About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

In the event of a data breach, which type of information are data controllers NOT required to provide to either the supervisory authorities or the data subjects?

- A. The predicted consequences of the breach.
- B. The measures being taken to address the breach.
- C. The type of security safeguards used to protect the data.
- D. The contact details of the appropriate data protection officer.

Answer: D

NEW QUESTION 2

SCENARIO

Please use the following to answer the next question:

ABC Hotel Chain and XYZ Travel Agency are U.S.-based multinational companies. They use an internet-based common platform for collecting and sharing their customer data with each other, in order to integrate their marketing efforts. Additionally, they agree on the data to be stored, how reservations will be booked and confirmed, and who has access to the stored data.

Mike, an EU resident, has booked travel itineraries in the past through XYZ Travel Agency to stay at ABC Hotel Chain's locations. XYZ Travel Agency offers a rewards program that allows customers to sign up to accumulate points that can later be redeemed for free travel. Mike has signed the agreement to be a rewards program member.

Now Mike wants to know what personal information the company holds about him. He sends an email requesting access to his data, in order to exercise what he believes are his data subject rights.

What are ABC Hotel Chain and XYZ Travel Agency's roles in this relationship?

- A. ABC Hotel Chain is the controller and XYZ Travel Agency is the processor.
- B. XYZ Travel Agency is the controller and ABC Hotel Chain is the processor.
- C. ABC Hotel Chain and XYZ Travel Agency are independent controllers.
- D. ABC Hotel Chain and XYZ Travel Agency are joint controllers.

Answer: A

NEW QUESTION 3

A German data subject was the victim of an embarrassing prank 20 years ago. A newspaper website published an article about the prank at the time, and the article is still available on the newspaper's website. Unfortunately, the prank is the top search result when a user searches on the victim's name. The data subject requests that SearchCo delist this result. SearchCo agrees, and instructs its technology team to avoid scanning or indexing the article. What else must SearchCo do?

- A. Notify the newspaper that its article it is delisting the article.
- B. Fully erase the URL to the content, as opposed to delist which is mainly based on data subject's name.
- C. Identify other controllers who are processing the same information and inform them of the delisting request.
- D. Prevent the article from being listed in search results no matter what search terms are entered into the search engine.

Answer: A

NEW QUESTION 4

SCENARIO

Please use the following to answer the next question:

WonderkKids provides an online booking service for childcare. Wonderkids is based in France, but hosts its website through a company in Switzerland. As part of their service, WonderKids will pass all personal data provided to them to the childcare provider booked through their system. The type of personal data collected on the website includes the name of the person booking the childcare, address and contact details, as well as information about the children to be cared for including name, age, gender and health information. The privacy statement on Wonderkids' website states the following:

"WonderkKids provides the information you disclose to us through this website to your childcare provider for scheduling and health and safety reasons. We may also use your and your child's personal information for our own legitimate business purposes and we employ a third-party website hosting company located in Switzerland to store the data. Any data stored on equipment located in Switzerland meets the European Commission provisions for guaranteeing adequate safeguards for you and your child's personal information. We will only share you and your child's personal information with businesses that we see as adding real value to you. By providing us with any personal data, you consent to its transfer to affiliated businesses and to send you promotional offers."

"We may retain you and your child's personal information for no more than 28 days, at which point the data will be depersonalized, unless your personal information is being used for a legitimate business purpose beyond 28 days where it may be retained for up to 2 years."

"We are processing you and your child's personal information with your consent. If you choose not to provide certain information to us, you may not be able to use our services. You have the right to: request access to you and your child's personal information; rectify or erase you or your child's personal information; the right to correction or erasure of you and/or your child's personal information; object to any processing of you and your child's personal information. You also have the right to complain to the supervisory authority about our data processing activities."

What additional information must Wonderkids provide in their Privacy Statement?

- A. How often promotional emails will be sent.
- B. Contact information of the hosting company.
- C. Technical and organizational measures to protect data.
- D. The categories of recipients with whom data will be shared.

Answer: B

NEW QUESTION 5

SCENARIO

Please use the following to answer the next QUESTION NO:

Louis, a long-time customer of Bedrock Insurance, was involved in a minor car accident a few months ago. Although no one was hurt, Louis has been plagued by texts and calls from a company called Accidentable offering to help him recover compensation for personal injury. Louis has heard about insurance companies selling customers' data to third parties, and he's convinced that Accidentable must have gotten his information from Bedrock Insurance.

Louis has also been receiving an increased amount of marketing information from Bedrock, trying to sell him their full range of their insurance policies.

Perturbed by this, Louis has started looking at price comparison sites on the internet and has been shocked to find that other insurers offer much cheaper rates than Bedrock, even though he has been a loyal customer for many years. When his Bedrock policy comes up for renewal, he decides to switch to Zantrum Insurance.

In order to activate his new insurance policy, Louis needs to supply Zantrum with information about his No Claims bonus, his vehicle and his driving history. After researching his rights under the GDPR, he writes to ask Bedrock to transfer his information directly to Zantrum. He also takes this opportunity to ask Bedrock to stop using his personal data for marketing purposes.

Bedrock supplies Louis with a PDF and XML (Extensible Markup Language) versions of his No Claims Certificate, but tells Louis it cannot transfer his data directly to Zantrum as this is not technically feasible. Bedrock also explains that Louis's contract included a provision whereby Louis agreed that his data could be used for marketing purposes; according to Bedrock, it is too late for Louis to change his mind about this. It angers Louis when he recalls the wording of the contract, which was filled with legal jargon and very confusing.

In the meantime, Louis is still receiving unwanted calls from Accidentable Insurance. He writes to Accidentable to ask for the name of the organization that supplied his details to them. He warns Accidentable that he plans to complain to the data protection authority, because he thinks their company has been using his data unlawfully. His letter states that he does not want his data being used by them in any way.

Accidentable's response letter confirms Louis's suspicions. Accidentable is Bedrock Insurance's wholly owned subsidiary, and they received information about Louis's accident from Bedrock shortly after Louis submitted his accident claim. Accidentable assures Louis that there has been no breach of the GDPR, as Louis's contract included, a provision in which he agreed to share his information with Bedrock's affiliates for business purposes.

Louis is disgusted by the way in which he has been treated by Bedrock, and writes to them insisting that all his information be erased from their computer system. Based on the GDPR's position on the use of personal data for direct marketing purposes, which of the following is true about Louis's rights as a data subject?

- A. Louis does not have the right to object to the use of his data because he previously consented to it.
- B. Louis has the right to object at any time to the use of his data and Bedrock must honor his request to cease use.
- C. Louis has the right to object to the use of his data, unless his data is required by Bedrock for the purpose of exercising a legal claim.
- D. Louis does not have the right to object to the use of his data if Bedrock can demonstrate compelling legitimate grounds for the processing.

Answer: B

NEW QUESTION 6

Please use the following to answer the next question:

WonderkKids provides an online booking service for childcare. Wonderkids is based in France, but hosts its website through a company in Switzerland. As part of their service, WonderKids will pass all personal data

provided to them to the childcare provider booked through their system. The type of personal data collected on the website includes the name of the person booking the childcare, address and contact details, as well as information about the children to be cared for including name, age, gender and health information.

The privacy statement on Wonderkids' website states the following:

"WonderkKids provides the information you disclose to us through this website to your childcare provider for scheduling and health and safety reasons. We may also use your and your child's personal information for our own legitimate business purposes and we employ a third-party website hosting company located in Switzerland to store the data. Any data stored on equipment located in Switzerland meets the European Commission provisions for guaranteeing adequate safeguards for you and your child's personal information. We will only share you and your child's personal information with businesses that we see as adding real value to you. By providing us with any personal data, you consent to its transfer to affiliated businesses and to send you promotional offers."

"We may retain you and your child's personal information for no more than 28 days, at which point the data will be depersonalized, unless your personal information is being used for a legitimate business purpose beyond 28 days where it may be retained for up to 2 years."

"We are processing you and your child's personal information with your consent. If you choose not to provide certain information to us, you may not be able to use our services. You have the right to: request access to you and your child's personal information; rectify or erase you or your child's personal information; the right to correction or erasure of you and/or your child's personal information; object to any processing of you and your child's personal information. You also have the right to complain to the supervisory authority about our data processing activities."

What direct marketing information can WonderKids send by email without prior consent of the person booking the childcare?

- A. No marketing information at all.
- B. Any marketing information at all.
- C. Marketing information related to other business operations of WonderKids.
- D. Marketing information for products or services similar to those purchased from WonderKids.

Answer: C

NEW QUESTION 7

When does the GDPR provide more latitude for a company to process data beyond its original collection purpose?

- A. When the data has been pseudonymized.
- B. When the data is protected by technological safeguards.
- C. When the data serves legitimate interest of third parties.
- D. When the data subject has failed to use a provided opt-out mechanism.

Answer: C

NEW QUESTION 8

What is one major goal that the OECD Guidelines, Convention 108 and the Data Protection Directive (Directive 95/46/EC) all had in common but largely failed to achieve in Europe?

- A. The establishment of a list of legitimate data processing criteria
- B. The creation of legally binding data protection principles
- C. The synchronization of approaches to data protection
- D. The restriction of cross-border data flow

Answer: D

NEW QUESTION 9

SCENARIO

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it

blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

Bob, the President of Who-R-U, thinks there is a lot of interest for the product in the EU, and the company is exploring a number of plans to expand its customer base.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

If Who-R-U adopts the We-Track-U pilot plan, why is it likely to be subject to the territorial scope of the GDPR?

- A. Its plan would be in the context of the establishment of a controller in the Union.
- B. It would be offering goods or services to data subjects in the Union.
- C. It is engaging in commercial activities conducted in the Union.
- D. It is monitoring the behavior of data subjects in the Union.

Answer: D

NEW QUESTION 10

To receive a preliminary interpretation on provisions of the GDPR, a national court will refer its case to which of the following?

- A. The Court of Justice of the European Union.
- B. The European Data Protection Supervisor.
- C. The European Court of Human Rights.
- D. The European Data Protection Board.

Answer: A

NEW QUESTION 10

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

For what reason would JaphSoft be considered a controller under the GDPR?

- A. It determines how long to retain the personal data collected.
- B. It has been provided access to personal data in the MarketIQ database.
- C. It uses personal data to improve its products and services for its client-base through machine learning.
- D. It makes decisions regarding the technical and organizational measures necessary to protect the personal data.

Answer: D

NEW QUESTION 14

Article 9 of the GDPR lists exceptions to the general prohibition against processing biometric data. Which of the following is NOT one of these exceptions?

- A. The processing is done by a non-profit organization and the results are disclosed outside the organization.
- B. The processing is necessary to protect the vital interests of the data subject when he or she is incapable of giving consent.
- C. The processing is necessary for the establishment, exercise or defense of legal claims when courts are acting in a judicial capacity.
- D. The processing is explicitly consented to by the data subject and he or she is allowed by Union or Member State law to lift the prohibition.

Answer: A

NEW QUESTION 18

Read the following steps:

- Discover which employees are accessing cloud services and from which devices and apps Lock down the data in those apps and devices
- Monitor and analyze the apps and devices for compliance
- Manage application life cycles
- Monitor data sharing

An organization should perform these steps to do which of the following?

- A. Pursue a GDPR-compliant Privacy by Design process.
- B. Institute a GDPR-compliant employee monitoring process.
- C. Maintain a secure Bring Your Own Device (BYOD) program.
- D. Ensure cloud vendors are complying with internal data use policies.

Answer: C

NEW QUESTION 19

The GDPR requires controllers to supply data subjects with detailed information about the processing of their data. Where a controller obtains data directly from data subjects, which of the following items of information does NOT legally have to be supplied?

- A. The recipients or categories of recipients.
- B. The categories of personal data concerned.
- C. The rights of access, erasure, restriction, and portability.
- D. The right to lodge a complaint with a supervisory authority.

Answer: B

NEW QUESTION 21

SCENARIO

Please use the following to answer the next question:

Sandy recently joined Market4U, an advertising technology company founded in 2016, as their VP of Privacy and Data Governance. Through her first initiative in conducting a data inventory, Sandy learned that Market4U maintains a list of 19 million global contacts that were collected throughout the course of Market4U's existence. Knowing the risk of having such a large amount of data, Sandy wanted to purge all contacts that were entered into Market4U's systems prior to May 2018, unless such contacts had a more recent interaction with Market4U content. However, Dan, the VP of Sales, informed Sandy that all of the contacts provide useful information regarding successful marketing campaigns and trends in industry verticals for Market4U's clients.

Dan also informed Sandy that he had wanted to focus on gaining more customers within the sports and entertainment industry. To assist with this behavior, Market4U's marketing team decided to add several new fields to Market4U's website forms, including forms for downloading white papers, creating accounts to participate in Market4U's forum, and attending events. Such fields include birth date and salary.

What is the best way that Sandy can gain the insights that Dan seeks while still minimizing risks for Market4U?

- A. Conduct analysis only on anonymized personal data.
- B. Conduct analysis only on pseudonymized personal data.
- C. Delete all data collected prior to May 2018 after conducting the trend analysis.
- D. Procure a third party to conduct the analysis and delete the data from Market4U's systems.

Answer: A

NEW QUESTION 25

A multinational company is appointing a mandatory data protection officer. In addition to considering the rules set out in Article 37 (1) of the GDPR, which of the following actions must the company also undertake to ensure compliance in all EU jurisdictions in which it operates?

- A. Consult national derogations to evaluate if there are additional cases to be considered in relation to the matter.
- B. Conduct a Data Protection Privacy Assessment on the processing operations of the company in all the countries it operates.
- C. Assess whether the company has more than 250 employees in each of the EU member-states in which it is established.
- D. Revise the data processing activities of the company that affect more than one jurisdiction to evaluate whether they comply with the principles of privacy by design and by default.

Answer: B

NEW QUESTION 30

Which institution has the power to adopt findings that confirm the adequacy of the data protection level in a non-EU country?

- A. The European Parliament
- B. The European Commission
- C. The Article 29 Working Party
- D. The European Council

Answer: B

NEW QUESTION 33

SCENARIO

Please use the following to answer the next question:

TripBliss Inc. is a travel service company which has lost substantial revenue over the last few years. Their new manager, Oliver, suspects that this is partly due to the company's outdated website. After doing some research, he meets with a sales representative from the up-and-coming IT company Techiva, hoping that they can design a new, cutting-edge website for TripBliss Inc.'s foundering business.

During negotiations, a Techiva representative describes a plan for gathering more customer information through detailed Questionnaires, which could be used to tailor their preferences to specific travel destinations. TripBliss Inc. can choose any number of data categories – age, income, ethnicity – that would help them best accomplish their goals. Oliver loves this idea, but would also like to have some way of gauging how successful this approach is, especially since the Questionnaires will require customers to provide explicit consent to having their data collected. The Techiva representative suggests that they also run a program to analyze the

new website's traffic, in order to get a better understanding of how customers are using it. He explains his plan to place a number of cookies on customer devices. The cookies will allow the company to collect IP addresses and other information, such as the sites from which the customers came, how much time they spend on the TripBliss Inc. website, and which pages on the site they visit. All of this information will be compiled in log files, which Techiva will analyze by means of a special program. TripBliss Inc. would receive aggregate statistics to help them evaluate the website's effectiveness. Oliver enthusiastically engages Techiva for these services.

Techiva assigns the analytics portion of the project to longtime account manager Leon Santos. As is standard practice, Leon is given administrator rights to TripBliss Inc.'s website, and can authorize access to the log files gathered from it. Unfortunately for TripBliss Inc., however, Leon is taking on this new project at a time when his dissatisfaction with Techiva is at a high point. In order to take revenge for what he feels has been unfair treatment at the hands of the company, Leon asks his friend Fred, a hobby hacker, for help. Together they come up with the following plan: Fred will hack into Techiva's system and copy their log files onto a USB stick. Despite his initial intention to send the USB to the press and to the data protection authority in order to denounce Techiva, Leon experiences a crisis of conscience and ends up reconsidering his plan. He decides instead to securely wipe all the data from the USB stick and inform his manager that the company's system of access control must be reconsidered.

If TripBliss Inc. decides not to report the incident to the supervisory authority, what would be their BEST defense?

- A. The resulting obligation to notify data subjects would involve disproportionate effort.
- B. The incident resulted from the actions of a third-party that were beyond their control.
- C. The destruction of the stolen data makes any risk to the affected data subjects unlikely.
- D. The sensitivity of the categories of data involved in the incident was not substantial enough.

Answer: B

NEW QUESTION 38

In which of the following cases, cited as an example by a WP29 guidance, would conducting a single data protection impact assessment to address multiple processing operations be allowed?

- A. A medical organization that wants to begin genetic testing to support earlier research for which they have performed a DPIA.
- B. A data controller who plans to use a new technology product that has already undergone a DPIA by the product's provider.
- C. A marketing team that wants to collect mailing addresses of customers for whom they already have email addresses.
- D. A railway operator who plans to evaluate the same video surveillance in all the train stations of his company.

Answer: D

NEW QUESTION 41

SCENARIO

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

Bob, the President of Who-R-U, thinks there is a lot of interest for the product in the EU, and the company is exploring a number of plans to expand its customer base.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

Who-R-U is NOT required to notify the local German DPA about the laptop theft because?

- A. The company isn't a controller established in the Union.
- B. The laptop belonged to a company located in Canada.
- C. The data isn't considered personally identifiable financial information.
- D. There is no evidence that the thieves have accessed the data on the laptop.

Answer: A

NEW QUESTION 43

Under what circumstances might the "soft opt-in" rule apply in relation to direct marketing?

- A. When an individual has not consented to the marketing.
- B. When an individual's details are obtained from their inquiries about buying a product.
- C. Where an individual's details have been obtained from a bought-in marketing list.
- D. Where an individual is given the ability to unsubscribe from marketing emails sent to him.

Answer: B

NEW QUESTION 44

SCENARIO

Please use the following to answer the next question:

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores. Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong

Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales.

The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's Questions: on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well. The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a QUESTION, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure.

The answer is given through the figure's integrated

speakers, making it appear as though that the toy is actually responding to the child's QUESTION. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this.

In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of the home and have the character's abilities remain intact.

To ensure GDPR compliance, what should be the company's position on the issue of consent?

- A. The child, as the user of the action figure, can provide consent himself, as long as no information is shared for marketing purposes.
- B. Written authorization attesting to the responsible use of children's data would need to be obtained from the supervisory authority.
- C. Consent for data collection is implied through the parent's purchase of the action figure for the child.
- D. Parental consent for a child's use of the action figures would have to be obtained before any data could be collected.

Answer: D

NEW QUESTION 45

When collecting personal data in a European Union (EU) member state, what must a company do if it collects personal data from a source other than the data subjects themselves?

- A. Inform the subjects about the collection
- B. Provide a public notice regarding the data
- C. Upgrade security to match that of the source
- D. Update the data within a reasonable timeframe

Answer: A

NEW QUESTION 46

What must a data controller do in order to make personal data pseudonymous?

- A. Separately hold any information that would allow linking the data to the data subject.
- B. Encrypt the data in order to prevent any unauthorized access or modification.
- C. Remove all indirect data identifiers and dispose of them securely.
- D. Use the data only in aggregated form for research purposes.

Answer: A

NEW QUESTION 51

If a data subject puts a complaint before a DPA and receives no information about its progress or outcome, how long does the data subject have to wait before taking action in the courts?

- A. 1 month.
- B. 3 months.
- C. 5 months.
- D. 12 months.

Answer: B

NEW QUESTION 56

SCENARIO

Please use the following to answer the next question:

Brady is a computer programmer based in New Zealand who has been running his own business for two years. Brady's business provides a low-cost suite of services to customers throughout the European Economic Area (EEA). The services are targeted towards new and aspiring small business owners. Brady's company, called Brady Box, provides web page design services, a Social Networking Service (SNS) and consulting services that help people manage their own online stores.

Unfortunately, Brady has been receiving some complaints. A customer named Anna recently uploaded her plans for a new product onto Brady Box's chat area, which is open to public viewing. Although she realized her mistake two weeks later and removed the document, Anna is holding Brady Box responsible for not noticing the error through regular monitoring of the website. Brady believes he should not be held liable.

Another customer, Felipe, was alarmed to discover that his personal information was transferred to a third-party contractor called Hermes Designs and worries that sensitive information regarding his business plans may be misused. Brady does not believe he violated European privacy rules. He provides a privacy notice to all of his customers explicitly stating that personal data may be transferred to specific third parties in fulfillment of a requested service. Felipe says he read the privacy notice but that it was long and complicated.

Brady continues to insist that Felipe has no need to be concerned, as he can personally vouch for the integrity of Hermes Designs. In fact, Hermes Designs has taken the initiative to create sample customized banner advertisements for customers like Felipe. Brady is happy to provide a link to the example banner ads, now posted on the Hermes Designs webpage. Hermes Designs plans on following up with direct marketing to these customers.

Brady was surprised when another customer, Serge, expressed his dismay that a quotation by him is being

used within a graphic collage on Brady Box's home webpage. The quotation is attributed to Serge by first and last name. Brady, however, was not worried about any sort of litigation. He wrote back to Serge to let him know that he found the quotation within Brady Box's Social Networking Service (SNS), as Serge himself had posted the quotation. In his response, Brady did offer to remove the quotation as a courtesy.

Despite some customer complaints, Brady's business is flourishing. He even supplements his income through online behavioral advertising (OBA) via a third-party ad network with whom he has set clearly defined roles. Brady is pleased that, although some customers are not explicitly aware of the OBA, the advertisements contain useful products and services.

Based on current trends in European privacy practices, which aspect of Brady Box' Online Behavioral Advertising (OBA) is most likely to be insufficient if the company becomes established in Europe?

- A. The lack of the option to opt in.
- B. The level of security within the website.
- C. The contract with the third-party advertising network.
- D. The need to have the contents of the advertising approved.

Answer: A

NEW QUESTION 58

Which of the following is an example of direct marketing that would be subject to European data protection laws?

- A. An updated privacy notice sent to an individual's personal email address.
- B. A charity fundraising event notice sent to an individual at her business address.
- C. A service outage notification provided to an individual by recorded telephone message.
- D. A revision of contract terms conveyed to an individual by SMS from a marketing organization.

Answer: B

NEW QUESTION 63

SCENARIO

Please use the following to answer the next question:

Zandelay Fashion ('Zandelay') is a successful international online clothing retailer that employs approximately 650 people at its headquarters based in Dublin, Ireland. Martin is their recently appointed data protection officer, who oversees the company's compliance with the General Data Protection Regulation (GDPR) and other privacy legislation.

The company offers both male and female clothing lines across all age demographics, including children. In doing so, the company processes large amounts of information about such customers, including preferences and sensitive financial information such as credit card and bank account numbers.

In an aggressive bid to build revenue growth, Jerry, the CEO, tells Martin that the company is launching a new mobile app and loyalty scheme that puts significant emphasis on profiling the company's customers by analyzing their purchases. Martin tells the CEO that: (a) the potential risks of such activities means that Zandelay needs to carry out a data protection impact assessment to assess this new venture and its privacy implications; and (b) where the results of this assessment indicate a high risk in the absence of appropriate protection measures, Zandelay may have to undertake a prior consultation with the Irish Data Protection Commissioner before implementing the app and loyalty scheme.

Jerry tells Martin that he is not happy about the prospect of having to directly engage with a supervisory authority and having to disclose details of Zandelay's business plan and associated processing activities.

What would MOST effectively assist Zandelay in conducting their data protection impact assessment?

- A. Information about DPIAs found in Articles 38 through 40 of the GDPR.
- B. Data breach documentation that data controllers are required to maintain.
- C. Existing DPIA guides published by local supervisory authorities.
- D. Records of processing activities that data controllers are required to maintain.

Answer: A

NEW QUESTION 65

Which of the following countries will continue to enjoy adequacy status under the GDPR, pending any future European Commission decision to the contrary?

- A. Greece
- B. Norway
- C. Australia
- D. Switzerland

Answer: D

NEW QUESTION 67

In which situation would a data controller most likely be able to justify the processing of the data of a child without parental consent?

- A. When the data is to be processed for market research.
- B. When providing preventive or counselling services to the child.
- C. When providing the child with materials purely for educational use.
- D. When a legitimate business interest makes obtaining consent impractical.

Answer: B

NEW QUESTION 68

When assessing the level of risk created by a data breach, which of the following would NOT have to be taken into consideration?

- A. The ease of identification of individuals.
- B. The size of any data processor involved.
- C. The special characteristics of the data controller.
- D. The nature, sensitivity and volume of personal data.

Answer: B

NEW QUESTION 73

When would a data subject NOT be able to exercise the right to portability?

- A. When the processing is necessary to perform a task in the exercise of authority vested in the controller.
- B. When the processing is carried out pursuant to a contract with the data subject.
- C. When the data was supplied to the controller by the data subject.
- D. When the processing is based on consent.

Answer: A

NEW QUESTION 77

SCENARIO

Please use the following to answer the next question:

Louis, a long-time customer of Bedrock Insurance, was involved in a minor car accident a few months ago. Although no one was hurt, Louis has been plagued by texts and calls from a company called Accidentable offering to help him recover compensation for personal injury. Louis has heard about insurance companies selling customers' data to third parties, and he's convinced that Accidentable must have gotten his information from Bedrock Insurance.

Louis has also been receiving an increased amount of marketing information from Bedrock, trying to sell him their full range of their insurance policies.

Perturbed by this, Louis has started looking at price comparison sites on the internet and has been shocked to find that other insurers offer much cheaper rates than Bedrock, even though he has been a loyal customer for many years. When his Bedrock policy comes up for renewal, he decides to switch to Zantrum Insurance.

In order to activate his new insurance policy, Louis needs to supply Zantrum with information about his No Claims bonus, his vehicle and his driving history. After researching his rights under the GDPR, he writes to ask Bedrock to transfer his information directly to Zantrum. He also takes this opportunity to ask Bedrock to stop using his personal data for marketing purposes.

Bedrock supplies Louis with a PDF and XML (Extensible Markup Language) versions of his No Claims Certificate, but tells Louis it cannot transfer his data directly to Zantrum as this is not technically feasible. Bedrock also explains that Louis's contract included a provision whereby Louis agreed that his data could be used for marketing purposes; according to Bedrock, it is too late for Louis to change his mind about this. It angers Louis when he recalls the wording of the contract, which was filled with legal jargon and very confusing.

In the meantime, Louis is still receiving unwanted calls from Accidentable Insurance. He writes to Accidentable to ask for the name of the organization that supplied his details to them. He warns Accidentable that he plans to complain to the data protection authority, because he thinks their company has been using his data unlawfully. His letter states that he does not want his data being used by them in any way.

Accidentable's response letter confirms Louis's suspicions. Accidentable is Bedrock Insurance's wholly owned subsidiary, and they received information about Louis's accident from Bedrock shortly after Louis submitted his accident claim. Accidentable assures Louis that there has been no breach of the GDPR, as Louis's contract included, a provision in which he agreed to share his information with Bedrock's affiliates for business purposes.

Louis is disgusted by the way in which he has been treated by Bedrock, and writes to them insisting that all his information be erased from their computer system. Which statement accurately summarizes Bedrock's obligation in regard to Louis's data portability request?

- A. Bedrock does not have a duty to transfer Louis's data to Zantrum if doing so is legitimately not technically feasible.
- B. Bedrock does not have to transfer Louis's data to Zantrum because the right to data portability does not apply where personal data are processed in order to carry out tasks in the public interest.
- C. Bedrock has failed to comply with the duty to transfer Louis's data to Zantrum because the duty applies wherever personal data are processed by automated means and necessary for the performance of a contract with the customer.
- D. Bedrock has failed to comply with the duty to transfer Louis's data to Zantrum because it has an obligation to develop commonly used, machine-readable and interoperable formats so that all customer data can be ported to other insurers on request.

Answer: B

NEW QUESTION 81

Which of the following is NOT a role of works councils?

- A. Determining the monetary fines to be levied against employers for data breach violations of employee data.
- B. Determining whether to approve or reject certain decisions of the employer that affect employees.
- C. Determining whether employees' personal data can be processed or not.
- D. Determining what changes will affect employee working conditions.

Answer: C

NEW QUESTION 86

Company X has entrusted the processing of their payroll data to Provider Y. Provider Y stores this encrypted data on its server. The IT department of Provider Y finds out that someone managed to hack into the system and take a copy of the data from its server. In this scenario, whom does Provider Y have the obligation to notify?

- A. The public
- B. Company X
- C. Law enforcement
- D. The supervisory authority

Answer: C

NEW QUESTION 87

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a

multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father's company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company's online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers' philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer's personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out. Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland. Joe also hires his best friend's daughter, Alice, who just graduated from law school in the U.S., to be the company's new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company's operations in the European Union to the U.S. Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm. The data transfer mechanism that Alice drafted violates the GDPR because the company did not first get approval from?

- A. The Court of Justice of the European Union.
- B. The European Data Protection Board.
- C. The Data Protection Authority.
- D. The European Commission.

Answer: C

NEW QUESTION 90

How is the retention of communications traffic data for law enforcement purposes addressed by European data protection law?

- A. The ePrivacy Directive allows individual EU member states to engage in such data retention.
- B. The ePrivacy Directive harmonizes EU member states' rules concerning such data retention.
- C. The Data Retention Directive's annulment makes such data retention now permissible.
- D. The GDPR allows the retention of such data for the prevention, investigation, detection or prosecution of criminal offences only.

Answer: D

NEW QUESTION 95

A company plans to transfer employee health information between two of its entities in France. To maintain the security of the processing, what would be the most important security measure to apply to the health data transmission?

- A. Inform the data subject of the security measures in place.
- B. Ensure that the receiving entity has signed a data processing agreement.
- C. Encrypt the transferred data in transit and at rest.
- D. Conduct a data protection impact assessment.

Answer: A

NEW QUESTION 96

Which of the following describes a mandatory requirement for a group of undertakings that wants to appoint a single data protection officer?

- A. The group of undertakings must obtain approval from a supervisory authority.
- B. The group of undertakings must be comprised of organizations of similar sizes and functions.
- C. The data protection officer must be located in the country where the data controller has its main establishment.
- D. The data protection officer must be easily accessible from each establishment where the undertakings are located.

Answer: D

NEW QUESTION 98

SCENARIO

Please use the following to answer the next question:

TripBliss Inc. is a travel service company which has lost substantial revenue over the last few years. Their new manager, Oliver, suspects that this is partly due to the company's outdated website. After doing some research, he meets with a sales representative from the up-and-coming IT company Techiva, hoping that they can design a new, cutting-edge website for TripBliss Inc.'s foundering business.

During negotiations, a Techiva representative describes a plan for gathering more customer information through detailed Questionnaires, which could be used to tailor their preferences to specific travel destinations. TripBliss Inc. can choose any number of data categories – age, income, ethnicity – that would help them best accomplish their goals. Oliver loves this idea, but would also like to have some way of gauging how successful this approach is, especially since the Questionnaires will require customers to provide explicit consent to having their data collected. The Techiva representative suggests that they also run a program to analyze the new website's traffic, in order to get a better understanding of how customers are using it. He explains his plan to place a number of cookies on customer devices. The cookies will allow the company to collect IP addresses and other information, such as the sites from which the customers came, how much time they spend on the TripBliss Inc. website, and which pages on the site they visit. All of this information will be compiled in log files, which Techiva will analyze by means of a special program. TripBliss Inc. would receive aggregate statistics to help them evaluate the website's effectiveness. Oliver enthusiastically engages Techiva for these services.

Techiva assigns the analytics portion of the project to longtime account manager Leon Santos. As is standard practice, Leon is given administrator rights to TripBliss Inc.'s website, and can authorize access to the log files gathered from it. Unfortunately for TripBliss Inc., however, Leon is taking on this new project at a time when his dissatisfaction with Techiva is at a high point. In order to take revenge for what he feels has been unfair treatment at the hands of the company, Leon asks his friend Fred, a hobby hacker, for help. Together they come up with the following plan: Fred will hack into Techiva's system and copy their log files onto a USB stick. Despite his initial intention to send the USB to the press and to the data protection authority in order to denounce Techiva, Leon experiences a crisis of conscience and ends up reconsidering his plan. He decides instead to securely wipe all the data from the USB stick and inform his manager that the company's system of access control must be reconsidered.

With regard to TripBliss Inc.'s use of website cookies, which of the following statements is correct?

- A. Because not all of the cookies are strictly necessary to enable the use of a service requested from TripBliss Inc., consent requirements apply to their use of cookies.

- B. Because of the categories of data involved, explicit consent for the use of cookies must be obtained separately from customers.
- C. Because Techiva will receive only aggregate statistics of data collected from the cookies, no additional consent is necessary.
- D. Because the use of cookies involves the potential for location tracking, explicit consent must be obtained from customers.

Answer: B

NEW QUESTION 102

SCENARIO

Please use the following to answer the next question:

Sandy recently joined Market4U, an advertising technology company founded in 2016, as their VP of Privacy and Data Governance. Through her first initiative in conducting a data inventory, Sandy learned that Market4U maintains a list of 19 million global contacts that were collected throughout the course of Market4U's existence. Knowing the risk of having such a large amount of data, Sandy wanted to purge all contacts that were entered into Market4U's systems prior to May 2018, unless such contacts had a more recent interaction with Market4U content. However, Dan, the VP of Sales, informed Sandy that all of the contacts provide useful information regarding successful marketing campaigns and trends in industry verticals for Market4U's clients.

Dan also informed Sandy that he had wanted to focus on gaining more customers within the sports and entertainment industry. To assist with this behavior, Market4U's marketing team decided to add several new fields to Market4U's website forms, including forms for downloading white papers, creating accounts to participate in Market4U's forum, and attending events. Such fields include birth date and salary.

What should Sandy give as feedback to Dan and the marketing team regarding the new fields Dan wants to add to Market4U's forms?

- A. Make all the fields optional.
- B. Only request the information in brackets (i.e., age group and salary range).
- C. Eliminate the fields, as they are not proportional to the services being offered.
- D. Eliminate the fields as they are not necessary for the purposes of providing white papers or registration for events.

Answer: D

NEW QUESTION 105

Which of the following is one of the supervisory authority's investigative powers?

- A. To notify the controller or the processor of an alleged infringement of the GDPR.
- B. To require that controllers or processors adopt approved data protection certification mechanisms.
- C. To determine whether a controller or processor has the right to a judicial remedy concerning a compensation decision made against them.
- D. To require data controllers to provide them with written notification of all new processing activities.

Answer: A

NEW QUESTION 106

An unforeseen power outage results in company Z's lack of access to customer data for six hours. According to article 32 of the GDPR, this is considered a breach. Based on the WP 29's February, 2018 guidance, company Z should do which of the following?

- A. Notify affected individuals that their data was unavailable for a period of time.
- B. Document the loss of availability to demonstrate accountability
- C. Notify the supervisory authority about the loss of availability
- D. Conduct a thorough audit of all security systems

Answer: C

NEW QUESTION 110

Under the Data Protection Law Enforcement Directive of the EU, a government can carry out covert investigations involving personal data, as long it is set forth by law and constitutes a measure that is both necessary and what?

- A. Prudent.
- B. Important.
- C. Proportionate.
- D. DPA-approved.

Answer: C

NEW QUESTION 113

When is data sharing agreement MOST likely to be needed?

- A. When anonymized data is being shared.
- B. When personal data is being shared between commercial organizations acting as joint data controllers.
- C. When personal data is being proactively shared by a controller to support a police investigation.
- D. When personal data is being shared with a public authority with powers to require the personal data to be disclosed.

Answer: B

NEW QUESTION 117

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

Under the GDPR, Liem and EcoMick's contract with MarketIQ must include all of the following provisions EXCEPT?

- A. Processing the personal data upon documented instructions regarding data transfers outside of the EEA.
- B. Notification regarding third party requests for access to Liem and EcoMick's personal data.
- C. Assistance to Liem and EcoMick in their compliance with data protection impact assessments.
- D. Returning or deleting personal data after the end of the provision of the services.

Answer: C

NEW QUESTION 121

A company is located in a country NOT considered by the European Union (EU) to have an adequate level of data protection. Which of the following is an obligation of the company if it imports personal data from another organization in the European Economic Area (EEA) under standard contractual clauses?

- A. Submit the contract to its own government authority.
- B. Ensure that notice is given to and consent is obtained from data subjects.
- C. Supply any information requested by a data protection authority (DPA) within 30 days.
- D. Ensure that local laws do not impede the company from meeting its contractual obligations.

Answer: A

NEW QUESTION 126

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father's company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company's online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers' philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer's personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend's daughter, Alice, who just graduated from law school in the U.S., to be the company's new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company's operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm.

Ben's collection of additional data from customers created several potential issues for the company, which would most likely require what?

- A. New corporate governance and code of conduct.
- B. A data protection impact assessment.
- C. A comprehensive data inventory.
- D. Hiring a data protection officer.

Answer: A

NEW QUESTION 127

SCENARIO

Please use the following to answer the next question:

Due to rapidly expanding workforce, Company A has decided to outsource its payroll function to Company B.

Company B is an established payroll service provider with a sizable client base and a solid reputation in the industry.

Company B's payroll solution for Company A relies on the collection of time and attendance data obtained via a biometric entry system installed in each of Company A's factories. Company B won't hold any biometric data itself, but the related data will be uploaded to Company B's UK servers and used to provide the payroll service. Company B's live systems will contain the following information for each of Company A's employees:

- > Name
- > Address
- > Date of Birth
- > Payroll number
- > National Insurance number

- Sick pay entitlement
- Maternity/paternity pay entitlement
- Holiday entitlement
- Pension and benefits contributions
- Trade union contributions

Jenny is the compliance officer at Company A. She first considers whether Company A needs to carry out a data protection impact assessment in relation to the new time and attendance system, but isn't sure whether or not this is required.

Jenny does know, however, that under the GDPR there must be a formal written agreement requiring Company B to use the time and attendance data only for the purpose of providing the payroll service, and to apply appropriate technical and organizational security measures for safeguarding the data. Jenny suggests that Company B obtain advice from its data protection officer. The company doesn't have a DPO but agrees, in the interest of finalizing the contract, to sign up for the provisions in full. Company A enters into the contract.

Weeks later, while still under contract with Company A, Company B embarks upon a separate project meant to enhance the functionality of its payroll service, and engages Company C to help. Company C agrees to extract all personal data from Company B's live systems in order to create a new database for Company B. This database will be stored in a test environment hosted on Company C's U.S. server. The two companies agree not to include any data processing provisions in their services agreement, as data is only being used for IT testing purposes.

Unfortunately, Company C's U.S. server is only protected by an outdated IT security system, and suffers a cyber security incident soon after Company C begins work on the project. As a result, data relating to

Company A's employees is visible to anyone visiting Company C's website. Company A is unaware of this until Jenny receives a letter from the supervisory authority in connection with the investigation that ensues. As soon as Jenny is made aware of the breach, she notifies all affected employees.

Under the GDPR, which of Company B's actions would NOT be likely to trigger a potential enforcement action?

- A. Their omission of data protection provisions in their contract with Company C.
- B. Their failure to provide sufficient security safeguards to Company A's data.
- C. Their engagement of Company C to improve their payroll service.
- D. Their decision to operate without a data protection officer.

Answer: C

NEW QUESTION 129

If a company is planning to use closed-circuit television (CCTV) on its premises and is concerned with GDPR compliance, it should first do all of the following EXCEPT?

- A. Notify the appropriate data protection authority.
- B. Perform a data protection impact assessment (DPIA).
- C. Create an information retention policy for those who operate the system.
- D. Ensure that safeguards are in place to prevent unauthorized access to the footage.

Answer: C

NEW QUESTION 133

What is an important difference between the European Court of Human Rights (ECHR) and the Court of Justice of the European Union (CJEU) in relation to their roles and functions?

- A. ECHR can rule on issues concerning privacy as a fundamental right, while the CJEU cannot.
- B. CJEU can force national governments to implement and honor EU law, while the ECHR cannot.
- C. CJEU can hear appeals on human rights decisions made by national courts, while the ECHR cannot.
- D. ECHR can enforce human rights laws against governments that fail to implement them, while the CJEU cannot.

Answer: B
