## Exam Questions PL-100

Microsoft Power Platform App Maker

## About ExamBible

*[Your Partner of IT Exam](#)*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

### NEW QUESTION 1

- (Exam Topic 1)

You need to provide all app components of the application to Tailwind Traders. What should you do?

- A. Package the application and flow components into a single solution for export.
- B. Run the app checker and flow checker prior to publishing each component for export.
- C. Export each component separately but use the same version number for each component.
- D. Publish the application and flow solutions at the same time before exporting each one.

**Answer:** B

#### Explanation:

Scenario: When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.

Power Apps has added components to the rule set that encourages best practices in the Power Apps Checker. You can check your canvas apps and flows that are included in solutions and then review all issues in a single, consolidated report.

Reference:

<https://docs.microsoft.com/en-us/power-platform-release-plan/2019wave2/microsoft-powerapps/checker-include>

### NEW QUESTION 2

- (Exam Topic 1)

You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

#### Answer Area

Requirement	Property
Provide a visual indicator when the app is offline.	<div><div></div><div>Visible</div><div>OnSelect</div><div>DisplayMode</div><div>Fill</div></div>
Store data when the app is offline.	<div><div></div><div>OnSelect</div><div>LoadData</div><div>SubmitForm</div><div>Now</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Fill

Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.

Fill – The background color of a control. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

### NEW QUESTION 3

- (Exam Topic 1)

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.

Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

#### Tools

Solution Checker

App Checker

Object Detector

Preview the app

#### Answer Area

Requirement	Tool
Accessibility	<div>Tool</div>
Deployment	<div>Tool</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: App Checker

Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse. Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.

Box 2: Solution Checker

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.

Use solution checker to validate your model-driven apps in Power Apps. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker> <https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/use-powerapps-checker>

**NEW QUESTION 4**

- (Exam Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to true
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to false
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to false
- G. Export the app as an unmanaged solution.

**Answer: C**

**Explanation:**

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

**NEW QUESTION 5**

- (Exam Topic 2)

You need to implement logic in the app for lost sales. What should you do?

- A. Create a business process flow.
- B. Define a business rule for the Sales Log edit form.
- C. Set the required field property of the Won/Lost field to Required.
- D. Create a formula for the Description field that uses the Update function.

**Answer: B**

**Explanation:**

Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:

➤ Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

**NEW QUESTION 6**

- (Exam Topic 3)

You create a canvas app.

A user is not able to determine which field currently has focus. You run App checker to identify errors. You need to verify that the focused border thickness is set to a value greater than zero.

Which section of the App checker results should you check?

- A. Rules
- B. Performance
- C. Accessibility
- D. Runtime

**Answer: C**

**Explanation:**

The Accessibility checker classifies each issue as an error, a warning, or a tip based on the issue's severity. Issues include:

➤ Focus isn't showing

When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 7

- (Exam Topic 3)

You are configuring a new Common Data Service environment by using the Power Apps Maker portal. You need to create an entity that uses the prefix xyz. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create an entity in the new solution.

Enter the entity Display Name and use the existing prefix.

Add a new solution.

Enter the entity Display Name and modify the prefix to **xyz**.

Add a new publisher with the prefix **xyz**.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-entity>

NEW QUESTION 8

- (Exam Topic 3)

You plan to create apps for a company. You need to identify the Power Platform tools required. What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Tools

Power Virtual Agents bot

Power Automate

Canvas app

Model-driven app

Answer Area

Requirement

Create an app with a customized user interface that allows users to quickly create support tickets.

Create an app that uses a guided business process to navigate through all records associated with a support ticket.

Send an email to a customer support manager every time a support ticket is created.

Create an automated chat tool that guides a customer through the support ticket creation process.

Tool

Tool

Tool

Tool

Tool

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Canvas App  
Box 2: Model-driven app  
Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.  
Box 3: Power Automate  
Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.  
Box 4: Power Virtual Agents bot  
When you create bots with Power Virtual Agents, you author and edit topics.

NEW QUESTION 9

- (Exam Topic 3)

You are configuring security to enable users to analyze data by using Microsoft Excel templates. You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Power Apps

File

Save and Close

Actions

Help

Security role: TemplateAdministrator

Working on solutions: Default Solution

Entity	Create	Read	Write	Delete	Append	Append To	Assign	Share
Business Unit								
Channel Property Group								
Currency								
Document Template								
Mailbox Auto Tracking Folder								
Organization								
Personal Document Template								

**Privacy Related Privileges**

Enabling these privileges will allow users to extract customer data from Microsoft Dynamics 365. For more information, review the corresponding user documentation.

Document Generation		Dynamics 365 for mobile	
Export to Excel		Go Offline in Outlook	
Mail Merge		Print	
Sync to Outlook		Use Dynamics 365 App for Outlook	

**Miscellaneous Privileges**

Act on Behalf of Another User		Approve Email Addresses for Users or Queues	
Assign manager for a user		Assign position for a user	
Assign Territory to User		Bulk Edit	

**Key**

None Selected
 User
 Business Unit
 Parent: Child Business Unit
 Organization

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.  
 Which permission should you change?

▼

Bulk Edit

Export to Excel

Read on Document Template

Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.  
 Which permission should you change?

▼

Bulk Edit

Export to Excel

Read on Document Template

Read on Personal Document Template

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to ensure that User1 can see the pre-configured example templates.  
Which permission should you change?

#### NEW QUESTION 10

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen\_Accounts and add a gallery named Gallery\_Accounts to the screen. You set the data source of Gallery\_Accounts to Accounts and add another blank screen named Screen\_AccountDetail.

You need to complete the app. Solution:

- Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to View.
- Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).
- Set the data source of the form to Accounts.
- Set the Item property of the form to Selected.
- Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

#### Explanation:

View, edit, or create an item, save the contents, and reset the controls in an Edit form control. FormMode.View: The form is populated with an existing record but the user cannot modify the values of the fields.

This function is often invoked from the OnSelect formula of a Button or Image control. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

#### NEW QUESTION 10

- (Exam Topic 3)

A company uses Power Automate and Power Apps to streamline business processes. You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

#### Action

Publish the model.

Connect data to the model.

Train the model.

Use the model in a Power Automate flow.

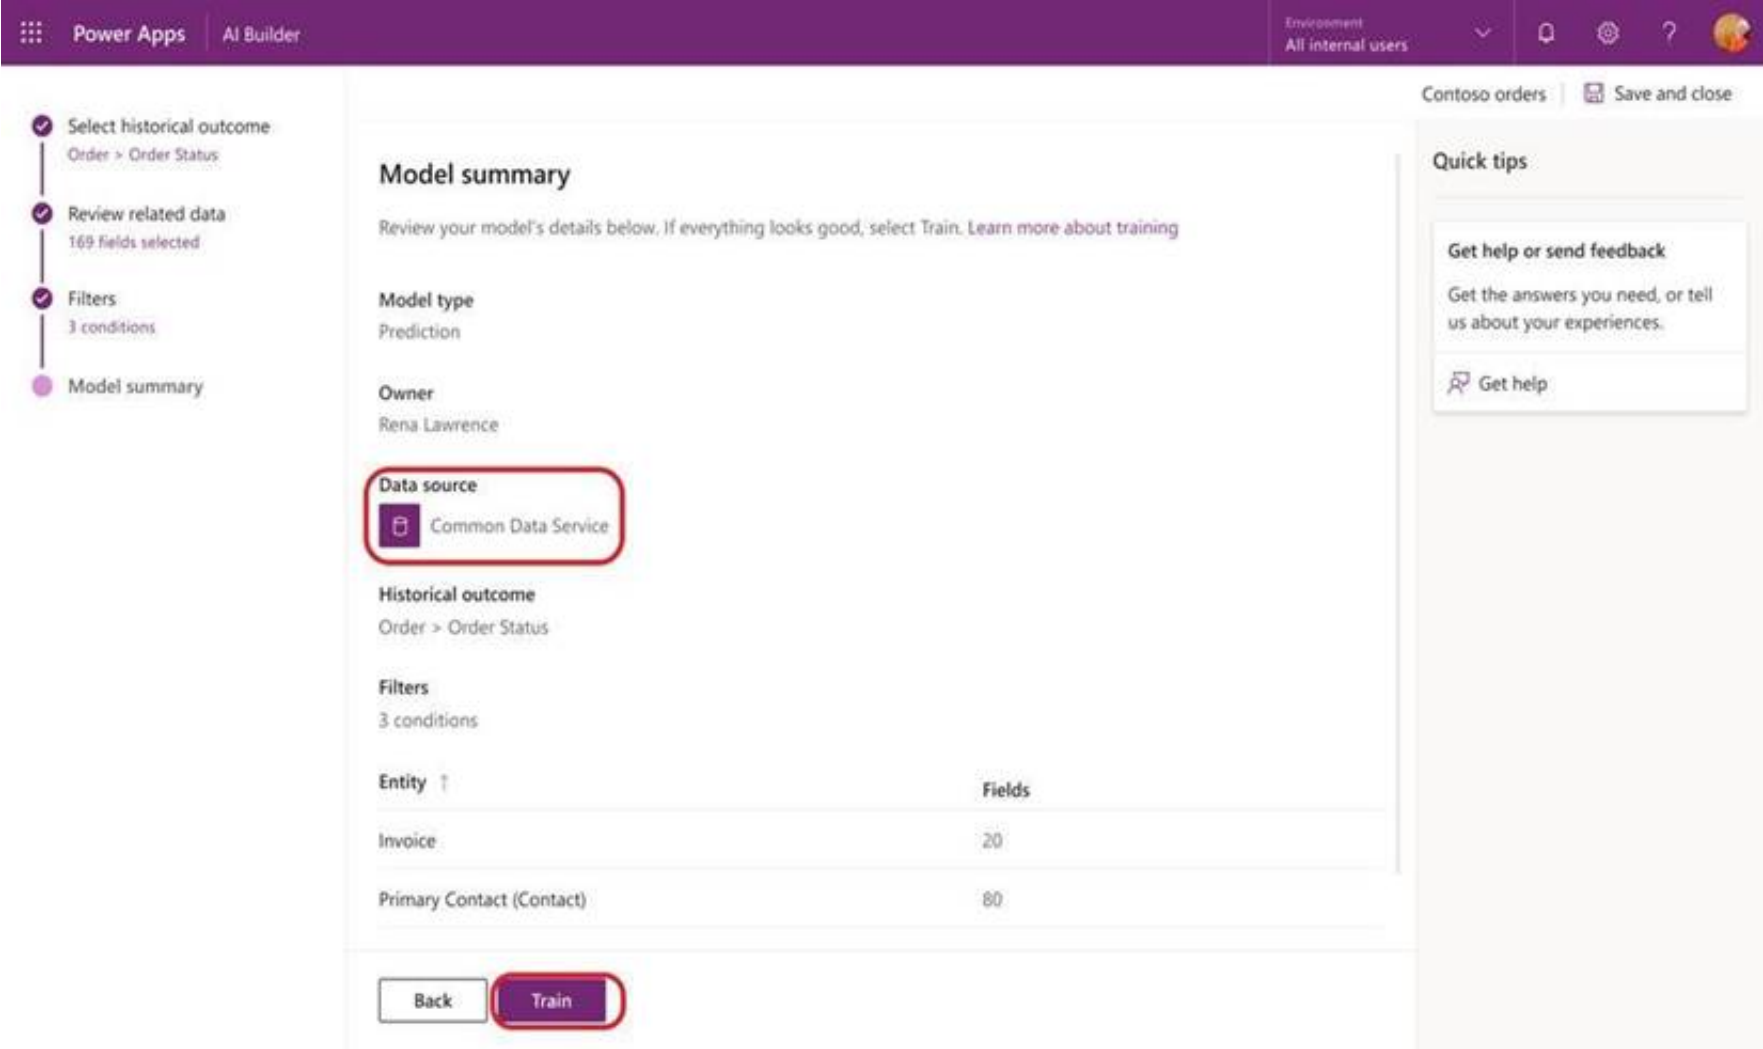

#### Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Connect data to the model.  
First create an AI Builder form processing model for the customer reviews you want to process.

Step 2: Train the model. Step 3: Publish the model.  
Step 4: Use the model in a Power Automate flow.  
Once you train and publish the model, create a solution-aware flow in Power Automate. Reference:  
<https://powerapps.microsoft.com/en-us/blog/introducing-simplified-ai-builder-experience-in-power-automate/>

NEW QUESTION 14

- (Exam Topic 3)  
You are designing a canvas app that will be used by all users including users who have vision impairments. Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Outcomes	Action	Outcome
Not visible to any users	Set the values for the X and Y properties of a control to move the control off-screen.	Outcome
Visible to sighted users only	Set the Color and other related properties of a control to transparent.	Outcome
Visible to screen-reader users only	Set the Height and Width properties of a control to 1.	Outcome
Visible to both sighted and screen-reader users		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:  
<https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps>

NEW QUESTION 19

- (Exam Topic 3)  
You are an app maker. You are creating a canvas app. You do not have access to Power BI.  
You need to add charts to the app.  
Which three chart types can you add directly to the canvas app? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. pie
- B. area
- C. funnel
- D. column

E. line

**Answer:** ADE

**Explanation:**

You can use line charts, pie charts, and bar charts to display your data in a canvas app. Add a bar chart to display your data:

\* 1. On the Home tab, add a screen.

\* 2. On the Insert tab, select Charts, and then select Column Chart. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/use-line-pie-bar-chart>

**NEW QUESTION 24**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form.

Proposed solution: Use a Category classification model. Does the solution meet the goal?

A. Yes

B. No

**Answer:** B

**Explanation:**

A Category classification model categorizes text by its meaning. Reference:

<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

**NEW QUESTION 25**

- (Exam Topic 3)

You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.

You need to pick the appropriate solution type for each requirement.

Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution types	Requirement	Solution type
Managed	Edit existing components of the solution.	Solution type
Unmanaged	Add new components to the solution.	Solution type
	Export the solution.	Solution type

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Unmanaged

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Box 2: Unmanaged

Box 3: Managed

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

**NEW QUESTION 28**

- (Exam Topic 3)

You create a canvas app for technicians at a computer store. You assign technicians cases to work on. The technicians update cases at the end of customer site visit.

The manager wants the technicians to sell warranties to the customers. If a customer agrees to purchase a warranty, technicians use the canvas app to immediately alert the sales team, and then the technician records details about the warranty into the app.

You need to create a flow to alert the sales team. Which type of trigger should you use?

A. Flow button for mobile

B. Power Apps

C. Office 365 Outlook

D. Common Data Service

**Answer:** A

**Explanation:**

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

Note: There are many repetitive tasks that we all wish we could run with just a tap of a button. For example, you may need to quickly email your team to remind them to join the daily team sync, or you may want to start a new Visual Studio Codespaces build of your code base after you've been notified that there are no more checkins planned for the day. Button flows allow you to accomplish these and many other tasks simply by tapping a button on your mobile device.

Reference:

<https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens>

**NEW QUESTION 33**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.

Does the solution meet the goal?

A. Yes

B. No

**Answer:** A

**Explanation:**

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs.

The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.

Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/> <https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

**NEW QUESTION 37**

- (Exam Topic 3)

You are an app maker.

You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution.

What should you conclude?

A. The default solution does not contain all components and customizations from all solutions in the environment.

B. The prefix used when creating components as part of the default solution can be set to a specific value.

C. The default solution cannot be exported and distributed to another environment.

**Answer:** C

**Explanation:**

Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.

Why you shouldn't use the default solutions to manage customizations

There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:

➤ The default solution can't be exported; therefore, you can't distribute the default solution to another environment.

The default solution contains all components and customizations from all solutions in the environment.

By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.

It's difficult to locate or identify the customizations you've made in the environment by using either default solution.

When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations>

**NEW QUESTION 40**

- (Exam Topic 3)

You create a Power Platform solution. Solution data is stored in a variety of documented cloud services. You must also be able to connect to one or more industry data sources.

You need to configure the data sources. What should you do?

A. Create a business process flow.

B. Create a data policy template.

C. Create a UI flow.

D. Use an existing data connector.

**Answer:** D

#### Explanation:

In Power Apps, add a data connection to an existing canvas app or to an app that you're building from scratch. Your app can connect to SharePoint, Common Data Service, Salesforce, OneDrive, or many other data sources.

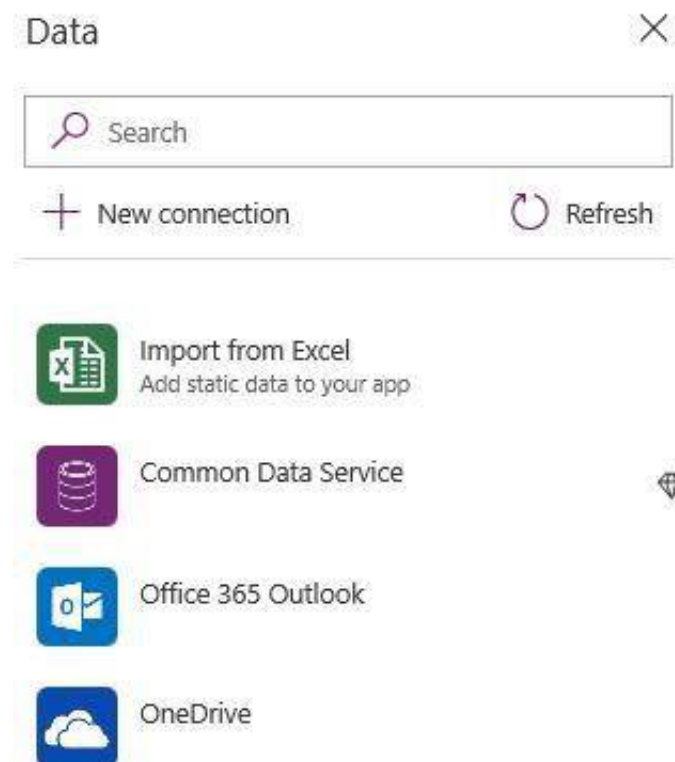

Note:

Add data source

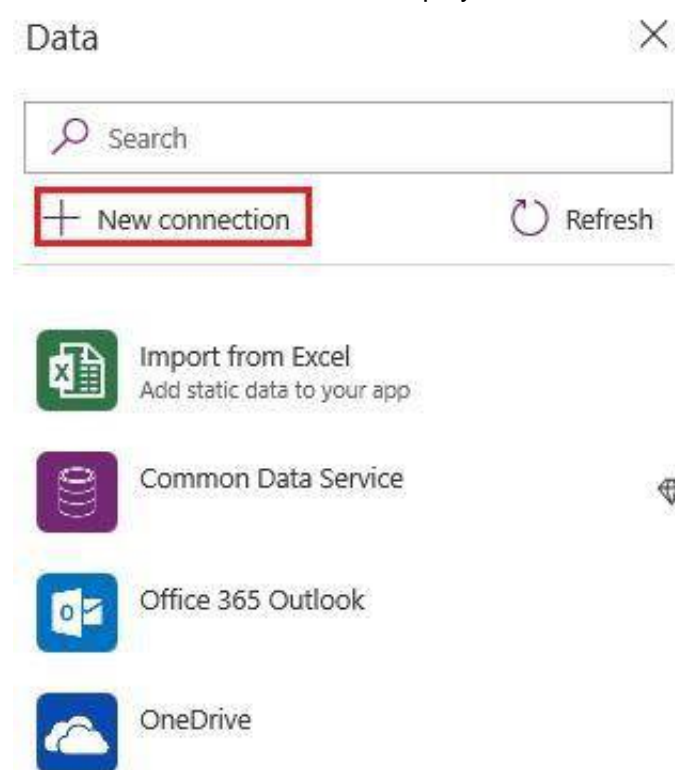

\* 1. In the center pane, select connect to data to open the Data pane.

\* 2. Select Add data source.

\* 3. If the list of connections includes the one that you want, select it to add it to the app. Otherwise, skip to the next step.

\* 4. Select New connection to display a list of connections.

\* 5. In the search bar, type or paste the first few letters of the connection you want, and then select the connection when it appears.

\* 6. Select Create to both create the connection and add it to your app. Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-data-connection>
