

## PL-900 Dumps

### Microsoft Power Platform Fundamentals

<https://www.certleader.com/PL-900-dumps.html>

**NEW QUESTION 1**

You are building Power Apps apps that use both Dynamics 365 Sales and Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).	<input type="radio"/>	<input type="radio"/>
You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

When you offer your application for use by other companies through a purchase or subscription, you make your application available to customers within their own Azure tenants. This is known as creating a multi-tenant application.

Box 2: No

**NEW QUESTION 2**

A user is trying to understand the differences between the various ways apps can be built by using Power Apps.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can embed canvas apps in model-driven apps.	<input type="radio"/>	<input type="radio"/>
A Power Apps portal can use only one data source.	<input type="radio"/>	<input type="radio"/>
You must use Power BI to create reports in model-driven apps.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

You can create a canvas app and then embed that within a model driven app. Box 2: No

With the capability to build a portal in PowerApps, you can create a website for external and internal users enabling them to interact with data stored in Common Data Service.

Note: Common Data Service lets you securely store and manage data that's used by business applications. Data within Common Data Service is stored within a set of entities. An entity is a set of records used to store data, similar to how a table stores data within a database. Common Data Service includes a base set of standard entities that cover typical scenarios, but you can also create custom entities specific to your organization and populate them with data using Power Query. App makers can then use PowerApps to build rich applications using this data.

Box 3: Yes

To get started building a report you'll need the latest version of Power BI Desktop and a PowerApps environment with the latest version of the Common Data

Service.

**NEW QUESTION 3**

You use Microsoft Flow to create a flow that automatically sends email to a project manager when project team members mark a task as complete. Project team members are prematurely marking tasks as complete. You must add quality control into the process by sending an email to a project lead for confirmation that the task is in fact complete before sending the email to the project manager. You need to modify the flow. Which component should you use?

- A. a process argument
- B. a condition
- C. an expression
- D. a trigger
- E. an action

**Answer:** B

**Explanation:**

Use a condition and set the action to send an email.

**NEW QUESTION 4**

A company is building a Power Apps portal. You need to select out-of-the-box portal types to meet the company's requirements. Which portal types should you use? To answer, drag the appropriate portal types to the correct requirements. Each portal type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Portal types	Requirement	Portal type
partner portal		
community portal	Collaboratively onboard new suppliers and distributors.	Portal type
portal from blank	Publish a blog post announcing new suppliers.	Portal type
customer self-service portal		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Partner portal

A partner portal allows every organization with resellers, distributors, suppliers, or partners to have real-time access to every stage of shared activities.

Box 2: Community portal

A community portal leverages peer-to-peer interactions between customers and experts to organically grow the catalog of available knowledge from knowledge base articles, forums, and blogs as well as providing feedback through comments and ratings.

**NEW QUESTION 5**

You create a user-owned custom entity by using Common Data Service. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	<input type="radio"/>	<input type="radio"/>
You can create a business rule for a custom entity that can be used in a Flow.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.

Box 2: Yes

By combining conditions and actions, you can do any of the following with business rules: Set field values

Clear field values

Set field requirement levels Show or hide fields

Enable or disable fields

Validate data and show error messages

Create business recommendations based on business intelligence.

**NEW QUESTION 6**

A toy company creates a text classification model in AI Builder to monitor customer feedback for specific key words.

When negative feedback is received for a toy, the company wants to proactively perform engineering reviews for the toy and schedule additional training sessions for workers who produce the toy.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a canvas app.
- B. Implement the Virtual Agent.
- C. Build a Microsoft Flow.
- D. Use the Common Data Model.

**Answer:** AC

**Explanation:**

A (not D): AI Builder comes with:

A ready-to-use business card reader available in canvas as well as in model-driven apps. Business card reader (Canvas)

Business card reader (Model-driven)

Additional canvas components to leverage your AI Builder form processing or object detection models canvas apps.

C: Use the results from your AI model across Power Platform to create end-to-end solutions that meet your business needs, even if you have no coding skills. For example, create a flow that automates document processing in Power Automate, or an app created with PowerApps that predicts whether a supplier will be out of compliance.

**NEW QUESTION 7**

You need to explain the major components of the Common Data Model (CDM) and their functions. Match each term to its definition.

Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.

NOTE: Each correct selection is worth one point.

Tools	Answer Area	
	Purpose	Tool
Entities		
Data connectors	Helps jumpstart application development by leveraging business logic, security, and integrations.	Tool
Common Data Service	A set of records used to store data.	Tool
Common Data Model		
Microsoft Power Platform		
Workflows		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Microsoft Power Platform

Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform – providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.

The Microsoft Power platform brings all your data together into a common data model. Box 2: Entities

An entity is a set of records used to store data, similar to how a table stores data within a database.

**NEW QUESTION 8**

A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.

The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.

You need to recommend a tool to determine software usage. What should you recommend?

- A. Microsoft Intune
- B. Azure Stream Analytics
- C. Power Platform Analytics
- D. Dynamics 365 Product Insights

**Answer:** C

**Explanation:**

The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users across all apps in the environment. Admins can filter the view with attributes like device platform, player version, country, state, and city.

**NEW QUESTION 9**

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.

You need to recommend a solution for the coworker. What should you recommend?

- A. Create a custom connector.
- B. Ask the outside source to send you the data once a week.
- C. Use Microsoft Flow to connect to the database.
- D. Open a ticket with Microsoft and request a new connector.
- E. Use Microsoft Azure Service Bus.

**Answer:** A

**Explanation:**

There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector.

Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

**NEW QUESTION 10**

You need to implement Microsoft Business Applications along with the Microsoft Power platform. Which three Microsoft products are part of the Power platform?

Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Microsoft Power Apps
- B. Azure Active Directory
- C. Microsoft Flow
- D. Azure Machine Learning
- E. Microsoft Power BI

**Answer:** ACE

**Explanation:**

The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

**NEW QUESTION 10**

A company plans to create an information portal that managers can use to view critical information about their teams.

You need to recommend the type of Power BI components that the company should use.

What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE. Each correct selection is worth one point.

**Component types**

**Answer Area**

Dashboard

Report

**Requirement**

Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.

Display the top departmental goal metrics and alert users when specific thresholds targets are met.

Display Sales charts that can be filtered by region.

**Component type**

Component type

Component type

Component type

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Report

Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Box 2: Dashboard  
Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.

Box 3: Report

Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.

Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

**NEW QUESTION 11**

A company plans to use Power BI to visualize data from business systems.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Statement**

**Yes**

**No**

You can display data aggregates and raw data in a Power BI report.

You can display related data from Dynamics 365 Customer Engagement and Excel in the same Power BI report.

You create a Power App to supply data for a Power BI report. You can modify the data directly in the report.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

The following list provides advantages to using aggregations:

Query performance over big data - as users interact with visuals on Power BI reports, DAX queries are submitted to the dataset. Boost query speeds by caching data at the aggregated level, using a fraction of the resources required at the detail level. Unlock big data in a way that would otherwise be impossible.

Box 2: No

You can connect to model-driven apps in Dynamics 365 with Power BI Desktop to create custom reports and dashboards for use with the Power BI service.

You can use similar steps to connect to model-driven apps in Dynamics 365 using Office Excel Power Query by selecting From Other Sources on the Power Query tab in Excel.

Box 3: Yes

Using the PowerApps custom visual, you will be able to pass context aware data to a PowerApps app which updates in real time as you make changes to your report.

**NEW QUESTION 15**

A bank uses Power Platform apps and flows to support business processes.

The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.

You need to use AI Builder to implement the solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area
Publish the model.		
Export data into AI Builder.		
Train the model.	 	 
Import data into Common Data Service.		
Use the model in PowerApps or Microsoft Flow.		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Import data into Common Data Service.

AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.

Step 2: Train the model Step 3: Publish the model

The last step is to publish your model.

Step 4: Use the model in PowerApps or Microsoft Flow.

**NEW QUESTION 16**

A company uses Dynamics 365 Sales. The company uses a browser-based app named Sales Hub. You need ensure that users can access data from mobile devices.

Which app should users install?

- A. Dynamics 365 Remote Assist
- B. Dynamics 365 Finance
- C. Dynamics 365 Business Central
- D. Dynamics 365 for Phones

**Answer:** D

**Explanation:**

Use the Dynamics 365 for phones and Dynamics 365 for tablets apps for your sales, customer service, field service, and other tasks when you're on the go. With one download from your app store, you'll automatically have access to all the apps you need for your role. You will see apps with the new Unified Interface on your mobile device.

**NEW QUESTION 21**

Users within a company use Flow for personal productivity.

Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.

You need to ensure that users can revert a flow to the current state.

Which two options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Export
- B. Rename
- C. Save As
- D. Share

**Answer:** AC

**Explanation:**

A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.  
 C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.  
 Here's how:  
 Go to your My flows page. Click on the More (...) menu item next to the flow that you want to create a copy of. Click on the Save As command.

**NEW QUESTION 26**

A business is evaluating AI Builder. Which actions can you perform?  
 For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and perform sentiment analysis for ServiceNow incidents.	<input type="radio"/>	<input type="radio"/>
You can tag Instagram posts that mention your new product.	<input type="radio"/>	<input type="radio"/>
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Statement	Yes	No
You can use a text classification model in AI Builder to retrieve text and perform sentiment analysis for ServiceNow incidents.	<input checked="" type="radio"/>	<input type="radio"/>
You can tag Instagram posts that mention your new product.	<input checked="" type="radio"/>	<input type="radio"/>
You can send results about the number of mentions of your new product in Instagram to Power BI for inclusion on a dashboard.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 28**

A distribution company has multiple warehouses.  
 Tax rates charged on sales orders need to be calculated based on locality and region. You need to recommend a cost-effective solution that can be implemented quickly. What should you recommend?

- A. Check AppSource for a tax add-on.
- B. Create alerts in Dynamics 365 Finance for tax table changes.
- C. Implement the Common Data Model.
- D. Run a Power BI report.
- E. Write scripts and code tax updates.

**Answer:** B

**NEW QUESTION 29**

You create a business rule on contact entity to enforce the requirement that users must enter either a telephone number, fax number, or an email when creating a new record.

The company decides to remove fax number from the condition. You need to update the business rule. What are two ways of achieving the goal? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. Save a copy of the rule and change the condition.
- B. Deactivate and delete the original rule.
- C. Deactivate the business rule and change the condition.
- D. Take a snapshot of the business rule and change the condition.
- E. Change the condition and activate the change.

**Answer:** AD

**NEW QUESTION 32**

A company uses a third party application and an approval process via email. At the end of the month, the IT department enters the data into Microsoft Excel to create pivot charts. The Excel pivot charts must use the same data source as Dynamics 365 Field Service to generate charts and reports. You need to recommend a solution. What should you recommend? To answer, select the appropriate configuration in the answer area.  
NOTE: Each correct selection is worth one point.

**Requirement**

Create an approval workflow.

**Solution**

▼
Dynamics 365 Workflow Notifications
Microsoft Outlook Integration
AI Builder
Microsoft Flow

Connect to report data.

▼
Common Data Service and Power BI
Third-party from AppSource
Custom Code flat file integration
Dynamics 365 Field Service

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Dynamics 365 Workflow notifications

You can configure the system to send email messages to users when workflow-related events occur. Note:

- Go to Navigation pane > Modules > System administration > Users > Users.
- In the list, find and select the desired record.
- On the Action pane, click User options.
- Click the Workflow tab. Make sure that the Notifications section is expanded. In the Notifications section, you can specify how you want the user to be notified about workflow-related events.

Box 2: Dynamics 365 Field Service

Supply Chain Management enables synchronization of business processes between Dynamics 365 Supply Chain Management and Dynamics 365 Field Service. The integration scenarios are configured by using extensible Data integrator templates and Common Data Service to enable the synchronization of business processes. Standard templates can be used to create custom integration projects, where additional standard and custom fields and entities can be mapped to adjust the integration and meet specific business needs.

**NEW QUESTION 34**

You need to use Microsoft Flow to perform data-management tasks when users interact with the sales opportunities in Dynamics 365. Which three types of triggers can you use? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. record requested
- B. record deletion
- C. record creation
- D. record updated
- E. record selected

**Answer:** BCD

**Explanation:**

Triggers like When a record is created, When a record is updated, and When a record is deleted initiate your

**NEW QUESTION 38**

This question requires that you evaluate the BOLD text to determine if it is correct.

A company requires that service representatives schedule customer visits every six months. Each service representative is required to enter a scheduled task for the next checkup as they are leaving a client site. A service representative wants to automate task entry by creating a business process flow that can be initiated from the service call screen on a phone.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. a scheduled
- C. an instant
- D. an action

**Answer:** D

**Explanation:**

Note: Create a flow (see step 6 below)

- 1). Sign in to PowerApps.
  - 2). In the left navigation bar, select Business logic, and then select Flows.
  - 3). In the upper-left corner of the My Flows page, select New, and then select Create from blank.
  - 4). Option to create a flow without using a template
- Near the bottom of the page that appears, select Search hundreds of connections and triggers.
- 5). In the search box, type PowerApps, and then select the PowerApps icon.
  - 6). Create a PowerApps trigger
  - 7). On the next page, select the PowerApps icon again, and then select New step.
  - 8). In the box that says Search connectors and actions, specify an action for your flow, as in this example:

**NEW QUESTION 42**

You are new to working with Microsoft Flow. You create a flow that extracts birth dates for users and then sends a birthday greeting email to users on their birthday.

The flow does not properly extract birth dates. Where should you make changes?

- A. Connectors
- B. Expression
- C. Templates

**Answer:** A

**Explanation:**

Select the new Date Time connector. There you will see all of the actions, which help you to convert time zones to format them for local time in an email, add or subtract times, or just get the current time.

**NEW QUESTION 46**

A company uses Power Apps.

You need to perform administrative tasks for the company.

Which admin centers should you use? To answer, drag the appropriate admin centers to the correct requirements. Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Admin centers**

- Azure Active Directory
- Dynamics 365 Admin center
- Power Apps Admin center
- Power BI Admin portal

**Answer Area**

- Requirement**
- Create user accounts for Power Apps.
  - Assign the Environment Maker role to a user.

**Admin center**

- Admin center
- Admin center

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Azure Active Directory

Create the company users in the Azure Active Directory. Box 2: Power Apps admin center

In the Power Apps Admin center, manage environments that you've created and those for which you have been added to the Environment Admin or System Administrator role. From the admin center, you can perform these administrative actions:

Create environments. Rename environments.

Add or remove a user or group from either the Environment Admin or Environment Maker role. Etc.

**NEW QUESTION 49**

A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.

Match each option to its answer.

Instructions: To answer, drag the appropriate app type from the column on the left to its definition on the right. Each app type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

**App types**

- model-driven
- dashboard
- dataset
- canvas

**Answer Area**

- Definition**
- Quickly create apps for very complex business processes with very little or no code.
  - Create simple apps with a highly customizable user interface layouts.

**App type**

- App type
- App type

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: canvas

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources. Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model – building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.

Box 2: model-driven

**NEW QUESTION 51**
