoft Teams</div> </div>
Log phone calls and schedule appointments with clients and the team assigned to them	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; padding-bottom: 2px;"> </div> <div style="padding: 2px;">Dynamics 365 App for Outlook</div> <div style="padding: 2px;">Microsoft Teams calendar</div> <div style="padding: 2px;">SharePoint calendar</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Model-driven app in Microsoft Teams

A user's ability to see and use apps is controlled by sharing the application with the user. Sharing of canvas apps is done directly with a user or Azure AD group but is still subject to Dataverse security roles. Sharing of model-driven apps is done via Dataverse security roles.

Box 2: Sharepoint Calendar Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/database-security>

NEW QUESTION 33

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Use a Common Data Service workflow with a PowerQuery on the data entity. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

NEW QUESTION 34

- (Exam Topic 3)

DRAG DROP

A commercial bakery uses an inventory system to track ingredients consumed in their production line. The workers use iPads to interact with the system and reserve the ingredients for the next batch. Data from the system is extracted as a .csv file. You need to create a Power BI report from the extracted data by using only an iPad. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 38

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app. Solution:

- > Add an edit form to Screen_AccountDetail and set the Default Mode of the form to New
- > Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
- > Set the data source of the form to Accounts.
- > Set the Item property of the form to Selected.
- > Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts). Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

FormMode.New: the form is populated with default values and the user can modify the values of the fields. Once complete, the user can add the record to the data source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 41

- (Exam Topic 3)

HOTSPOT

A company is creating an app to manage project status reports.

Users will update a series of controls and click a submit button. The submit button will calculate a risk score for the project and return to the previous screen with that risk score. The risk score will be used in two different forms.

You need to create the formula on the button click. To answer, select the appropriate option in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Action	Formula component
Assign the scope for the variable.	Global variable Collection Context variable Global variable Lookups
Separate the calculate action from the previous screen.	: : .
Go to the next page.	Navigate() Navigate() Revert() NewForm() SetFocus()

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 Answer Area

Action	Formula component
Assign the scope for the variable.	Global variable Collection Context variable Global variable Lookups
Separate the calculate action from the previous screen.	: : .
Go to the next page.	Navigate() Navigate() Revert() NewForm() SetFocus()

NEW QUESTION 43

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The key phrase extraction prebuilt model identifies the main points in a text document. Reference: <https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase>

NEW QUESTION 45

- (Exam Topic 3)

You create a Power Platform solution. Solution data is stored in a variety of documented cloud services. You must also be able to connect to one or more industry data sources.

You need to configure the data sources. What should you do?

- A. Create a business process flow.
- B. Create a data policy template.
- C. Create a UI flow.
- D. Use an existing data connector.

Answer: D

Explanation:

In Power Apps, add a data connection to an existing canvas app or to an app that you're building from scratch. Your app can connect to SharePoint, Common Data Service, Salesforce, OneDrive, or many other data sources.

Note:

Add data source

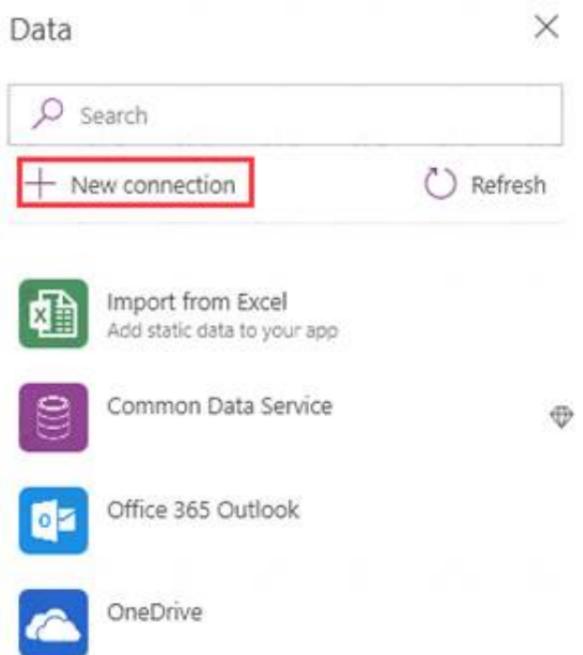

* 1. In the center pane, select connect to data to open the Data pane.

* 2. Select Add data source.

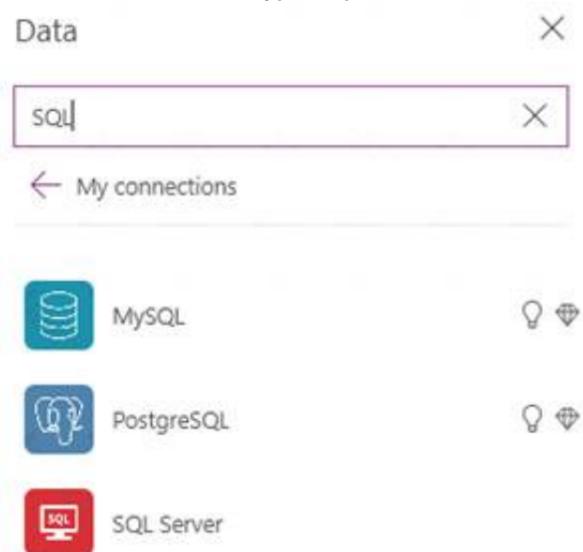

* 3. If the list of connections includes the one that you want, select it to add it to the app. Otherwise, skip to the next step.

* 4. Select New connection to display a list of connections.

* 5. In the search bar, type or paste the first few letters of the connection you want, and then select the connection when it appears.

* 6. Select Create to both create the connection and add it to your app. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-data-connection>

NEW QUESTION 46

- (Exam Topic 3)

A company uses several forms for biannual performance evaluations. The company conducts the evaluations by using a pen and paper process. The evaluations contain several performance areas that have a score of 1-10. A paragraph explains the score.

The company must scan completed performance evaluations into a Common Data Service entity by using a Power Apps app. The information in the documents must automatically map to entities and convert into quantifiable information.

If any key phrases in the scored topics cause concern, the company must follow a series of actions to prepare for a follow up.

You need to extract the information and perform the actions when the evaluations are scanned. Which component should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Component
Convert the evaluations from images to data	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right;">▼</div> <div style="padding: 2px;">AI Builder</div> <div style="padding: 2px;">Power BI</div> <div style="padding: 2px;">Dataflows</div> <div style="padding: 2px;">Business rules</div> </div>
Convert a form processing variable to an integer	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right;">▼</div> <div style="padding: 2px;">Initialize variable</div> <div style="padding: 2px;">Add dynamic content</div> <div style="padding: 2px;">Append to string variable</div> <div style="padding: 2px;">Extract entities and their types from text</div> </div>
Use the flow action to convert a form processing variable to an integer	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right;">▼</div> <div style="padding: 2px;">Scope</div> <div style="padding: 2px;">Do until</div> <div style="padding: 2px;">Condition</div> <div style="padding: 2px;">Apply to each</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, table, email Description automatically generated

Box 1: AI Builder

The object detection component of AI Builder for PowerApps takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Box 2: Extract entities and their types from text

The Entity extraction prebuilt model identifies and classifies key elements from text into pre-defined entities. You can use the prebuilt model out of the box in power apps and power automate.

Box 3: Scope

Scope is a simple way to put similar actions and conditions together like a Stage. Reference:

<https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps> <https://powerapps.microsoft.com/en-us/blog/new-ai-builder-models-are-now-generally-available/>

NEW QUESTION 51

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- > Create an Object Detection custom model in AI Builder.
- > Train the model with pictures of bicycles and then publish the trained model.
- > Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects.

The first thing you'll do when you create an AI Builder object detection model is to define its domain. Upload images

Then Train and publish your object detection model

The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 56

- (Exam Topic 3)

You need to create a model-driven app without using code.

Which tools should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Tool

Select the forms and views that the app will use.

	▼
Site Map designer	
Solution Explorer	
App designer	
Entity view	

Design the navigation for the app.

	▼
Site Map designer	
Dynamics 365 Admin center	
Microsoft Azure DevOps	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: App designer

As an app maker, you can create and edit public views by using Power Apps. Box 2: Site Map designer

Site maps define the navigation for your app. Create a site map for your app with ease by using the tile-based site map designer.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer> <https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-site-map-app>

NEW QUESTION 61

- (Exam Topic 3)

DRAG DROP

A company uses Microsoft Power Platform. All users in the company have read/write and create access to SharePoint.

You create a canvas app that displays data from a SharePoint list. A group of users must use the app without the ability to change the data source.

You need to share the app with the users.

What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions

- Send all users an email invitation.
- Enable Can use permission.
- Set the users as co-owners.
- Enable Can edit permission.

Answer Area

Component	Action
Canvas app	
SharePoint connection	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

- Send all users an email invitation.
- Enable Can use permission.
- Set the users as co-owners.
- Enable Can edit permission.

Answer Area

Component	Action
Canvas app	Send all users an email invitation.
SharePoint connection	Enable Can use permission.

NEW QUESTION 66

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job

candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Create a business rule on the appropriate data entity with a scope of entity. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

NEW QUESTION 69

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

NEW QUESTION 73

- (Exam Topic 3)

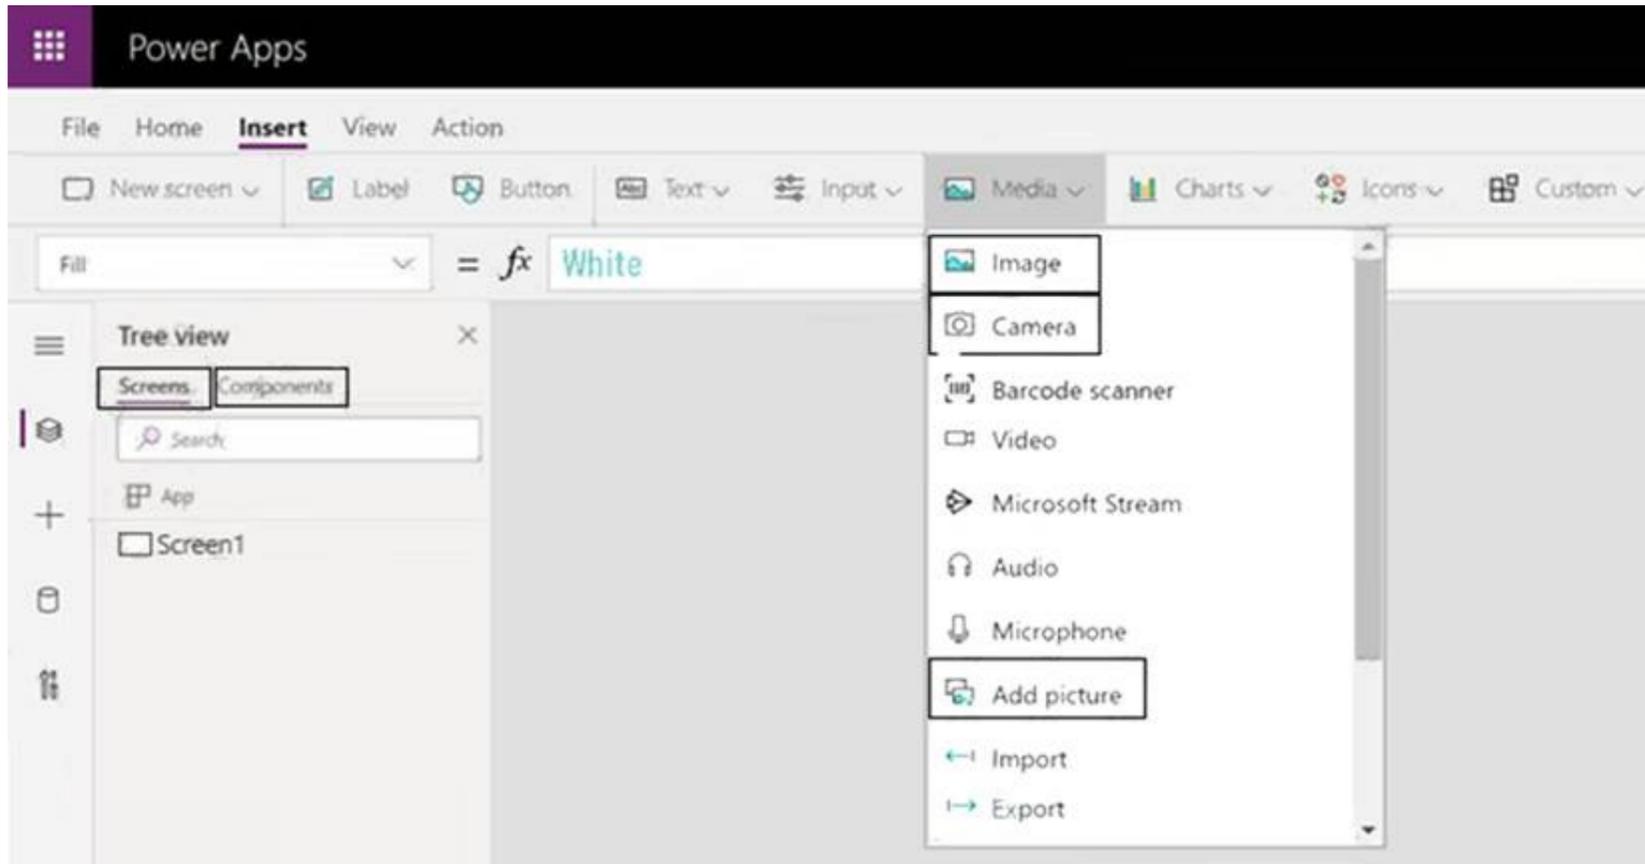

You are developing an app for a package delivery company. Delivery team members will use the app on their phones. Distribution center team members will use a web-based version of the app that runs on tablet devices.

When a delivery person arrives at a location and the package recipient is present, the app must capture the recipient's signature. If the recipient is not available, the app must capture a picture of the drop-off location or the person receiving the package.

You need to design phone-based and web-based versions of the app.

Which app type and media control should you use? To answer, configure the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

App Type: Screens

To insert the Camera control in your PowerApps program you can use the blank screen, and select Insert->Media->Camera.

Media Type: Camera

Use the Camera control to capture pictures with a device's camera. The device must have a camera and the user must authorize the app to use the camera. Tap or select the camera control to capture a picture from the camera.

The most recently captured picture is available through the Photo property. With this property, the images can be:

- > Viewed with the Image control. Use the Image control to view the captured image.
- > Temporarily put in a variable or a collection.
- > Stored in a database.
- > Transmitted as a base64 encoded text string.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-camera>

NEW QUESTION 76

- (Exam Topic 3)

DRAG DROP

You develop Microsoft Power Platform solutions for Contoso, Ltd You create a Power Virtual Agents chatbot in a Microsoft Teams team.

You need to make the chatbot available to all users in your organization.

Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Access the chatbot in the Teams app store in the Built by your colleagues category.
- Publish the chatbot.
- Access the chatbot in the Teams app store in the Built for Contoso category.
- Submit the chatbot for admin approval.

Answer area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 78

- (Exam Topic 3)

A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use. Sales users only want to see information for their own region. Sales users must call sales leads within a week of receiving a lead. You need to recommend a solution for sales users.

Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Instruct users to create personal views that filter by region.
- B. Instruct users to filter the view by region.
- C. Configure the definition for each view to sort by region.
- D. Configure the definition for each view to filter by region.

Answer: BD

NEW QUESTION 79

- (Exam Topic 3)

You design a canvas app that has multiple screens. Each screen will have multiple button controls. The button controls must all have the same background color. You must be able to change the color from one location for all buttons. You need to configure the button fill property. What should you do?

- A. Update the Fill property to a variable created by using the Navigate function.
- B. Update the Fill property to a variable created by using the Set function.
- C. Select all the buttons while holding the Ctrl key, and then change the color property.
- D. Use a background image property in place of setting a color property.

Answer: A

NEW QUESTION 84

- (Exam Topic 3)

You are developing a Power BI report for a company. The Power BI report must display company performance metrics in Power BI service. The report must include three fields in a visualization. The data for the report exists in a dataset.

The company will display the report on a large television screen during team meetings. You need to create the report. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

Box 1: Select a dataset

Sign in to your Power BI online account, or sign up, if you don't have an account yet. Open the Power BI service.

Get some data and open it in report view. Box 2: Create a report

Use that data to create visualizations and save it as a report. Box 3: Add a visualization to the report

Box 4: Add the report to a new dashboard

Visualizations (known as visuals for short) display insights that have been discovered in the data. A Power BI report might have a single page with one visual or it might have pages full of visuals. In the Power BI service, visuals can be pinned from reports to dashboards.

Reference:

<https://docs.microsoft.com/en-us/power-bi/fundamentals/service-get-started> <https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-report-visualizations>

NEW QUESTION 89

- (Exam Topic 3)

You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

- A. Save the app to the cloud.
- B. Create test cases for each requirement.
- C. Save the app to your computer.
- D. Create a test suite.
- E. Record test cases for each requirement.

Answer: D

Explanation:

Create a test suite.

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

NEW QUESTION 94

- (Exam Topic 3)

You have a Power Automate flow that processes files in a Microsoft SharePoint document library. The flow only needs to be run as required. You add steps to the flow to process the files.

Before leaving the office for the day, the manager must initiate the flow. The flow must not start processing files before 11:00 PM.

You need to configure the flow.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a recurrence trigger and configure to run daily at 11 00 PM.
- B. Add a Condition action
- C. If the time greater than 11:00 PM use a Terminate action prevent further processing.
- D. Manually trigger the flow.
- E. Add a Delay Until action and enter the timestamp for 11 00 PM.

Answer: CD

Explanation:

Delay an action until a specific timestamp.

Note: The Microsoft Dataverse connector provides four ways to add wait conditions. Use these wait conditions when you need to delay processing in your flows until a particular condition is met.

- Postpone triggering the flow and the first action until a specific time: Wait condition using Postpone Until.
- Add a fixed delay before the next step.
- Delay an action until a specific timestamp.
- Delay an action until a specific event occurs.

Reference:

<https://docs.microsoft.com/en-us/power-automate/dataverse/wait-conditions>

NEW QUESTION 98

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- Create a Prediction custom model in AI Builder.
- Train the model with pictures of bicycles and then publish the trained model.
- Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model

Note: AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data, and use them to predict future outcomes.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview>

NEW QUESTION 102

- (Exam Topic 3)

In a Common Data Service database, you create a canvas app and a custom entity. The app also reads data from the Account entity in the Common Data Service database.

Entity access permissions will be controlled by the Common Data Service User security role. You create a Common Data Service solution.

You need to replicate the changes to a new Common Data Service database.

Which two components should you include with the canvas app? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Custom entity
- B. Account entity
- C. Common Data Service User security role
- D. Sitemap

Answer: BC

NEW QUESTION 103

- (Exam Topic 3)

You have a solution that contains a Power Automate flow, an environment variable, and a model-driven app.

Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Select the managed solution.
- Adjust the version number.
- Publish all changes.
- Select the unmanaged solution.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Adjust the version number. Step 2: Select the managed solution.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Step 3: Publish all changes. Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

NEW QUESTION 105

- (Exam Topic 3)

A company is building a Power Apps app to track key project tasks.

Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

Task name	Slider input control name
Task1	RiskStatus1 [0-100]
Task2	RiskStatus2 [0-100]
Task3	RiskStatus3 [0-100]

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.

You need to configure a solution to change the text on the header bar.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	<ul style="list-style-type: none"> On the header control. On each RiskStatus slider input. In the global variables of the Power Apps app. On the OnStart property of the Power Apps app.
Which formula should you use?	<ul style="list-style-type: none"> SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)>=150? "HIGH RISK" : "" IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)<150, "", HIGH RISK") Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatus3.value)>=150, "HIGH RISK") UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value>=150), "HIGH RISK")

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated
 Box 1: On each RiskStatus slider input You can change the value based on input. Box 2: Updateif(..)
 Use the Updateif function to modify one or more values in one or more records that match one or more conditions. The condition can be any formula that results in a true or false and can reference columns of the data source by name. The function evaluates the condition for each record and modifies any record for which the result is true.
 Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-formulas#change-a-value-based-> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-update-updateif>

NEW QUESTION 107

- (Exam Topic 3)
 You have a model-driven app that has an entity named Marinas. You have an entity named Boats that list the boats associated with each marina. You must add a list of boats to the Marinas form. You must also add an option for users to select different views including boat owners and marina members. You need to embed the list of boats associated with a Marina record in the entity form. In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add a Subgrid component to a form	
Select Show related records and then select the related entity and default view for the subgrid	➤
Save and publish the form	⬅
Select the Allow users to change view option	⬆
	⬇

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
 Step 1: Add a Subgrid component to a form
 You add a subgrid component the same way as you add any other component.
 Step 2: Select Show related records and then select the related entity and default view for the subgrid Configure a subgrid component. Properties available to configure when using a subgrid component on a form using the form designer include:
 ➤ Show related rows
 When selected, the subgrid displays only rows related to the current row that is displayed on the form.
 Step 3: Select the Allow users to change view option
 Configure a subgrid component. Properties available to configure when using a subgrid component on a form using the form designer include:
 ➤ Allow users to change view
 When selected, app users can change from the Default view to another view of the table selected in the Table property.
 Step 4: Save and publish the form Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/form-designer-add-configure-subgrid>

NEW QUESTION 109

- (Exam Topic 3)

You are creating a canvas app for a company that delivers packages. The app will display one screen for each delivery attempt.

Drivers must make three attempts to deliver a package before returning the package back to a warehouse. Drivers must enter details about delivery on a second screen in the app.

You need to display a list of delivery attempts on the delivery screen.

Which two components can you add to the app to display details about the delivery attempts? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Data table
- B. Vertical gallery
- C. Display form
- D. Drop-down

Answer: AC

Explanation:

The Data table control shows a dataset.

In a canvas app, add and configure a Display form control to show all fields in a record. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-data-table> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-form-layout>

NEW QUESTION 114

- (Exam Topic 3)

A production line app maker at a manufacturing company creates a canvas app that looks for available inventory in a SQL database. The production line workers use the inventory app across all work centers.

The production line workers report the following app issues from the shop floor:

- > The app reports a delegation warning.
- > Voice command functionality is unreliable.

You have minimal information about the issues. You are not allowed to enter the production facility.

You need to troubleshoot the issues.

How should you troubleshoot the issues? To answer, select the appropriate options in the answer area.

Issue	Action
The app reports a delegation warning.	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="padding: 2px;">Use the LookUp function</div> <div style="padding: 2px;">Check the number of items in the collection</div> <div style="padding: 2px;">Check the number of dataset items</div> </div>
Voice command functionality is unreliable.	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="padding: 2px;">Use the App checker/Runtime feature</div> <div style="padding: 2px;">Use the Advanced Tools/Monitor feature</div> <div style="padding: 2px;">Use the App checker/Accessibility feature</div> <div style="padding: 2px;">Use Advanced Tools/Performance feature</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface Description automatically generated

Box 1: Check the number of items in the collection

If the data in your data source exceeds 500 records and a function can't be delegated, Power Apps might not be able to retrieve all of the data, and your app may have wrong results.

Note: Delegation is where the expressiveness of Power Apps formulas meets the need to minimize data moving over the network. In short, Power Apps will delegate the processing of data to the data source, rather than moving the data to the app for processing locally.

Box 2: Use the Advanced Tools/Monitor feature

Monitor is available by default for all canvas apps. Using Monitor, you can trace events as they occur in a canvas app during the authoring experience in Power Apps Studio, or you can use Monitor to debug the published version of a canvas app.

Example: Consider the scenario where an app has been deployed, and the initial version of the app experiences performance degradation. The app also intermittently generates errors with no clear pattern. Loading data in the app succeeds most of the time, but fails sometimes.

When you check Monitor, you see data operations as expected. However, you also see several responses that have HTTP status code 429, indicating that there have been too many requests in a specific timeframe.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/delegation-overview> <https://docs.microsoft.com/en-us/powerapps/maker/monitor-canvasapps>

NEW QUESTION 118

- (Exam Topic 3)

A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

- A. Section
- B. View
- C. Column
- D. Tab

Answer: C

NEW QUESTION 121

- (Exam Topic 3)

You create an app with multiple screens.

Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.

You need to create a reusable gallery that displays information based on the current record. Which three actions should you perform?

NOTE: Each correct selection is worth one point.

- A. Add a gallery control
- B. Add an input property
- C. Create a component
- D. Create a form
- E. Add a screen
- F. Add an output property

Answer: ABC

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-gallery> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component>

NEW QUESTION 124

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs.

The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.

Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/> <https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

NEW QUESTION 127

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Category classification model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

A Category classification model categorizes text by its meaning. Reference:

<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

NEW QUESTION 131

- (Exam Topic 3)

DRAG DROP

A company is migrating to a new Microsoft 365 tenant. You create an expense management canvas app and cloud flow in the old Microsoft 365 tenant.

You need to move the latest version of the canvas app and cloud flow to the new tenant.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 136

- (Exam Topic 3)

A company delivers products to multiple communities. The company creates a canvas app connected to a Common Data Service database. The app tracks communities to see where the delivery volume is the highest. Drivers must enter delivery information on a form that uses an entity named Delivery. Depot staff must enter information on a pick-up form that uses an entity named Pick-up. Each form contains a community field that is based on a shared list across both forms. You need to create the community field. Which type of field should you create?

- A. local option set
- B. text
- C. global option set
- D. text area

Answer: C

Explanation:

Can use a global option set, no need to use localized option sets.

Note: In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it. Reference:

<https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/>

NEW QUESTION 137

- (Exam Topic 3)

DRAG DROP

You are Designing a Power Virtual Agents chatbot in Microsoft Teams. You create an outline to describe how a conversation should be structured. You need to configure the chatbot.

Which chatbot component should you use? To answer, drag the appropriate components to the correct conversation elements. Each component may be used once, more than once, or not at all. You may need to drag the spirit bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 142

- (Exam Topic 3)

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.

You need to insert the custom control into the Power Apps app.

Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Answer Area						
<div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid gray; padding: 5px; width: 100px; text-align: center;">Display</div> <div style="border: 1px solid gray; padding: 5px; width: 100px; text-align: center;">Screens</div> </div> <div style="border: 1px solid gray; padding: 5px; width: 100px; margin-top: 10px; text-align: center;">Components</div>	<table border="1"> <thead> <tr> <th>Action</th> <th>Location</th> </tr> </thead> <tbody> <tr> <td>Import a custom control from a file.</td> <td><div style="border: 1px solid gray; height: 20px; width: 100%;"></div></td> </tr> <tr> <td>Add an alignment to the custom control to display it in the middle of the Power Apps app screen.</td> <td><div style="border: 1px solid gray; height: 20px; width: 100%;"></div></td> </tr> </tbody> </table>	Action	Location	Import a custom control from a file.	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>	Add an alignment to the custom control to display it in the middle of the Power Apps app screen.	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>
Action	Location						
Import a custom control from a file.	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>						
Add an alignment to the custom control to display it in the middle of the Power Apps app screen.	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>						

- A. Mastered
- B. Not Mastered

Answer: A

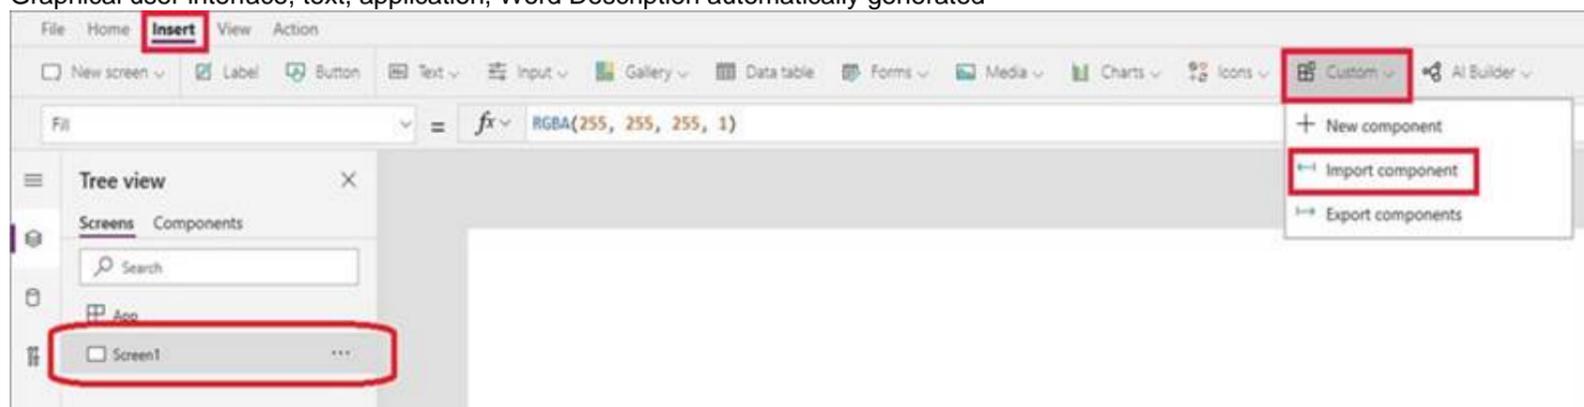

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Components

- * 1. To add code components to a canvas app:
- * 2. Navigate to Power Apps Studio.
- * 3. Create a new canvas app or edit an existing app to which you want to add the code component.
- * 4. Go to Insert > Custom > Import component.

NEW QUESTION 153

- (Exam Topic 3)

You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app.

Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tools
Business rule	Guide a user through the set of steps needed for onboarding a new employee.	<input type="text"/>
Power Automate	Make date of birth mandatory when creating a new employee record.	<input type="text"/>
Business process flow	Implement an approval flow for expense reports submitted by employees.	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Business process flow

A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.

Box 2: Business rule Box 3: Power Automate

A Power Automate flow does not have any visual components like a business process flow. Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/intro-business-process-flows/2-differences>

NEW QUESTION 156

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.

Solution:

- > Add a display form to Screen_AccountDetail.
- > Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
- > Set the data source of the form to Accounts.
- > Set the Item property of the form to Selected.
- > Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts). Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

If you add a Display form control, the user can display all fields of a record or only the fields that you specify. Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail>

NEW QUESTION 160

- (Exam Topic 3)

You store data about products in two Microsoft Excel worksheets. The data contains duplicate rows.

You need to consolidate data from the two worksheets into a Microsoft Dataverse custom table.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
<div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 5px;">Upload the worksheets to OneDrive</div>	
<div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 5px;">Add conditional columns to perform checks on the data</div>	
<div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 5px;">Create queries for the worksheets</div>	>
<div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 5px;">Append the output from the queries</div>	<
<div style="border: 1px solid #ccc; padding: 5px; margin-bottom: 5px;">Create a dataflow</div>	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Step 1: Upload the worksheets to OneDrive

A data source needs to be specified. The data needs to be available. Step 2: Create a dataflow

Step 3: Create queries for the worksheets

You can shape your data selection into a form that works best for your table using a Power Query editing experience, similar to the Power Query Editor in Power BI Desktop.

Step 4: Add conditional columns to perform checks on the data Step 5: Append the output of the queries

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-and-use-dataflows> <https://docs.microsoft.com/en-us/power-query/dataflows/add-data-power-query>

NEW QUESTION 164

- (Exam Topic 3)

HOTSPOT

Users in your company vote on color choices for marketing materials by using the following canvas app:

Enter new color:

Marine blue

Add color

Color Options

Sky blue

Dark blue

Marine blue

Clear Selection

Users enter color names into a text control and then select Add color to add the color to the Color options radio control. You must remove all the listed colors when a user selects Clear Selection

You need to implement the functionality.

Which Power Fx formulas should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Action	Power Fx formula
User selects Add color .	<pre>If(txtColor.Value <> "", Collect(ColorList, txtColor.Value)) If(txtColor.Value <> "", Collect(ColorList, txtColor.Value)) If(Value(txtColor.Text) <> "", Collect(ColorList, txtColor.Text)) If(Value(txtColor.Color) <> "", Collect(ColorList, txtColor.Color))</pre>
User selects Clear Selection	<pre>Revert(radioselector); ClearCollect(ColorList, txtColor.Value) Reset(radioselector); Clear(ColorList) Reset(radioselector); Refresh(ColorList) Revert(radioselector); Remove(ColorList) Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</pre>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Power Fx formula
User selects Add color .	<pre>If(txtColor.Value <> "", Collect(ColorList, txtColor.Value)) If(txtColor.Value <> "", Collect(ColorList, txtColor.Value)) If(Value(txtColor.Text) <> "", Collect(ColorList, txtColor.Text)) If(Value(txtColor.Color) <> "", Collect(ColorList, txtColor.Color))</pre>
User selects Clear Selection	<pre>Revert(radioselector); ClearCollect(ColorList, txtColor.Value) Reset(radioselector); Clear(ColorList) Reset(radioselector); Refresh(ColorList) Revert(radioselector); Remove(ColorList) Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</pre>

NEW QUESTION 167

- (Exam Topic 3)

You are creating entities in a Common Data Service database to capture sales data. You create an entity named Sales that includes the following fields:

Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson.

You need to configure the fields for the entities.

Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Field types	Answer Area	
	Field name	Field type
Rollup	GrossAmount	Field type
Calculated	DiscountAmount	Field type
Simple	TotalSales	Field type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Calculated

Calculated columns are calculated in real-time when they are retrieved. Calculated columns can be composed using different data types. For example, an Integer calculated column may reference values from Decimal or Currency columns.

Box 2: Simple

A simple column isn't defined as a calculated or rollup column. Box 3: Rollup

Because rollup columns persist in the database, they can be used for filtering or sorting just like regular columns.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

NEW QUESTION 168

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Create a custom action that has defined dataflows.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

NEW QUESTION 170

- (Exam Topic 3)

A company uses a model-driven app. You create a Power BI sales report.

The executive of the company wants all users to see tiles from the report in the model-driven app. You need to ensure all users can see the tiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Step	Setting
Allow addition of Power BI visualization tiles.	<div style="border: 1px solid gray; padding: 5px;"> <div style="border-bottom: 1px solid gray; padding-bottom: 2px;">▼</div> <div style="padding: 2px;">Power Platform Environment settings</div> <div style="padding: 2px;">Power Apps settings</div> <div style="padding: 2px;">Power BI Service settings</div> <div style="padding: 2px;">Power BI Desktop settings</div> </div>
Add tiles to a dashboard.	<div style="border: 1px solid gray; padding: 5px;"> <div style="border-bottom: 1px solid gray; padding-bottom: 2px;">▼</div> <div style="padding: 2px;">Create a personal dashboard</div> <div style="padding: 2px;">Create a Power BI dashboard.</div> <div style="padding: 2px;">Create a system dashboard.</div> </div>
Allow users to view tiles.	<div style="border: 1px solid gray; padding: 5px;"> <div style="border-bottom: 1px solid gray; padding-bottom: 2px;">▼</div> <div style="padding: 2px;">Share tile and share dashboard.</div> <div style="padding: 2px;">Share report and share dashboard.</div> <div style="padding: 2px;">Share tile and publish dashboard.</div> <div style="padding: 2px;">Share report and publish dashboard.</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated

Box 1: Power Platform Environment settings

Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Features.
- > Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.
- > Select Save.

Box 2: Create a personal dashboard

You can embed Power BI tiles on your personal dashboard.

- > Open your app and go to Dashboards.
- > Select an existing personal dashboard or select New to create one.
- > On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.
- > Add new Power BI tile.
- > In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.
- > Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.
- > Select Save to save your dashboard.

Box 3: Share report and share dashboard.

To share your personal dashboard that contains Power BI visualizations you must configure sharing in both Dataverse and Power BI, and the user or group must have the same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/use-power-bi#embed--visualizations-on-personal-dashb>

NEW QUESTION 172

- (Exam Topic 3)

You are creating a capacity planning dashboard with Power BI desktop.

The dashboard must be able to be used within a model-driven manufacturing planning app as well as be embedded within a Microsoft Teams channel.

The data sources are as follows:

Type of data	Data source
Sales log that show pending sales by product	Microsoft Excel workbook
Work estimates, cost estimates, and start and ending dates for each job activity by employee	Common Data Service entity
Actual work values and associated costs of work to date by job activity and employee	On-premises Microsoft SQL Server-based ERP system
Employee information	On-premises Microsoft SQL Server-based ERP system

You need to determine the appropriate method for accomplishing each task.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task	Method
Connect to the ERP system.	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; display: flex; justify-content: flex-end; align-items: center;">▼</div> <div style="padding: 5px;"> <p>Use a Data Gateway</p> <p>Use a Custom Connector</p> <p>Use a Service Content Pack</p> </div> </div>
Create the relationship between the employee file and the work estimates.	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; display: flex; justify-content: flex-end; align-items: center;">▼</div> <div style="padding: 5px;"> <p>Create a composite model</p> <p>Create an aggregated table</p> <p>Create entity relationships in the CDS Solution Explorer</p> </div> </div>
Create calculations for work remaining, remaining budget.	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; display: flex; justify-content: flex-end; align-items: center;">▼</div> <div style="padding: 5px;"> <p>Create a Data Analysis Expressions formula</p> <p>Create an aggregated table</p> <p>Create a modeling view</p> </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A picture containing graphical user interface Description automatically generated

Box 1: Use a Date Gateway

You can install an on-premises data gateway on the same local computer as SQL Server (in production, it would typically be a different computer).

Box 2: Create an entity relationship in CDS Solution Explorer You can create relationships with CDS Solution Explorer. Box 3: Create an aggregate table

Rollup columns help users obtain insights into data by monitoring key business metrics. A rollup column contains an aggregate value computed over the rows related to a specified row. This includes regular tables and activity tables such as emails and appointments.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-sql-tutorial> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/define-rollup-fields>

NEW QUESTION 174

- (Exam Topic 3)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.

You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct requirements. Each object may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
Entity	Reuse the custom control for multiple canvas apps.	
Component		
Component library	Receive input data through a custom property.	
Component framework		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Component library

Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.

By creating a component library, app makers easily share and update one or more components with other makers.

Component libraries are containers of component definitions that make it easy to: Discover and search components.

Publish updates.

Notify app makers of available component updates. Box 2: Component

A component can receive input values and emit data if you create one or more custom properties. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component>

NEW QUESTION 177

- (Exam Topic 3)

The company is adding a multi-stream interactive dashboard to a model-driven app.

The company requires configuration of the dashboard to filter the table data based on modified accounts over the last month.

You need to configure the filters for the model-driven app dashboard.

Which configuration should you use? To answer, drag the appropriate locations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configurations	Answer Area	
	Requirement	Configuration
Filter by	Configure visual filter attributes that the dashboard can use.	
Table view		
Filter table	Configure the field that the dashboard uses to filter the table data monthly.	
Time frame		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Filter table

Filter Table: The visual filters and global filter attributes are based on this table. Box 2: Filter By

Filter By: The column that the time frame filter applies to. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/configure-interactive-experience-dashbo>

NEW QUESTION 180

- (Exam Topic 3)

You are designing a canvas app.

You need to select user interface controls to include in the app.

Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Controls	Requirement	Control
List box	Allow users to select multiple items in a list.	<input type="text"/>
Radio	Allow users to select multiple items from a list of options by typing in a phrase.	<input type="text"/>
Combo box		
Drop-down list		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: List box

A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).

Box 2: Combo box

A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not affected by large data sources.

Single or multi-select mode is configured via the SelectMultiple property.

When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

Reference:

NEW QUESTION 182

- (Exam Topic 3)

You create a canvas app that uses the following resources:

- Power Automate cloud flow
- Custom connector
- Microsoft Dataverse customization
- Connection

You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

- A. Custom connector
- B. Connection
- C. Microsoft Dataverse customization
- D. Power Automate cloud flow

Answer: D

NEW QUESTION 184

- (Exam Topic 3)

A company is building a Power Apps app to track key project tasks.

Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.

For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.
 How should you configure the app? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Question	Response
Where do you enter the formula to change the button color?	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; padding-bottom: 5px;">On the RiskStatus slider.</div> <div style="border-bottom: 1px solid black; padding-bottom: 5px;">On the RiskLevel button.</div> <div style="border-bottom: 1px solid black; padding-bottom: 5px;">In the variables of the Power Apps app.</div> <div style="padding-bottom: 5px;">On the OnStart property of the Power Apps app.</div> </div>
Which formula should you use?	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; padding-bottom: 5px;">If (RiskStatus.Value > 75) (return Red;)</div> <div style="border-bottom: 1px solid black; padding-bottom: 5px;">If (RiskStatus.Value > 75, Red, Green)</div> <div style="border-bottom: 1px solid black; padding-bottom: 5px;">If (RiskStatus.Value > 75 ? Red : Green)</div> <div style="padding-bottom: 5px;">RiskLevel.Fill = RiskStatus.Value > 75 ? Red : Green;</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated
 Box 1: On the RiskLevel button.
 On the RiskLevel button fill property.
 Box 2: Risklevel.Fill = RiskStatus.Value > 75 ? Red : Green;
 Most every type of control in a Power App, has a Fill property, for the fill color. Reference:
<https://wonderlaura.com/2020/07/23/power-apps-gallery-conditional-formatting/>

NEW QUESTION 188

- (Exam Topic 3)

You complete work on a new canvas app in a development environment and add the app to a solution. You export the solution from the development environment and import the solution into a production environment.

After several days you notice that the background color for the canvas app in the production environment has changed from white to grey.

You need to determine why the background color changed.

What are two possible causes for the background color change? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You recently changed the Office 365 theme.
- B. You exported a managed copy of the solution and imported the solution as an unmanaged solution.
- C. You modified the canvas app in the unmanaged solution.
- D. You exported and imported an unmanaged copy of the solution and a co-worker modified the canvas app.
- E. You chose a different theme from the Theme menu inside the canvas app.

Answer: AC

Explanation:

A: You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system.
 C: Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution. You also have the ability to create restrictions on the components within the solution.
 Note: Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited.
 Reference:
<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685> <https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-themes-organization-branding>

NEW QUESTION 189

- (Exam Topic 3)

You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security.

Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. cr7b_accountid

Answer: D

Explanation:

Which fields can be secured?
 Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples

of attributes that can't be enabled for field security. ownerid, processid, stageid, accountid, contactid
 createdby, modifiedby, OwingTeam, OwingUser
 createdon, EntityImage_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode
 Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

NEW QUESTION 190

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- > Create a Category Classification custom model in AI Builder.
- > Train the model with pictures of bicycles and then publish the trained model.
- > Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 194

- (Exam Topic 3)

A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees.

You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data.

You need to connect the chatbot to the Dataverse table. What should you use?

- A. Table
- B. Power Apps
- C. Microsoft Teams
- D. Power Virtual Agents
- E. Power Automate

Answer: C

Explanation:

Dataverse for Teams is the "lite" version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.

Reference:

<https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/>

<https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-acti>

NEW QUESTION 197

- (Exam Topic 3)

You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.

You need to pick the appropriate solution type for each requirement.

Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution types	Requirement	Solution type
Managed	Edit existing components of the solution.	Solution type
Unmanaged	Add new components to the solution.	Solution type
	Export the solution.	Solution type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Unmanaged

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any

of the components of the solution.

Box 2: Unmanaged

Box 3: Managed

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

NEW QUESTION 199

- (Exam Topic 3)

You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field. You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add TeamA to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to Yes .	
Add TeamB to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to No .	
Enable field-level security for the field.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Enable field security for the field

Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes.

Step 3: Add TeamA to the field security profile.

Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

- > Enable field security on one or more fields for a given entity.
- > Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

NEW QUESTION 201

- (Exam Topic 3)

You are creating a Power Automate flow.

You have an array that contains items with different color attributes. You plan to filter the array by using the following filter expression within the flow: @or(equals(item()['color'], 'red'),contains(item()['color'],'blue')) The filter returns results only when the expression resolves to true.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The filter expression yields a result if the array contains the color orange	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color red	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color sky blue	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence

Box 1: No

Box 2: Yes

The item color must be red, or item color contains blue.

Box 3: Yes

NEW QUESTION 203

- (Exam Topic 3)

You create a model-driven app for a company. The app will be used to manage events that the company organizes.

The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.

All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.

You need to configure the MarketingTeam and OtherEmployees security roles.

Which three actions should you perform? Each correct selection presents a part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
- B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
- C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
- D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
- E. Set the access level for the MarketingTeam security role to None Selected for the Create and Write permission.
- F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 204

- (Exam Topic 3)

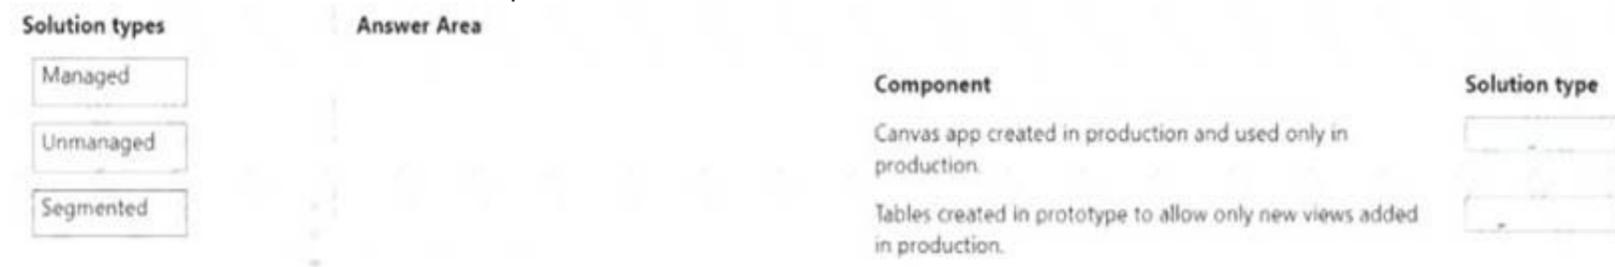

DRAG DROP

A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments.

You need to package the components you create.

Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 209

- (Exam Topic 3)

A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.

A Power Automate flow monitors social media channels to identify high-impact trends.

When the Power Automate flow identifies the trends, consistently formatted and standardized feedback must be collected from the channel members within Teams.

You need to streamline the Power Automate and Teams communication process. What should you use?

- A. AI Builder
- B. Common Data Service business process flows
- C. Adaptive cards
- D. Integrated approval flows

Answer: A

Explanation:

"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid

app delivery."

Jim Parker: Web and Collaboration Services Manager Reference:

<https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform>

NEW QUESTION 212

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Create a Power Automate flow with conditions that use entered data as default data. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

NEW QUESTION 216

- (Exam Topic 3)

You are creating a canvas app. You plan to use variables that are scoped to a screen to store values. You need to create and update the value of the variables.

Which three functions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Collect
- B. Patch
- C. Navigate
- D. Set
- E. UpdateContext

Answer: BCE

Explanation:

B: Use the Patch function to modify records in complex situations. Such as, when you do updates that require no user interaction or use forms that span multiple screens.

CE: Context variables are scoped for Screen. They are great for passing values to a screen, much like parameters to a procedure in other languages. Can be referenced from only one screen.

Functions available for context variables: UpdateContext

Navigate Note:

Use the UpdateContext function to create a context variable, which temporarily holds a piece of information, such as the number of times the user has selected a button or the result of a data operation.

Context variables are also preserved when a user navigates between screens. You can use Navigate to set one or more context variables for the screen that the formula will display, which is the only way to set a context variable from outside the screen.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-patch> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-updatecontext>

NEW QUESTION 220

- (Exam Topic 3)

You create a canvas app.

A user is not able to determine which field currently has focus. You run App checker to identify errors. You need to verify that the focused border thickness is set to

a value greater than zero.
 Which section of the App checker results should you check?

- A. Rules
- B. Performance
- C. Accessibility
- D. Runtime

Answer: C

Explanation:

The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity. Issues include:

> Focus isn't showing

When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 224

- (Exam Topic 3)

You are an app maker. You are creating a canvas app. You do not have access to Power BI. You need to add charts to the app.

Which three chart types can you add directly to the canvas app? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. pie
- B. area
- C. funnel
- D. column
- E. line

Answer: ADE

Explanation:

You can use line charts, pie charts, and bar charts to display your data in a canvas app. Add a bar chart to display your data:

* 1. On the Home tab, add a screen.

* 2. On the Insert tab, select Charts, and then select Column Chart. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/use-line-pie-bar-chart>

NEW QUESTION 226

- (Exam Topic 3)

DRAG DROP

A company uses Power Apps. The company has a SharePoint list that contains the names of partner organizations and the country/region of the partners. The company requires a canvas app that has a gallery screen to display the information in the SharePoint list. Users must be able to:

* Return results for the exact word that was searched.

* View the latest records at the top of the gallery.

* Use a dropdown control to list the countries/regions of the partners. The list must display each country/region only once.

You need to create the gallery screen in a canvas app.

Which functions should you use? To answer, drag the appropriate functions to the correct activities. Each function may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Functions	Answer Area	Activity	Function
Match		Return results for the exact word that was searched.	
Sort		View latest entry at the top	
Distinct		Display duplicate countries/regions only once.	
IsMatch			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Functions	Answer Area	Activity	Function
Match		Return results for the exact word that was searched.	Match
Sort		View latest entry at the top	Sort
Distinct		Display duplicate countries/regions only once.	Distinct
IsMatch			

NEW QUESTION 228

- (Exam Topic 3)

You are designing a canvas app that will be used by all users including users who have vision impairments. Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions.

Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Outcomes	Action	Outcome
Not visible to any users	Set the values for the X and Y properties of a control to move the control off-screen. Set the Color and other related properties of a control to transparent. Set the Height and Width properties of a control to 1.	Outcome
Visible to sighted users only		Outcome
Visible to screen-reader users only		Outcome
Visible to both sighted and screen-reader users		Outcome

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps>

NEW QUESTION 232

- (Exam Topic 3)

A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list. You are not able to activate the flow. You need to troubleshoot the issue.

What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You are not assigned the Power Platform Admin role.
- B. You placed all connectors into the Business group within the DLP policy.
- C. You placed all connectors into the Non-Business group within the DLP policy.
- D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:

Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

NEW QUESTION 237

- (Exam Topic 3)

A company uses Microsoft platforms for all accessibility, compliance, and security auditing.

The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until it conforms to Microsoft accessibility requirements and recommendations.

You need to identify all accessibility issues for a solution. What should you use?

- A. Microsoft Accessibility Conformance Reports
- B. Microsoft Compliance Center
- C. Power Apps Studio
- D. Microsoft Accessibility Guides
- E. Microsoft Visual Studio

Answer: C

Explanation:

- > Find accessibility issues
- > In the upper-right corner of Power Apps Studio, select the icon for the App checker.
- > App checker icon.
- > In the menu that appears, select Accessibility.
- > A list of issues appears, sorted first by severity and then by screen.
- > Select the arrow next to an item to show details about it.
- > Accessibility checker details.
- > Select the back arrow to return to the list of items.
- > If you decide to address an issue, select it to open the affected property.
- > After you change one or more properties, select Re-check to update the list of issues. Resolved items disappear from the list, and new items may appear.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker> <https://support.microsoft.com/en-us/accessibility/enterprise-answer-desk>

NEW QUESTION 238

- (Exam Topic 3)

A company is onboarding new workers to the Microsoft Power Platform.

A user reports an access issue with a Power Apps app. The user provides no additional information about the access issue.

You need to troubleshoot the app and data security configurations for the user. Which tool should you use?

- A. Azure AD Security review
- B. User information page

- C. Accessibility checker
- D. Run diagnostics

Answer: D

Explanation:

User access diagnostic tool in the Power Platform admin center:

Several factors influence user access in a Microsoft Dataverse environment. To help administrators with diagnosing user access to an environment and reasons for access or no access, the new "Run diagnostics" feature in the Power Platform admin center provides basic access diagnostics for individual users in the environment. The feature helps to detect potential causes to user sign-in and other issues and suggests potential mitigations.

Read on Personal Document Template

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to ensure that User1 can see the pre-configured example templates.
 Which permission should you change?

You need to ensure that User1 can download the file to create an Excel template.
 Which permission should you change?

NEW QUESTION 242

- (Exam Topic 3)

Engineers in an organization plan to attend an international product show.

The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.

You need to provide a button flow to streamline the process.

Which two AI Builder models should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Language detection
- B. Sentiment analysis
- C. Category classification
- D. Business card reader
- E. Form processing

Answer: DE

Explanation:

International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return "en" instead of "en-US". The response for languages that can't be detected is unknown.

Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection> <https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps>

NEW QUESTION 243

- (Exam Topic 3)

DRAG DROP

A company is creating Power Apps apps for their customer service team.

You must create a final released solution to export to their test environment that cannot be changed in the new environment.

You need to determine the types of solutions to use.

Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution type	Condition	Solution type
Managed	Assign a publisher for the first time	Solution type
Unmanaged	Export the solution	Solution type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: Unmanaged

Unmanaged solutions are used in development environments while you make changes to your application. Box 2: Managed

Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 245

- (Exam Topic 3)

You use a Microsoft SharePoint list to record information about customers.

You must perform a series of actions only when a new item is added to a SharePoint list. You need to configure a Power Automate flow.

Which trigger should you use?

- A. When an item is created
- B. When an item is created or modified
- C. When a file is created (properties only)
- D. For a selected item

Answer: A

Explanation:

Trigger - When an item is created Triggers when an item is created.

MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.
