Exam Questions MS-101

Microsoft 365 Mobility and Security (beta)

NEW QUESTION 1

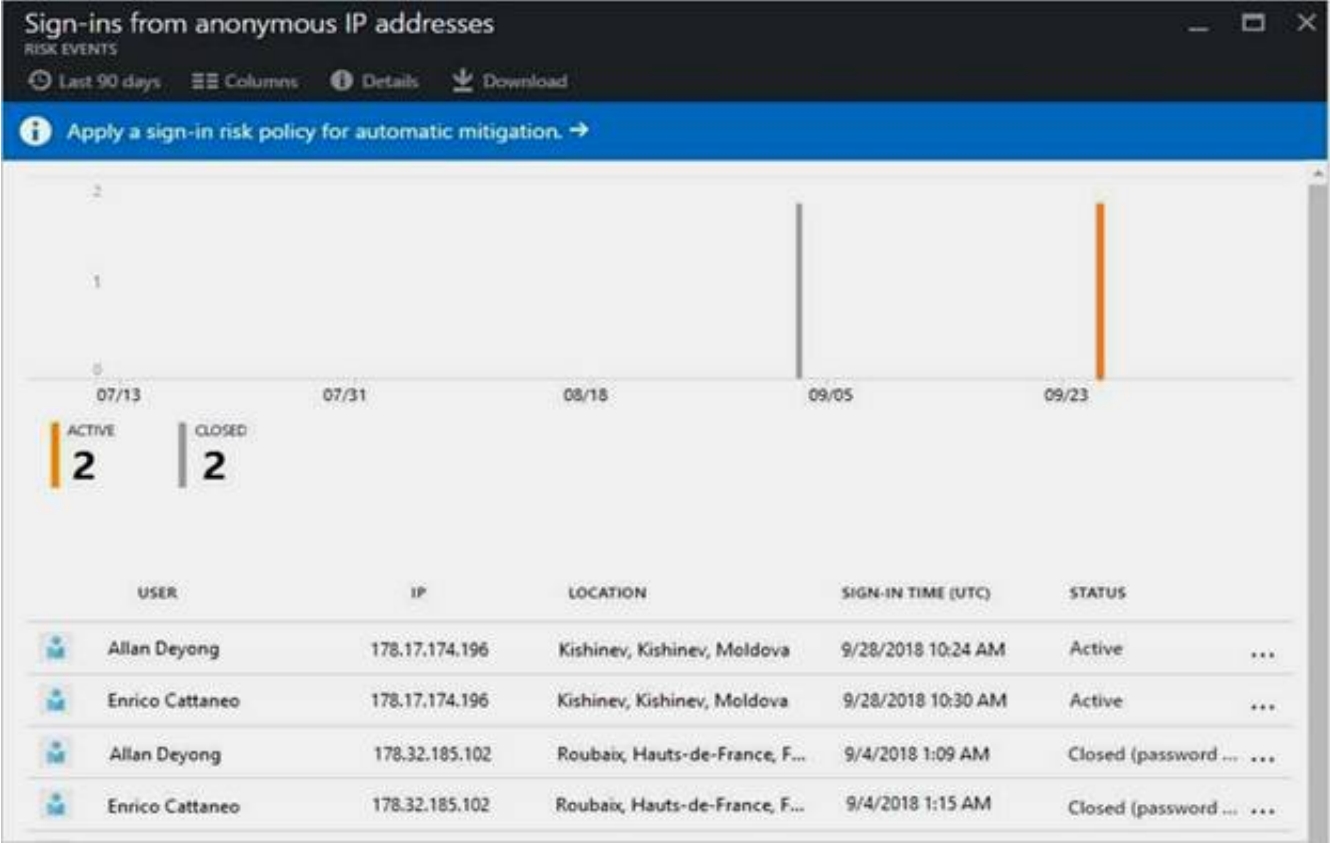

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals- Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are deploying Microsoft Intune.
You successfully enroll Windows 10 devices in Intune.
When you try to enroll an iOS device in Intune, you get an error. You need to ensure that you can enroll the iOS device in Intune. Solution: You configure the Mobility (MDM and MAM) settings. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 2

From the Microsoft Azure Active Directory (Azure AD) Identity Protection dashboard, you view the risk events shown in the exhibit. (Click the Exhibit tab.)

You need to reduce the likelihood that the sign-ins are identified at risky. What should you do?

- A. From the Security & Compliance admin center, create a classification label.
- B. From the Security & Compliance admin center, add the users to the Security Readers role group.
- C. From the Azure Active Directory admin center, configure the trusted IPs for multi-factor authentication.
- D. From the Conditional access blade in the Azure Active Directory admin center, create named locations.

NEW QUESTION 4

You have a Microsoft 365 tenant

You have a line-of-business application named App1 that users access by using the My Apps portal. After some recent security breaches, you implement a conditional access policy for App1 that uses Conditional Access App Control,

You need to be alerted by email if impossible travel is detected for a user of Appl. The solution must ensure that alerts are generated for App1 only.

What should you do?

- A. From Microsoft Cloud App Security, create a Cloud Discovery anomaly detection policy.
- B. From Microsoft Cloud App Security, modify the impossible travel alert policy.
- C. From Microsoft Cloud App Security, create an app discovery policy.
- D. From the Azure Active Directory admin center, modify the conditional access policy.

Answer: A

Case Study: 2

A. Datum Case Study: Overview

Existing Environment

This is a case study Case studies are not timed separately. You can use as much exam time as you

would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is

provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question. Current Infrastructure

A. Datum recently purchased a Microsoft 365 subscription. All user files are migrated to Microsoft 365.

All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, user1@us.adatum.com or user2#uk.ad3tum.com.

Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors.

A. Datum uses and processes Personally Identifiable Information (PII).

Problem Statements Requirements

A. Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365. Business Goals

A. Datum wants to be fully compliant with all the relevant data privacy laws in the regions where it operates.

A. Datum wants to minimize the cost of hardware and software whenever possible.

Technical Requirements

A. Datum identifies the following technical requirements:

- Centrally perform log analysis for all offices.
- Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.
- Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.
- Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.
- Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.
- If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.
- A security administrator requires a report that shows which Microsoft 36S users signed in Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.
- Ensure that the users in the New York office can only send email messages that contain sensitive US. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data.

NEW QUESTION 61

You need to meet the technical requirement for large-volume document retrieval. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
