

Microsoft

Exam Questions MD-101

Managing Modern Desktops (beta)

NEW QUESTION 1

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	iOS

You plan to enroll the devices in Microsoft Intune.

How often will the compliance policy check-ins run after each device is enrolled in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device1:

Every 15 minutes for one hour, and then every eight hours

Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Device2:

Every 15 minutes for one hour, and then every eight hours

Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Every three minutes for 15 minutes, then every 15 minutes for two hours, and then around every eight hours

If devices recently enroll, then the compliance, non-compliance, and configuration check-in runs more frequently. The check-ins are estimated at:

Windows 10: Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Graphical user interface, text, application, email Description automatically generated

Platform	Frequency
iOS/iPadOS	Every 15 minutes for 1 hour, and then around every 8 hours
macOS	Every 15 minutes for 1 hour, and then around every 8 hours
Android	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 10/11 PCs enrolled as devices	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 8.1	Every 5 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Box 2: Every 15 minutes for one hour, and then every eight hours iOS/iPadOS: Every 15 minutes for 1 hour, and then around every 8 hours

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

NEW QUESTION 2

- (Exam Topic 4)

Your company has computers that run Windows 8.1, Windows 10, or macOS. The company uses Microsoft Intune to manage the computers.

You need to create an Intune profile to configure Windows Hello for Business on the computers that support it.

Which platform type and profile type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Platform type:

macOS

Windows 10 and later

Windows 8.1 and later

Profile type:

Device restrictions

Device restrictions (Windows 10 Team)

Endpoint protection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-configure>

NEW QUESTION 3

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

Existing on-premises computers are managed by using Microsoft System Center Configuration Manager (Current Branch). You configure contoso.com for co-management.

You deploy 100 new devices that run Windows 10. The devices are joined to Azure AD and enrolled in Microsoft Intune.

You need to ensure that the devices are co-managed. What should you create in Intune first?

- A. a conditional access policy
- B. a device compliance policy
- C. an app for the Configuration Manager client
- D. a device configuration profile
- E. an app configuration policy

Answer: C

Explanation:

For new internet-based devices, you need to create an app in Intune. Deploy this app to Windows 10 devices that aren't already Configuration Manager clients.

This scenario is when you have new Windows 10 devices that join Azure AD and automatically enroll to Intune. You install the Configuration Manager client to reach a co-management state.

References:

<https://docs.microsoft.com/en-us/configmgr/comanage/how-to-prepare-win10>

NEW QUESTION 4

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains a user named User1. User1 has the device shown in the following table.

Name	Operating system	Version	Join type	Mobile device management (MDM)
Device1	Windows	10.0.18362.0	Azure AD registered	None
Device2	Windows	10.0.18362.30	Azure AD registered	Microsoft Intune
Device3	Windows	10.0.18362.0	Azure AD joined	None
Device4	Windows	10.0.18362.30	Azure AD joined	Microsoft Intune

Enterprise State Roaming is configured for User1. User1 signs in to Device4 and changes the desktop.

You need to identify on which devices User1 will have a changed desktop. Which devices should you identify?

- A. Device1, Device2, Device3, and Device4
- B. Device4 only
- C. Device2, Device3, and Device4 only
- D. Device2 and Device4 only
- E. Device3 and Device4 only

Answer: A

Explanation:

The requirements of Enterprise State Roaming are:

- Windows 10, with the latest updates, and a minimum Version 1511 (OS Build 10586 or later) is installed on the device.
- The device is Azure AD joined or hybrid Azure AD joined.
- Ensure that Enterprise State Roaming is enabled for the tenant in Azure AD.
- The user is assigned an Azure Active Directory Premium license.
- The device must be restarted and the user must sign in again to access Enterprise State Roaming features.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-troubleshooting>

NEW QUESTION 5

- (Exam Topic 4)

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices. You need to enable Enhanced jailbreak detection.

What should you configure?

- A. the device compliance policy
- B. the Compliance policy settings
- C. a network location
- D. a configuration profile

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 6

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort. What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.
- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

Answer: D

Explanation:

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

NEW QUESTION 7

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to enroll devices in Microsoft Endpoint Manager that have the platforms and versions shown in the following table.

Platform	Version
Android	8, 9
iOS	11, 12

You need to configure device enrollment to meet the following requirements:

- Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager.
- Ensure that devices are added to Microsoft Azure Active Directory (Azure AD) groups based on a selection made by users during the enrollment.

Which device enrollment setting should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager:

Android enrollment

Apple enrollment

Corporate device identifiers

Device categories

Enrollment restrictions

Windows enrollment

Ensure that devices are added to Azure AD groups based on a selection made by users during enrollment:

Android enrollment

Apple enrollment

Corporate device identifiers

Device categories

Enrollment restrictions

Windows enrollment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set> <https://docs.microsoft.com/en-us/mem/intune/enrollment/device-group-mapping>

NEW QUESTION 8

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com.

You create a provisioning package named Package1 as shown in the following exhibit.

Steps	Summary
Set up device	Set up device Enter device name: Comp%RAND:1% Share devices: No Remove pre-installed software: No
Set up network	Network settings Network: Wired
Account management	Account management Domain name: Contoso.com Domain user name: contoso\administrator Domain user password: *****
Add applications	Add applications
Add certificates	Add certificates
Finish	Protect your package Protect the content of your package by specifying a password. The password length must be 8-16 characters.

☐ No

What is the maximum number of devices on which you can run Package1 successfully?

- A. 1
- B. 10
- C. 25
- D. unlimited

Answer: D

NEW QUESTION 9

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to create a Conditional Access policy to block users that have a high sign-in risk level.

You need to identify the required license, and what to use to identify the sign-in risk level. The solution must minimize costs.

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

License:

Azure Active Directory Premium Plan 1
Azure Active Directory Premium Plan 2
Microsoft Office 365 E3

Use:

Azure AD Identity Protection
Security defaults
Verifiable credentials

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Azure AD Premium Plan 2

You will need an Azure AD Premium P1 license to get access to the Microsoft Office 365 conditional access policy feature.

However, need Azure AD Premium Plan 2 to sign-in risk. Box 2: Azure AD Identity Protection

A sign-in risk represents the probability that a given authentication request isn't authorized by the identity owner. Organizations with Azure AD Premium P2 licenses can create Conditional Access policies incorporating Azure AD Identity Protection sign-in risk detections.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-risk>

<https://blog.mydock365.com/what-is-conditional-access-in-microsoft-365>

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10. You need to downgrade the computer to Windows 8.1. Solution: From the Settings app, you use the Recovery options. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

https://answers.microsoft.com/en-us/windows/forum/windows_10-windows_install/how-to-recover-restore-your

NEW QUESTION 10

- (Exam Topic 4)

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What two configurations should you perform from Microsoft 365 Device Management? Each correct answer is a complete solution.

NOTE: Each correct selection is worth one point.

- A. a device restrictions device configuration profile
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 security baseline
- E. a Windows 10 update ring

Answer: BE

NEW QUESTION 11

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the devices shown in the following table.

Name	Platform	(Azure Active Directory) Azure AD join type	Managed by using Microsoft Intune
Device1	Windows 10	Joined	Yes
Device2	Android	Registered	Yes
Device3	iOS	None	Yes
Device4	Windows 10	None	No
Device5	iPadOS	Registered	No

You need to assign app protection settings to the devices.

What is the minimum number of app protection policies required?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies>

NEW QUESTION 14

- (Exam Topic 4)

You have a public computer named Public1 that runs Windows 10. Users use Public1 to browse the Internet by using Microsoft Edge.

You need to view events associated with website phishing attacks on Public1. Which Event Viewer log should you view?

- A. Applications and Services Logs > Microsoft\Windows > DeviceGuard > Operational
- B. Applications and Services Logs > Microsoft > Windows > Security-Mitigations> User Mode
- C. Applications and Services Logs > Microsoft > Windows > SmartScreen > Debug
- D. Applications and Services Logs > Microsoft > Windows > Windows Defender > Operational

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-smartscreen/microsoft-defender-smartscreen-overview#viewing-windows-event-logs-for-microsoft-defender-smartscreen>

NEW QUESTION 17

- (Exam Topic 4)

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Endpoint Manager, you define the company's network as a location named Location1. Which devices can use network location-based compliance policies?

- A. Device2 and Device3 only
- B. Device2 only
- C. Device1 and Device2 only
- D. Device1 only
- E. Device1, Device2, and Device3

Answer: E

Explanation:

Intune supported operating systems

Intune supports devices running the following operating systems (OS): iOS

Android Windows macOS

Note: View the device compliance settings for the different device platforms: Android device administrator

Android Enterprise iOS

macOS

Windows Holographic for Business

Windows 8.1 and later Windows 10/11

Reference: <https://docs.microsoft.com/en-us/mem/intune/fundamentals/supported-devices-browsers> <https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 18

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com. The tenant contains Windows 10 devices that are enrolled in Microsoft Intune.

You create an Azure Log Analytics workspace and add the Device Health solution to the workspace.

You need to create a custom device configuration profile that will enroll the Windows 10 devices in Device Health.

Which OMA-URI should you add to the profile?

- A. ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push
- B. ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push/ChannelURI
- C. ./Vendor/MSFT/DMClient/Provider/MS DM Server/CommercialID
- D. ./Vendor/MSFT/DMClient/Provider/MS DM Server/ManagementServerAddressList

Answer: C

Explanation:

References:

<https://allthingscloud.blog/monitor-windows-10-updates-for-intune-mdm-enrolled-devices/>

NEW QUESTION 21

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Update for Business.

The research department has several computers that have specialized hardware and software installed. You need to prevent the video drivers from being updated automatically by using Windows Update.

Solution: From the Windows Update settings in a Group Policy object (GPO), you enable Do not include drivers with Windows Updates.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

https://www.stigviewer.com/stig/microsoft_windows_server_2012_member_server/2013-07-25/finding/WN12

NEW QUESTION 26

- (Exam Topic 4)

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse. What should you use to create the report?

- A. the Azure portal app
- B. Endpoint analytics
- C. the Company Portal app
- D. Microsoft Power BI

Answer: D

Explanation:

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:

- Devices Enrollment
- App protection policy Compliance policy
- Device configuration profiles Software updates
- Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

- > Sign in to the Microsoft Endpoint Manager admin center.
- > Select Reports > Intune Data warehouse > Data warehouse.
- > Retrieve the custom feed URL from the reporting blade, for example:
- > Open Power BI Desktop.
- > Choose File > Get Data. Select OData feed.
- > Choose Basic.
- > Type or paste the OData URL into the URL box.
- > Select OK.
- > If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.
- > Select Organizational account.
- > Type your username and password.
- > Select Sign In.
- > Select Connect.
- > Select Load.

Reference: <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

NEW QUESTION 29

- (Exam Topic 4)

A company named A-Datum Corporation uses Microsoft Endpoint Configuration Manager, Microsoft Intune, and Desktop Analytics. A-Datum purchases a company named Contoso, Ltd. Contoso has devices that run the following operating systems:

- > Windows 8.1
- > Windows 10
- > Android
- > iOS

A-D atum plans to use Desktop Analytics to monitor the Contoso devices.

You need to identify which devices can be monitored by using Desktop Analytics and how to add the devices to Desktop Analytics.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Devices that can be monitored by using Desktop Analytics:

Windows 10 only
Windows 10, Android, and iOS only
Windows 8.1 and Windows 10 only
Windows 8.1, Windows 10, Android, and iOS

To add a device to Desktop Analytics, you must:

Enroll the device in Microsoft Intune.
Install the Endpoint Configuration Manager agent.
Install the Microsoft Monitoring Agent.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/overview>

NEW QUESTION 34

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User! and the devices shown In the following table.

Name	Operating system	Azure AD status
Device1	Windows 11	Joined
Device2	Windows 10	Joined

User1 can access her Microsoft Exchange Online mailbox from both Device1 and Device2.

You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- Assignments
- Users or workload identities: User1
- Cloud apps or actions: Office 365 Exchange Online
- Access controls
- Grant Block access

You need to configure CAPolicy1 to allow mailbox access from Device1 but block mailbox access from Device2.

Solution: You add a condition to filter for devices. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Conditional Access: Filter for devices

When creating Conditional Access policies, administrators have asked for the ability to target or exclude specific devices in their environment. The condition filter for devices gives administrators this capability. Now you can target specific devices using supported operators and properties for device filters and the other available assignment conditions in your Conditional Access policies.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-condition-filters-for-devices>

NEW QUESTION 35

- (Exam Topic 4)

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace.

Which three types of data can you collect from the computers by using Log Analytics? Each correct answer a complete solution.

NOTE: Each correct selection is worth one point.

- A. error events from the System log
- B. failure events from the Security log
- C. third-party application logs stored as text files
- D. the list of processes and their execution times
- E. the average processor utilization

Answer: ADE

Explanation:

Log Analytics is a tool in the Azure portal to edit and run log queries from data collected by Azure Monitor logs, such as the system log, and interactively analyze their results.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/logs/log-analytics-tutorial><https://docs.microsoft.com/en-u>

NEW QUESTION 36

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 2,000 computers that run Windows 10.

You implement hybrid Microsoft Azure Active Directory (Azure AD) and Microsoft Intune.

You need to automatically register all the existing computers to Azure AD and enroll the computers in Intune. The solution must minimize administrative effort.

What should you use?

- A. An Autodiscover address record.
- B. A Windows AutoPilot deployment profile.
- C. An Autodiscover service connection point (SCP).
- D. A Group Policy object (GPO).

Answer: B

Explanation:

Reference:

<https://techcommunity.microsoft.com/t5/Windows-IT-Pro-Blog/Windows-Autopilot-Hybrid-Azure-AD-join-and>

NEW QUESTION 39

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed. You install and customize Windows 10 on a reference computer.

You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers.

Which command should you run before you capture the image?

- A. dism
- B. wpeinit
- C. bcdedit
- D. sysprep

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/sysprep--system-preparation-- overview>

NEW QUESTION 40

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You create the Windows Autopilot deployment profile-shown in the following exhibit.

Create profile

Windows Autopilot deployment profiles

NEW QUESTION 43

- (Exam Topic 4)
You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant, a Microsoft System Center Configuration Manager (Current Branch) environment, and a Microsoft 365 subscription.
You have computers that run Windows 10 as shown in the following table.

Name	Managed by Configuration Manager	Domain membership
Computer1	Yes	Active Directory-joined
Computer2	Yes	Hybrid Azure AD-joined
Computer3	Yes	Azure AD-joined

You plan to use Microsoft 365 Device Management.
Which computers support co-management by Configuration Manager and Device Management?

- A. Computer1, Computer2, and Computer3
- B. Computer3 only
- C. Computer1 and Computer2 only
- D. Computer2 only

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/comanage/overview>

NEW QUESTION 47

- (Exam Topic 4)

Your company has an infrastructure that has the following:

- > A Microsoft 365 tenant
- > An Active Directory forest
- > Microsoft Store for Business
- > A Key Management Service (KMS) server
- > A Windows Deployment Services (WDS) server
- > A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

<input type="checkbox"/>	Azure Active Directory admin center
<input type="checkbox"/>	Microsoft Store for Business
<input type="checkbox"/>	Volume Activation Management Tool console
<input type="checkbox"/>	Windows Deployment Services console

Required information from each computer:

<input type="checkbox"/>	Device serial number and hardware hash
<input type="checkbox"/>	MAC address and computer name
<input type="checkbox"/>	Volume License Key and computer name

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 49

- (Exam Topic 4)

You have a shared computer that runs Windows 10. The computer is infected with a virus.

You discover that a malicious TTF font was used to compromise the computer.

You need to prevent this type of threat from affecting the computer in the future. What should you use?

- A. Windows Defender Exploit Guard
- B. Windows Defender Application Guard
- C. Windows Defender Credential Guard
- D. Windows Defender System Guard
- E. Windows Defender SmartScreen

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/windowsd>

NEW QUESTION 50

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices. What should you do first?

- A. Create a configuration profile.
- B. Link your managed Google Play account to intune.
- C. Configure the Partner device management settings.
- D. Add a certificate connector.

Answer: B

Explanation:

Connect your Intune account to your Managed Google Play account.

Managed Google Play is Google's enterprise app store and sole source of applications for Android Enterprise in Intune. You can use Intune to orchestrate app deployment through Managed Google Play for any Android Enterprise scenario (including personally-owned work profile, dedicated, fully managed, and corporate-owned work profile enrollments).
Reference: <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-android-for-work> <https://docs.microsoft.com/en-us/mem/intune/enrollment/connect-intune-android-enterprise>

NEW QUESTION 53

- (Exam Topic 4)
You are licensed for Microsoft Endpoint Manager.
You use Microsoft Endpoint Configuration Manager and Microsoft Intune.
You have devices enrolled in Configuration Manager as shown in the following table.

Name	Collection
Device1	Collection1
Device2	Collection2
Device3	Collection1, Collection2

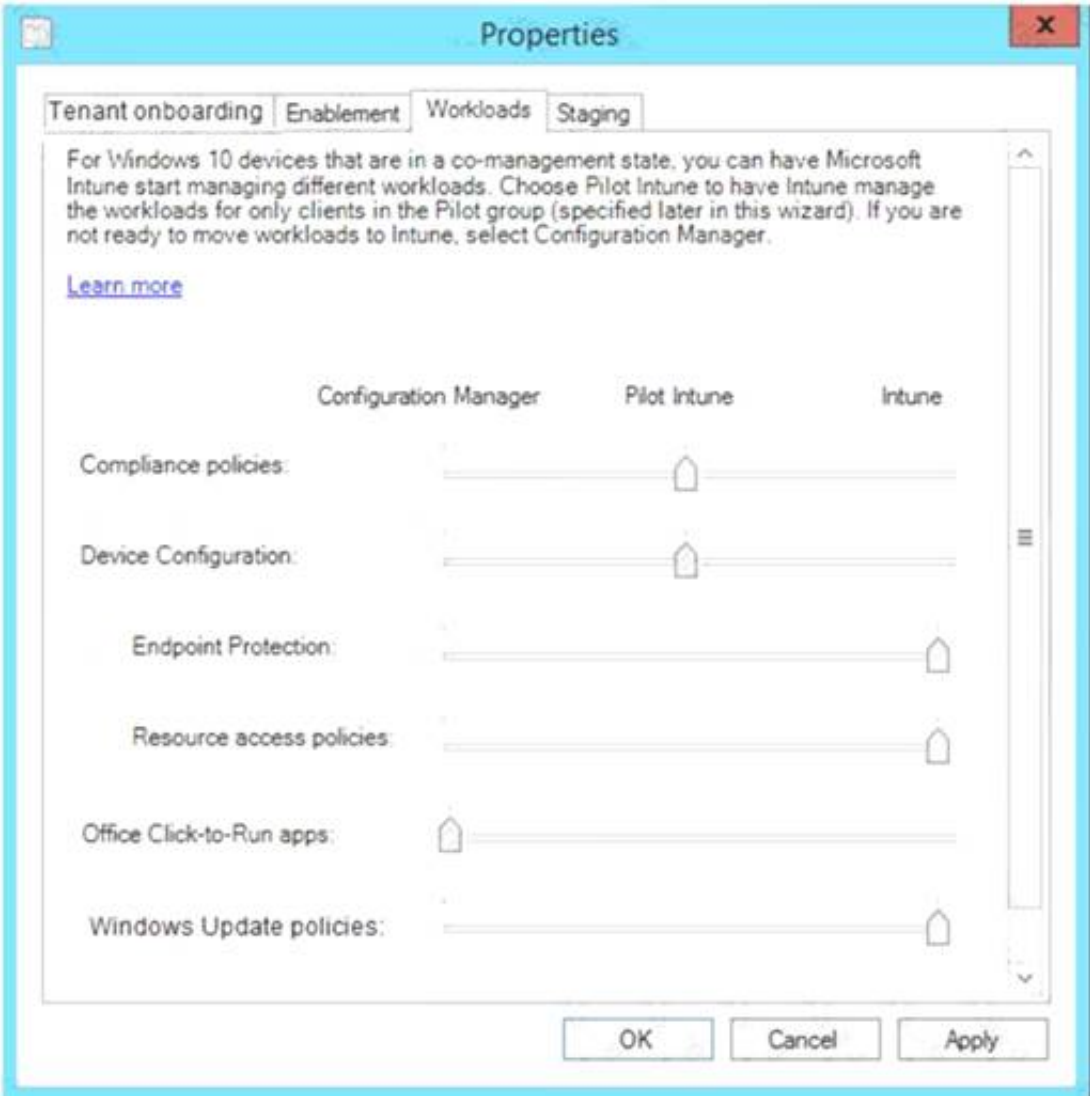

In Configuration Manager, you enable co-management and configure the following settings:

- > Automatic enrolment in Intune: Pilot
- > Intune Auto Enrollment: Collection1

In Configuration Manager, you configure co-management staging to have the following settings:

- > Compliance policies: Collection2
- > Device Configuration: Collection1

In Configuration Manager, you configure co-management workloads as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device1.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device2.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/comanage/workloads>

NEW QUESTION 54

- (Exam Topic 4)

Your company has a Microsoft 365 subscription.

A new user named Admin1 is responsible for deploying Windows 10 to computers and joining the computers to Microsoft Azure Active Directory (Azure AD).

Admin1 successfully joins computers to Azure AD.

Several days later, Admin1 receives the following error message: "This user is not authorized to enroll. You can try to do this again or contact your system administrator with the error code (0x801c0003)."

You need to ensure that Admin1 can join computers to Azure AD and follow the principle of least privilege.

- A. Assign the Global administrator role to Admin1.
- B. Modify the Device settings in Azure AD.
- C. Assign the Cloud device administrator role to Admin1.
- D. Modify the User settings in Azure AD.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal>

NEW QUESTION 56

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure the Authentication methods. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

References:

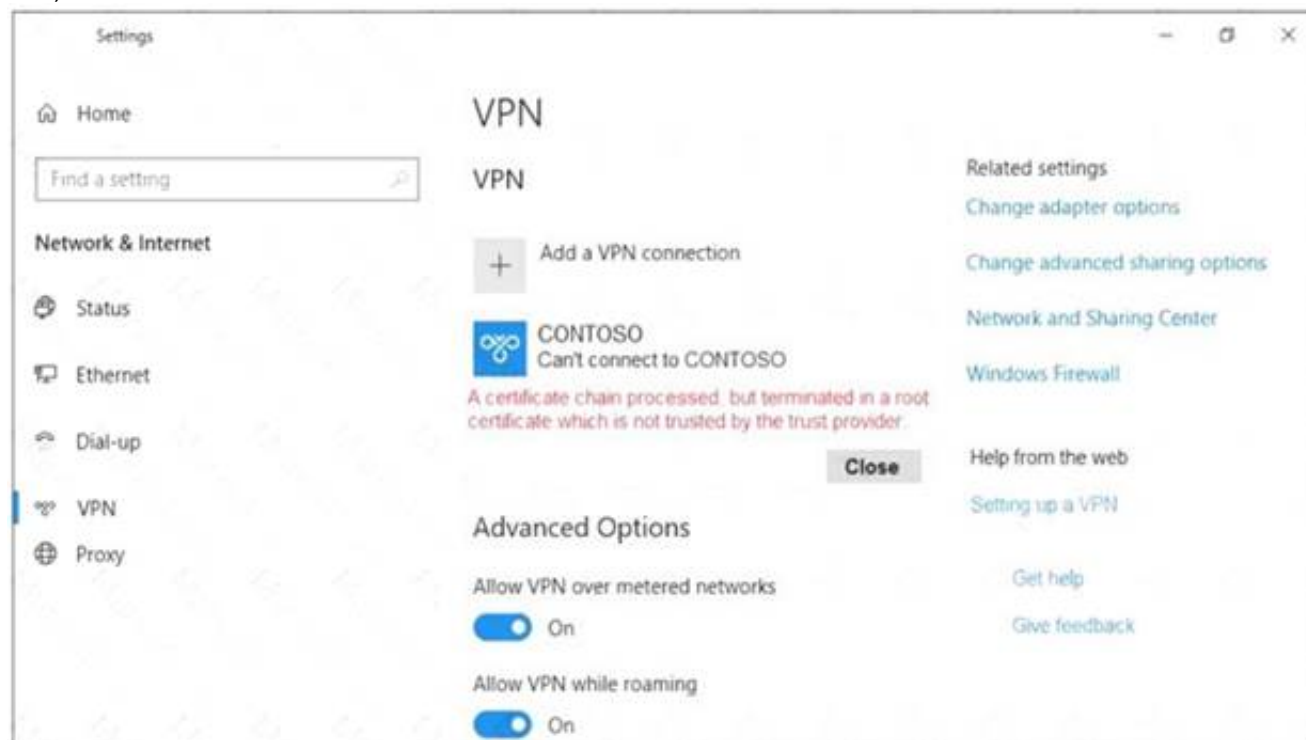

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

NEW QUESTION 61

- (Exam Topic 4)

You are configuring an SSTP VPN.

When you attempt to connect to the VPN, you receive the message shown in the exhibit. (Click the Exhibit tab.)

What should you do to ensure that you can connect to the VPN?

- A. Change the VPN type
- B. Generate a computer certificate from the root certification authority (CA)
- C. Install the root certificate

Answer: B

NEW QUESTION 63

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft Intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Android Enterprise system app
- B. Android store app
- C. Web link
- D. Managed Google Play store app
- E. Built-in Android app

Answer: AD

NEW QUESTION 64

- (Exam Topic 4)

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What should you configure from Microsoft 365 Device Management? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a Windows 10 security baseline
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 update ring
- E. a device restrictions device configuration profile

Answer: D

NEW QUESTION 66

- (Exam Topic 4)

You have Windows 10 devices that are managed by using Microsoft Intune. Intune and the Microsoft Store for Business are integrated.

You need to deploy the Remote Desktop modern app as an automatic install to the Windows 10 devices without user interaction.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create an Azure Active Directory group that contains all users.
- B. From the Intune portal, create a Microsoft Store app for the Remote Desktop modern app.
- C. From the Intune portal assign the app to the Azure Active Directory group.
- D. Create an Azure Active Directory group that contains the Windows 10 devices.
- E. From the Microsoft Store for Business portal, assign a license for the app to all the users in the Azure Active Directory group.
- F. For your organization, make the app available in the Microsoft Store for Business.

Answer: BCD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/windows-store-for-business>

NEW QUESTION 70

- (Exam Topic 4)

You have a Microsoft 365 tenant and an internal certification authority (CA).

You need to use Microsoft Intune to deploy the root CA certificate to managed devices.

Which type of Intune policy and profile should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Policy type:

App configuration policy
 App protection policy
 Compliance policy
 Configuration profile

Profile:

Imported public key pair (PKCS) certificate
 Public key pair (PKCS) certificate
 Simple Certificate Enrollment Protocol (SCEP) certificate
 Trusted certificate

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Configuration profile Create a trusted certificate profile. Box 2: Trusted certificate

When using Intune to provision devices with certificates to access your corporate resources and network, use a trusted certificate profile to deploy the trusted root certificate to those devices. Trusted root certificates establish a trust from the device to your root or intermediate (issuing) CA from which the other certificates are issued.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-trusted-root>

NEW QUESTION 73

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10.

You need to downgrade the computer to Windows 8.1.

Solution: From View update history in the Settings app, you select Uninstall updates.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 74

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system
Device1	Windows 10
Device2	Android 8.0
Device3	Android 9
Device4	iOS 11.0
Device5	iOS 11.4.1

All devices contain an app named App1 and are enrolled in Microsoft Intune.

You need to prevent users from copying data from App1 and pasting the data into other apps.

Which type of policy and how many policies should you create in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Policy type:

	▼
App configuration policy	
App protection policy	
Conditional access policy	
Device compliance policy	

Minimum number of policies:

	▼
1	
2	
3	
4	
5	

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies> <https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies-configure-windows-10>

NEW QUESTION 78

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: At a command prompt, you change the current folder to C:\Folder1, and then you run the RegSvr32.exe Package1.ppkg command.

Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 80

- (Exam Topic 4)

You have a Microsoft 365 subscription. The subscription contains 500 computers that run Windows 11 and are enrolled in Microsoft Endpoint Manager. You need to manage the deployment of monthly security updates. The solution must meet the following requirements:

- Updates must be deployed to a group of test computers for quality assurance.
- Updates must be deployed automatically 15 days after the quality assurance testing. What should you create in the Microsoft Endpoint Manager admin center?

- A. an update ring
 B. a security baseline
 C. a feature update policy
 D. a device configuration profile

Answer: A

NEW QUESTION 82

- (Exam Topic 4)

You have the on-premises servers shown in the following table.

Name	Description
DC1	Domain controller that runs Windows Server 2022
Server1	Standalone server that runs Windows Server 2022
Server2	Member server that runs Windows Server 2022 and has the Remote Access role installed
Server3	Member server that runs Windows Server 2019
Server4	Red Hat Enterprise Linux (RHEL) 8.4 server

You have a Microsoft 365 E5 subscription that contains Android and iOS devices. All the devices are managed by using Microsoft Intune. You need to implement Microsoft Tunnel for Intune. The solution must minimize the number of open firewall ports. To which server can you deploy a Tunnel Gateway server, and which inbound ports should be allowed on the server to support Microsoft Tunnel connections? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Server:

Ports:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Server4

Microsoft Tunnel is a VPN gateway solution for Microsoft Intune that runs in a container on Linux and allows access to on-premises resources from iOS/iPadOS and Android Enterprise devices using modern authentication and Conditional Access.

Box 2: TCP 443 and UDP 443 only

Some traffic goes to your public facing IP address for the Tunnel. The VPN channel will use TCP, TLS, UDP, and DTLS over port 443.

By default, port 443 is used for both TCP and UDP, but this can be customized via the Intune Saerver Configuration – Server port setting. If changing the default port (443) ensure your inbound firewall rules are adjusted to the custom port.

Incorrect:

TCP 1723 is not used.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/microsoft-tunnel-overview>

NEW QUESTION 83

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and the devices shown in the following table.

Name	Operating system	Azure AD status
Device1	Windows 11	Joined
Device2	Windows 10	Joined

User1 can access her Microsoft Exchange Online mailbox from both Device 1 and Device2.

You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- * Assignments
- * Users or workload identities: User1
- * Cloud apps or actions: Office 365 Exchange Online
- * Access controls
- * Grant: Block access

You need to configure CAPolicy1 to allow mailbox access from Device 1 but block mailbox access from Device2.

Solution: You add a condition that specifies a trusted locations. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use solution: You add a condition to filter for devices. Note: Conditional Access: Filter for devices

When creating Conditional Access policies, administrators have asked for the ability to target or exclude specific devices in their environment. The condition filter for devices gives administrators this capability. Now you can target specific devices using supported operators and properties for device filters and the other available assignment conditions in your Conditional Access policies.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-condition-filters-for-devices>

NEW QUESTION 84

- (Exam Topic 4)

You have a computer named Computer5 that has Windows 10 installed. You create a Windows PowerShell script named config.ps1.

You need to ensure that config.ps1 runs after feature updates are installed on Computer5. Which file should you modify on Computer5?

- A. Unattend.xml
- B. Unattend.bat
- C. SetupConfig.ini
- D. LiteTouch.wsf

Answer: C

Explanation:

References:

<https://www.joseespitia.com/2017/06/01/how-to-run-a-post-script-after-a-windows-10-feature-upgrade/>

NEW QUESTION 85

- (Exam Topic 4)

You use Microsoft Intune to manage client computers. The computers run one of the following operating systems:

- > Windows 8.1
- > Windows 10 Pro
- > Windows 10 Enterprise
- > Windows 10 Enterprise LTSC

You plan to manage Windows updates on the computers by using update rings. Which operating systems support update rings?

- A. Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC only
- B. Windows 8.1, Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC
- C. Windows 10 Enterprise and Windows 10 Enterprise LTSC only
- D. Windows 10 Pro and Windows 10 Enterprise only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

NEW QUESTION 89

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 8.1 and use local user profiles.

You deploy 10 new computers that run Windows 10 and join the computers to the domain.

You need to migrate the user profiles from the Windows 8.1 computers to the Windows 10 computers. What should you do?

- A. From the Windows 8.1 computer of each user, run imagex.exe/capture, and then from the Windows 10 computer of each user, run imagex.exe/apply.
- B. Configure roaming user profiles for the user
- C. Instruct the users to first sign in to and out of their Windows 8.1 computer and then to sign in to their Windows 10 computer.
- D. From the Windows 8.1 computer of each user, run scanstate.exe, and then from the Windows 10 computer of each user, run loadstate.exe.
- E. Configure Folder Redirection for the user
- F. Instruct the users to first sign in to and out of their Windows 8.1 computer, and then to sign in to their Windows 10 computer.

Answer: C

Explanation:

The ScanState command is used with the User State Migration Tool (USMT) 10.0 to scan the source computer, collect the files and settings, and create a store.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-scanstate-syntax> <https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-loadstate-syntax>

NEW QUESTION 94

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1. You need to perform the following tasks for User1:

- > Set the Usage location to Canada.
- > Configure the Phone and Email authentication contact info for self-service password reset (SSPR). Which two settings should you configure in the Azure Active Directory admin center? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION 96

- (Exam Topic 4)

You have computers that run Windows 10, are joined to Azure Active Directory (Azure AD), and are enrolled in Microsoft Intune.

You have an Azure web app named App1. App1 only allows connections over HTTPS. App1 uses a certificate from an on-premises certification authority (CA).

You need to ensure that the computers can connect to App1 from Microsoft Edge.

Which type of device configuration profile should you create in Microsoft Endpoint Manager?

- A. trusted certificate
- B. Simple Certificate Enrollment Protocol (SCEP) certificate
- C. imported public key pair (PKCS) certificate
- D. public key pair (PKCS) certificate

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/certificates-scep-configure> <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-configure>

NEW QUESTION 97

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 8.1
Device2	Windows 10
Device3	Android
Device4	iOS

On which devices can you apply app configuration policies?

- A. Create an Azure Active Directory group that contains all users.
- B. From the Intune portal, create a Microsoft Store app for the Remote Desktop modern app.
- C. From the Intune portal assign the app to the Azure Active Directory group.
- D. Create an Azure Active Directory group that contains the Windows 10 devices.
- E. From the Microsoft Store for Business portal, assign a license for the app to all the users in the Azure Active Directory group.
- F. For your organization, make the app available in the Microsoft Store for Business.

Answer: BCD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy>

us/mem/intune/apps/windows-store-for-business

NEW QUESTION 102

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune.

You need to implement an ADMX-backed policy. Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions
- D. Device restrictions (Windows 10 Team)

Answer: B

Explanation:

Reference:

<https://blogs.technet.microsoft.com/senthilkumar/2018/05/21/intune-deploying-admx-backed-policies-usingmicr>

NEW QUESTION 106

- (Exam Topic 4)

You have an Azure Active Directory group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2.

You create a device configuration profile named Profile1. You assign Profile1 to Group1. You need to ensure that Profile1 applies to Device1 only. What should you modify in Policy1?

- A. Assignments
- B. Applicability Rules
- C. Settings
- D. Scope (Tags)

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign>

NEW QUESTION 108

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to use Conditional Access policies.

You need to identify which scenarios the policies will support.

Which two scenarios should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Enforce multi-factor authentication (MFA) when users access a Microsoft Office 365 service.
- B. Force users to renew an expired SSL certificate.
- C. Force users to update Windows Defender definition files before they sign in to Microsoft Office 365.
- D. Block users from using legacy authentication when signing in to Microsoft Exchange Online.
- E. Force users to install the latest Windows and Microsoft Office updates before they sign in to Office 365.

Answer: AD

Explanation:

A: Conditional Access allows administrators to control what Office 365 apps users can gain access to based on if they pass/fail certain conditions. These conditions are enforced by building a policy (or multiple policies) to control how users access your Office 365 resources.

Cloud Apps- What apps do you want to control? Conditional Access does not need to apply to all of Office 365, you can be more granular and just control access to specific apps – E.g. Exchange Online.

Access can be allowed to Office 365 with the following conditions:

* Require multi-factor authentication – User is allowed in but will need to complete additional security to log in.

* Etc.

D: The easiest way to block legacy authentication across your entire organization is by configuring a Conditional Access policy that applies specifically to legacy authentication clients and blocks access.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/block-legacy-authentication><https://do>

NEW QUESTION 113

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign a Windows 10 license to User1. You instruct User1 to sign in to Computer1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 118

- (Exam Topic 4)

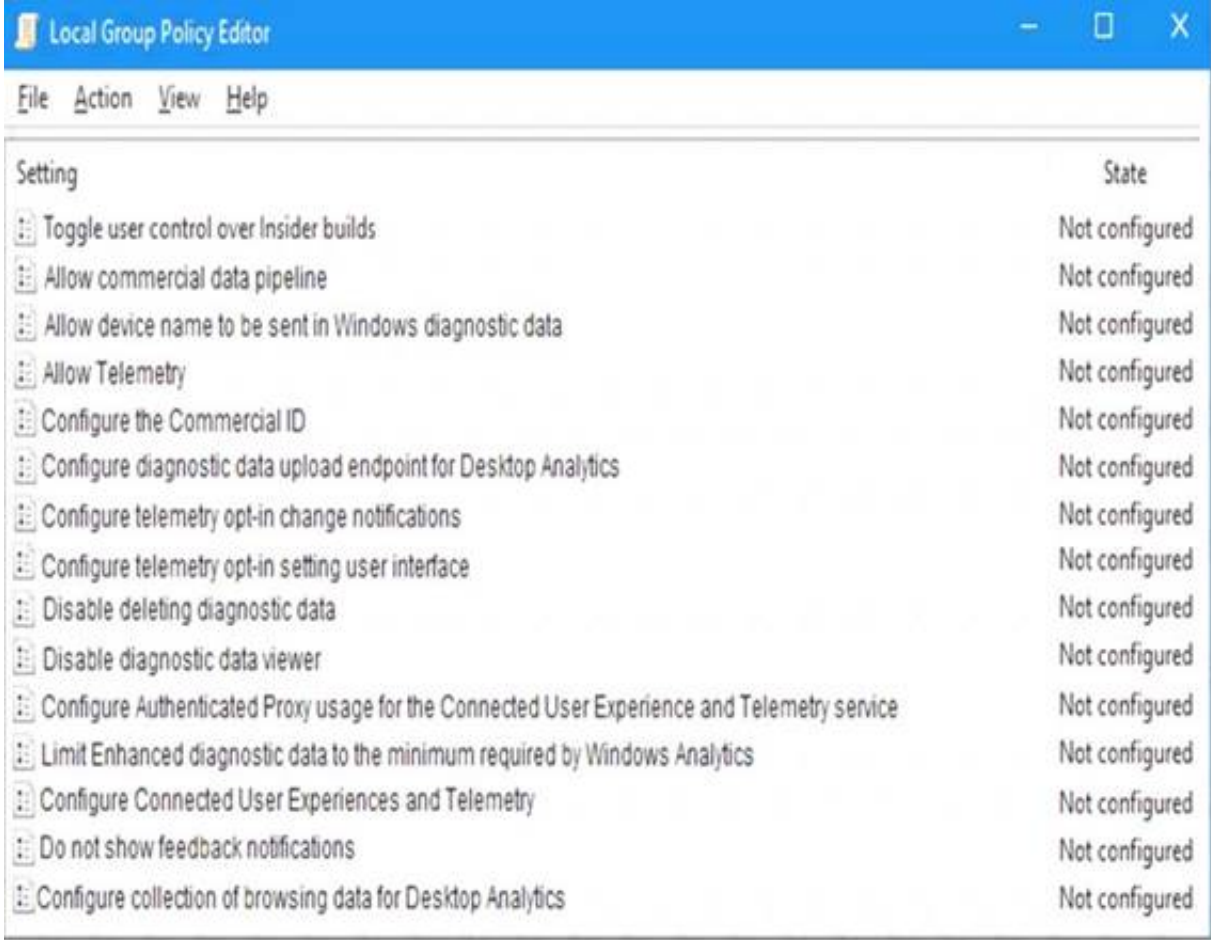

Your company has computers that run Windows 10. The employees at the company use the computers. You plan to monitor the computers by using the Update Compliance solution.

You create the required resources in Azure.

You need to configure the computers to send enhanced Update Compliance data.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-configuration-manual>

NEW QUESTION 119

- (Exam Topic 4)

You use Microsoft Endpoint Manager to manage Windows 10 devices.

You are designing a reporting solution that will provide reports on the following:

- > Compliance policy trends
- > Trends in device and user enrolment
- > App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Data source:

Data visualization tool:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/developer/reports-nav-create-intune-reports> <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

NEW QUESTION 122

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You start Computer1 from the Windows 10 installation media and use the Install option. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 125

- (Exam Topic 4)

You have 500 Windows 10 devices enrolled in Microsoft Intune.

You plan to use Exploit protection in Microsoft Endpoint Manager to enable the following system settings on the devices:

- Data Execution Prevention (DEP)
- Force randomization for images (Mandatory ASLR)

You need to configure a Windows 10 device that will be used to create a template file.

Which protection areas on the device should you configure in the Windows Security app before you create the template file? To answer, drag the appropriate protection areas to the correct settings. Each protection area may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Protection areas	Answer Area
Account protection	DEP: <input type="text"/>
App & browser control	Mandatory ASLR: <input type="text"/>
Device security	

A. Mastered

B. Not Mastered

Answer: A

Explanation:

<https://support.microsoft.com/en-us/windows/app-browser-control-in-windows-security-8f68fb65-ebb4-3cfb-4b>

NEW QUESTION 127

- (Exam Topic 4)
You have a Microsoft Intune subscription that is configured to use a PFX certificate connector to an on-premises Enterprise certification authority (CA).
You need to use Intune to configure autoenrollment for Android devices by using public key pair (PKCS) certificates.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Obtain the root certificate.

From the Microsoft Endpoint Manager admin center, create a trusted certificate configuration profile.

From the Enterprise CA, configure certificate managers.

From the Microsoft Endpoint Manager admin center, configure enrollment restrictions.

From the Microsoft Endpoint Manager admin center, create a PKCS certificate configuration profile.

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-windows-10>

NEW QUESTION 135

- (Exam Topic 4)

You have a hybrid deployment of Azure Active Directory (Azure AD) that contains 50 Windows 10 devices.

All the devices are enrolled in Microsoft Endpoint Manager.

You discover that Group Policy settings override the settings configured in Microsoft Endpoint Manager policies.

You need to ensure that the settings configured in Microsoft Endpoint Manager override the Group Policy settings.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create an Administrative Templates device profile
- B. From Group Policy Management Editor, configure the Computer Configuration settings in the Default Domain Policy
- C. From the Microsoft Endpoint Manager admin center, create a custom device profile
- D. From Group Policy Management Editor, configure the User Configuration settings in the Default DomainPolicy

Answer: C

Explanation:

Reference:

<https://uem4all.com/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who-wins/>

NEW QUESTION 137

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (AD) and enrolled in Microsoft Intune.

You need to enable self-service password reset on the sign-in screen.

Which settings should you configure from the Microsoft Intune blade?

- A. Device configuration
- B. Device compliance
- C. Device enrollment
- D. Conditional access

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-sspr-windows>

NEW QUESTION 138

- (Exam Topic 4)

You have a Windows 10 device named Device1 that is joined to Active Directory and enrolled in Microsoft Intune.

Device 1 is managed by using Group Policy and Intune.

You need to ensure that the Intune settings override the Group Policy settings. What should you configure?

- A. a device configuration profile
- B. an MDM Security Baseline profile

- C. a device compliance policy
- D. a Group Policy Object (GPO)

Answer: A

Explanation:

NEW QUESTION 140

- (Exam Topic 4)
Your company has a Microsoft Azure Active Directory (Azure AD) tenant.
The company uses Microsoft Intune to manage iOS, Android, and Windows 10 devices.
The company plans to purchase 1,000 iOS devices. Each device will be assigned to a specific user.
You need to ensure that the new iOS devices are enrolled automatically in Intune when the assigned user signs in for the first time.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Create a device compliance policy.		
Add a Device Enrollment Program (DEP) token.		
Assign an enrollment profile.	⊙	⊙
Create a device enrollment manager (DEM) account.	⊙	⊙
Create a Windows AutoPilot self-deploying deployment profile.		
Create an Apple enrollment profile.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/intune/device-enrollment-program-enroll-ios>

NEW QUESTION 145

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows Update for Business.
The research department has several computers that have specialized hardware and software installed.
You need to prevent the video drivers from being updated automatically by using Windows Update. Solution: From the Settings app, you clear the Give me updates for other Microsoft products when I update Windows check box.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

https://www.stigviewer.com/stig/microsoft_windows_server_2012_member_server/2013-07-25/finding/WN12

NEW QUESTION 147

- (Exam Topic 4)
You have 10 computers that run Windows 7 and have the following configurations:

- > A single MBR disk
- > A disabled TPM chip
- > Disabled hardware virtualization
- > UEFI firmware running in BIOS mode
- > Enabled Data Execution Prevention (DEP) You plan to upgrade the computers to Windows 10.

You need to ensure that the computers can use Secure Boot.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Convert the MBR disk to a GPT disk
- B. Enable the TPM chip.
- C. Disable DEP
- D. Enable hardware virtualization
- E. Convert the firmware from BIOS to UEFI.

Answer: AE

Explanation:
Reference:
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/boot-to-uefi-mode-or-legacy-biosmod>

NEW QUESTION 149

- (Exam Topic 3)
User1 and User2 plan to use Sync your settings.
On which devices can the users use Sync your settings? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

User1:

No devices

Device4 and Device5 only

Device1, Device2 and Device3 only

Device1, Device2, Device3, Device4, and Device5

User2:

No devices

Device4 and Device5 only

Device1, Device2 and Device3 only

Device1, Device2, Device3, Device4, and Device5

NEW QUESTION 154

- (Exam Topic 3)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Text Description automatically generated

NEW QUESTION 155

- (Exam Topic 3)
You implement Boundary1 based on the planned changes.
Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device 1. Device2. and Device5 only
- D. Device 1, Device2, Device3, and Device4 only

Answer: D

Explanation:
Reference:
<https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

NEW QUESTION 159

- (Exam Topic 3)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
A screenshot of a computer Description automatically generated with medium confidence

NEW QUESTION 162

- (Exam Topic 3)
You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements.
To what should you grant the right to create the computer objects?

- A. Server2
- B. Server1
- C. GroupA
- D. DC1

Answer: B

Explanation:
Reference:
<https://blog.matrixpost.net/set-up-windows-autopilot-production-environment-part-2/>

NEW QUESTION 163

- (Exam Topic 2)
You need to meet the technical requirements for the IT department. What should you do first?

- A. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
- B. From the Configuration Manager console, add an Intune subscription.
- C. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
- D. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.

Answer: C

Explanation:
Reference:
<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

NEW QUESTION 166

- (Exam Topic 2)
You are evaluating which devices are compliant.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 169

- (Exam Topic 1)

You need to capture the required information for the sales department computers to meet the technical requirements. Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>
"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

NEW QUESTION 172

- (Exam Topic 1)

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

NEW QUESTION 173

- (Exam Topic 1)

You need to recommend a solution to meet the device management requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

For the Research department employees:

<input checked="" type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection
iOS app provisioning profiles

For the Sales department employees:

<input checked="" type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection
iOS app provisioning profiles

- A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 177

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune for mobile device management (MDM). You associate a Microsoft Store for Business account with Intune.

You purchase an app named Appl from the Microsoft Store for Business. You need to ensure that Appl can be deployed by using Intune.

What should you do?

- A. Sync purchased apps from the Microsoft Store for Business.
- B. Integrate the Windows Autopilot Deployment Program into the Microsoft Store for Business.
- C. Create an app category in Intune.
- D. Create an app protection policy in Intune.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/windows-store-for-business>

NEW QUESTION 179

- (Exam Topic 4)

You have computers that run Windows 10 and are managed by using Microsoft Intune. Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1. What should you configure in the device configuration profile?

- A. Microsoft Defender SmartScreen
- B. Microsoft Defender Exploit Guard
- C. Microsoft Defender Application Guard
- D. Microsoft Defender Application Control

Answer: B

Explanation:

NEW QUESTION 181

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system builds can access network resources.

Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings

Require BitLocker.

Prevent jailbroken devices from having corporate access.

Prevent rooted devices from having corporate access.

Require Secure Boot to be enabled on the device.

Answer Area

Device1:

Setting

Device2:

Setting

Device3:

Setting

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

Device Compliance settings for Windows 10/11 in Intune

There are the different compliance settings you can configure on Windows devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require BitLocker, set a minimum and maximum operating system, set a risk level using Microsoft Defender for Endpoint, and more.

Note: Windows Health Attestation Service evaluation rules Require BitLocker:

Windows BitLocker Drive Encryption encrypts all data stored on the Windows operating system volume. BitLocker uses the Trusted Platform Module (TPM) to help protect the Windows operating system and user data. It also helps confirm that a computer isn't tampered with, even if its left unattended, lost, or stolen. If the computer is equipped with a compatible TPM, BitLocker uses the TPM to lock the encryption keys that protect the data. As a result, the keys can't be accessed until the TPM verifies the state of the computer.

Not configured (default) - This setting isn't evaluated for compliance or non-compliance.

Require - The device can protect data that's stored on the drive from unauthorized access when the system is off, or hibernates.

Box 2: Prevent jailbroken devices from having corporate access Device Compliance settings for iOS/iPadOS in Intune

There are different compliance settings you can configure on iOS/iPadOS devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require an email, mark rooted (jailbroken) devices as not compliant, set an allowed threat level, set passwords to expire, and more.

Device Health

Jailbroken devices

Supported for iOS 8.0 and later

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted (jailbroken) devices as not compliant.

Box 3: Prevent rooted devices from having corporate access. Device compliance settings for Android Enterprise in Intune

There are different compliance settings you can configure on Android Enterprise devices in Intune. As part of your mobile device management (MDM) solution, use these settings to mark rooted devices as not compliant, set an allowed threat level, enable Google Play Protect, and more.

Device Health - for Personally-Owned Work Profile Rooted devices

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted devices as not compliant.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-windows> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-android-for-work> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-ios>

NEW QUESTION 182

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 10. You need to modify the deployment share to meet the following requirements:

➤ Define a rule for how to name computers during the deployment.

The solution must NOT replace the existing WinPE image.

Which file should you modify for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Administrator password:

NEW QUESTION 184

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 10 Enterprise
Computer2	Windows 10 Pro
Computer3	Windows 10 Pro

Microsoft Defender Application Guard is installed on the computers.

Application Guard Group Policy settings are applied to the computers as shown in the following table.

Setting	State
Turn on Windows Defender Application Guard in Managed Mode	Enabled
Configure Windows Defender Application Guard clipboard settings	Enabled
Allow files to download and save to the host operating system from Windows Defender Application Guard	Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Computer1 can use Application Guard in Enterprise-managed mode.	<input type="radio"/>	<input type="radio"/>
Computer2 can copy clipboard settings from Microsoft Edge to Application Guard.	<input type="radio"/>	<input type="radio"/>
Computer3 can download files from Application Guard to the host operating system.	<input type="radio"/>	<input type="radio"/>

NEW QUESTION 188

- (Exam Topic 4)
You have a Microsoft 365 tenant that uses Microsoft Intune to manage the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	Android Enterprise
Device4	iOS
Device5	iPadOS

You need to deploy a compliance solution that meets the following requirements:

- > Marks the devices as Not Compliant if they do not meet compliance policies
- > Remotely locks noncompliant devices

What is the minimum number of compliance policies required, and which devices support the remote lock action? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Minimum number of compliance policies required:

1

2

3

4

5

Devices that support the remote lock action:

Device1 only

Device2 and Device3 only

Device4 and Device5 only

Device2, Device3, Device4, and Device5

Device1, Device2, Device3, Device4, and Device5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, table Description automatically generated
Reference:
<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started> <https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

NEW QUESTION 192

- (Exam Topic 4)

Your company has an internal portal that uses a URL of <http://contoso.com>.

The network contains computers that run Windows 10. The default browser on all the computers is Microsoft Edge.

You need to ensure that all users only use Internet Explorer to connect to the internal portal. The solution must ensure that Microsoft Edge can be used to connect to all other websites.

What should you do from each computer?

- A. From Internet Explorer, configure the Compatibility View settings
- B. From the local policy, configure Enterprise Mode
- C. From Microsoft Edge, configure the Advanced Site Settings
- D. From the Settings app, configure the default web browser settings

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-edge/deploy/emie-to-improve-compatibility>

NEW QUESTION 193

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Hello for Business is an alternative sign-in method that uses Active Directory or an Azure Active Directory account to replace a password, smart card, or a virtual smart card. It lets you use a user gesture to sign in, instead of a password. A user gesture might be a PIN, biometric authentication such as Windows Hello, or an external device such as a fingerprint reader.

Intune integrates with Hello for Business in two ways:

An Intune policy can be created under Device enrollment. This policy targets the entire organization

(tenant-wide). It supports the Windows AutoPilot out-of-box-experience (OOBE) and is applied when a device enrolls.

An identity protection profile can be created under Device configuration. This profile targets assigned users and devices, and is applied during check-in.

References:

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

NEW QUESTION 194

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 100 devices enrolled in Microsoft Intune. You need to review the startup processes and how often each device restarts.

What should you use?

- A. Endpoint analytics
- B. Intune Data Warehouse
- C. Azure Monitor
- D. Device Management

Answer: B

NEW QUESTION 198

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: From the Settings app, you select Access work or school, and then you select Add or remove a provisioning package.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 202

- (Exam Topic 4)

Your company has 200 computers that run Windows 10. The computers are managed by using Microsoft Intune. Currently, Windows updates are downloaded without using Delivery Optimization. You need to configure the computers to use Delivery Optimization. What should you create in Intune?

- A. a device configuration profile
- B. a device compliance policy
- C. an app protection policy
- D. a Windows 10 update ring

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/intune/delivery-optimization-windows>

NEW QUESTION 207

- (Exam Topic 4)

Your company uses Microsoft Intune. You have a Microsoft Store for Business account. You need to ensure that you can deploy Microsoft Store for Business apps by using Intune. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
From Intune, enable Microsoft Store for Business.		
From Microsoft Store for Business, assign apps to people.		
From Intune, sync Microsoft Store for Business.		
From Intune, create an app configuration policy.		
From Microsoft Store for Business, add a management tool.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
From Intune, enable Microsoft Store for Business.	From Microsoft Store for Business, add a management tool.
From Microsoft Store for Business, assign apps to people.	From Microsoft Store for Business, assign apps to people.
From Intune, sync Microsoft Store for Business.	From Intune, sync Microsoft Store for Business.
From Intune, create an app configuration policy.	
From Microsoft Store for Business, add a management tool.	

NEW QUESTION 209

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: From Windows 8.1, you run setup.exe from the Windows 10 installation media. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://www.kapilarya.com/how-to-upgrade-to-windows-10-using-iso-file>

NEW QUESTION 212

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the users shown in the following table.

Name	UPN	Member of
User1	User1@contoso.com	Group1
User2	User2@contoso.com	None

You have Windows 10 devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Enrolled by UPN	Active hours
Device1	Personal	User1@contoso.com	10 AM to 6 PM
Device2	Corporate	User2@contoso.com	9 AM to 5 PM
Device3	Corporate	User1@contoso.com	10 AM to 6 PM

You create a Windows 10 update ring that has the following settings:

> Basics:

- Name: Ring1

> Update ring settings:

- Active hours start: 8 AM

- Active hours end: 8 PM

> Assignments:

- Included Groups: All devices

- Excluded Groups: Group1

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The active hours of Device1 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>
The active hours of Device2 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>
The active hours of Device3 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

NEW QUESTION 226

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of	Multi-factor authentication (MFA) status
User1	Group1	Disabled
User2	Group1	Enforced

MFA has a trusted IP address range of 123.30.20.0/24.

You have the Azure AD named locations shown in the following table.

Name	IP address range	Trusted
Location1	64.10.10.0/24	Yes
Location2	210.77.11.0/24	No

You create a Conditional Access policy that has the following settings:

- > Name: CAPolicy1
- > Assignments
 - Users or workload identities
 - Include: Group1
 - Cloud apps or actions: App1 Conditions
- Locations
 - Include: All trusted locations
- > Access controls
 - Grant access
 - Require multi-factor authentication

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 connects to App1 from a device that has an IP address of 210.77.11.10, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>
If User1 connects to App1 from a device that has an IP address of 64.10.10.15, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>
If User2 connects to App1 from a device that has an IP address of 123.30.20.10, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

Location2 is not trusted.

Box 2: No

Location1 is trusted.

Box 3: No

MFA IP range is also trusted.

NEW QUESTION 229

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains computers that run Windows 10. The computers are enrolled in Microsoft Intune and Windows Analytics.

Your company protects documents by using Windows Information Protection (WIP). You need to identify non-approved apps that attempt to open corporate documents. What should you use?

- A. the Device Health solution in Windows Analytics
- B. Microsoft Cloud App Security
- C. Intune Data Warehouse
- D. the App protection status report in Intune

Answer: D

Explanation:

NEW QUESTION 231

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.
Solution: You create a new Windows AutoPilot self-deploying deployment profile. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

NEW QUESTION 234

- (Exam Topic 4)
You have an Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain.
The tenant contains computers that run Windows 10. The computers are hybrid Azure AD joined and enrolled in Microsoft Intune. The Microsoft Office settings on the computers are configured by using a Group Policy Object (GPO).
You need to migrate the GPO to Intune.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import an ADMX file.

Assign the policy.

Create a configuration profile.

Assign the profile.

Configure the Administrative Templates settings.

Set a scope tag to the policy.

Create a compliance policy.

NEW QUESTION 235

- (Exam Topic 4)
Your company uses Microsoft Intune to manage Windows 10, Android, and iOS devices. Several users purchase new iPads and Android devices.
You need to tell the users how to enroll their device in Intune.
What should you instruct the users to use for each device? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Android device	<div>▼</div> <div>https://myapps.microsoft.com https://portal.manage.microsoft.com The Intune Company Portal app The Settings app</div>
iPad	<div>▼</div> <div>https://myapps.microsoft.com https://portal.manage.microsoft.com The Intune Company Portal app The Settings app</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The Intune Company Portal app is used to enroll Android, iOS, macOS, and Windows devices References:

<https://docs.microsoft.com/en-us/intune-user-help/enroll-device-android-company-portal> <https://docs.microsoft.com/en-us/intune-user-help/enroll-your-device-in-intune-ios>

<https://docs.microsoft.com/en-us/intune-user-help/enroll-your-device-in-intune-macos-cp>

NEW QUESTION 236

- (Exam Topic 4)

You have computers that run Windows 10 Pro. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to upgrade the computers to Windows 10 Enterprise. What should you configure in Intune?

- A. A device enrollment policy
- B. A device cleanup rule
- C. A device compliance policy
- D. A device configuration profile

Answer: D

Explanation:

NEW QUESTION 240

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Update for Business.

The research department has several computers that have specialized hardware and software installed. You need to prevent the video drivers from being updated automatically by using Windows Update. Solution: From the Device Installation settings in a Group Policy object (GPO), you enable Specify search order for device driver source locations, and then you select Do not search Windows Update.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

https://www.stigviewer.com/stig/microsoft_windows_server_2012_member_server/2013-07-25/finding/WN12-CC-000024

NEW QUESTION 241

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 10.

You create a new task sequence by using the Standard Client Task Sequence template to deploy Windows 10 Enterprise to new computers. The computers have a single hard disk.

You need to modify the task sequence to create a system volume and a data volume. Which phase should you modify in the task sequence?

- A. Preinstall
- B. State Restore
- C. Initialization
- D. Postinstall

Answer: A

Explanation:

Reference:
<https://www.prajwaldesai.com/create-extra-partition-in-mdt/>

NEW QUESTION 243

- (Exam Topic 4)

You have 100 computers that run Windows 8.1.

You need to create a report that will assess the Windows 10 readiness of the computers. What should you use?

- A. Windows Assessment and Deployment Kit (Windows ADK)
- B. Microsoft Assessment and Planning (MAP) Toolkit
- C. Windows Deployment Services (WDS)
- D. Microsoft Desktop Optimization Pack (MDOP)

Answer: B

Explanation:

Reference:
<https://www.techielass.com/using-maps-azure-readiness/>

NEW QUESTION 247

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: From Computer1, you sign in to <https://portal.azure.com> and use the Windows enrollment blade. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Use MDM enrolment.

MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

Reference:
<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

NEW QUESTION 251

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1@contoso.com	Security administrator
Admin2@contoso.com	Cloud device administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup and has the local users shown in the following table.

Name	Member of
Administrator1	Network Configuration Operators
Administrator2	Power Users
UserA	Administrators

UserA joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Users may join devices to Azure AD: This setting enables you to select the users who can register their devices as Azure AD joined devices. The default is All.

Box 2: Yes

Admin1@contoso.com is an Azure AD security administrator Security Administrator

Users with this role have permissions to manage security-related features in the Microsoft 365 Defender portal, Azure Active Directory Identity Protection, Azure Active Directory Authentication, Azure Information

Protection, and Office 365 Security & Compliance Center. This includes:

* Microsoft Defender for Endpoint Assign roles

Manage machine groups

Configure endpoint threat detection and automated remediation View, investigate, and respond to alerts

View machines/device inventory Box 3: No

Admin2@contoso.com is an Azure AD Cloud device administrator. Cloud Device Administrator

Users in this role can enable, disable, and delete devices in Azure AD and read Windows 10 BitLocker keys (if present) in the Azure portal. The role does not grant permissions to manage any other properties on the device.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal#configure-dev>

<https://docs.microsoft.com/en-us/azure/active-directory/roles/permissions-reference#security-administrator>

NEW QUESTION 256

- (Exam Topic 4)

Your on-premises network contains a database server and is accessible by using a VPN server. You have a Microsoft 365 tenant.

You manage devices by using Microsoft Endpoint Manager.

You have an application named App1 that is deployed to every computer enrolled in Microsoft Intune. Each computer has a VPN profile assigned.

You need to ensure that App1 can access only the database server. App1 must be prevented from accessing other resources on the on-premises network.

What should you modify in the VPN profile?

- A. Proxy
- B. Network traffic rules
- C. DNS Settings
- D. Conditional Access

Answer: B

Explanation:

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources. For each rule, you can specify source and destination, port, and protocol.

A network security group contains zero, or as many rules as desired, within Azure subscription limits. Reference: <https://docs.microsoft.com/en-us/azure/virtual-network/network-security-groups-overview>

NEW QUESTION 261

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot user-driven deployment profile. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/user-driven>

Windows Autopilot user-driven mode lets you configure new Windows devices to automatically transform them from their factory state to a ready-to-use state. This process doesn't require that IT personnel touch the device.

The process is very simple. Devices can be shipped or distributed to the end user directly with the following instructions:

Unbox the device, plug it in, and turn it on.

Choose a language (only required when multiple languages are installed), locale, and keyboard.

Connect it to a wireless or wired network with internet access. If using wireless, the user must establish the Wi-Fi link.

Specify your e-mail address and password for your organization account. The rest of the process is automated. The device will:

Join the organization.

Enroll in Intune (or another MDM service) Get configured as defined by the organization. Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/user-driven>

NEW QUESTION 263

- (Exam Topic 4)

In Microsoft Intune, you have the device compliance policies shown in the following table.

Name	Type	Encryption	Windows Defender antimalware	Mark device as not compliant	Assigned to
Policy1	Windows 8	Require	<i>Not applicable</i>	5 days	Group1
Policy2	Windows 10	Not configured	Require	7 days	Group2
Policy3	Windows 10	Required	Require	10 days	Group2

The Intune compliance policy settings are configured as shown in the following exhibit.

 Save

 Discard

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as 

Compliant

Not Compliant

Enhanced jailbreak detection 

Enabled

Disabled

Compliance status validity period (days) 

30

On June 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	Use BitLocker Drive Encryption (BitLocker)	Windows Defender	Member of
Device1	No	Enabled	Group1
Device2	No	Enabled	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
On June 4, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 6, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 9, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

NEW QUESTION 266

- (Exam Topic 4)

You have a Microsoft 365 subscription and several Conditional Access policies in Azure Active Directory (Azure AD) that contains the resources shown in the following table.

You need to identify which Conditional Access policies will apply to a user when the user signs in to the Microsoft Office 365 portal from a Windows 10 computer. What should you use?

- A. Event Viewer
- B. the Microsoft 365 compliance center
- C. Resultant Set of Policy (RSoP)

Answer: C
