Certified Data Privacy Solutions Engineer

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

When tokenizing credit card data, what security practice should be employed with the original data before it is stored in a data lake?

- A. Encoding
- B. Backup
- C. Encryption
- D. Classification

Answer: C

NEW QUESTION 2

Which of the following is the MOST important consideration when using advanced data sanitization methods to ensure privacy data will be unrecoverable?

- A. Subject matter expertise
- B. Type of media
- C. Regulatory compliance requirements
- D. Location of data

Answer: C

NEW QUESTION 3

Which of the following is the GREATEST benefit of adopting data minimization practices?

- A. Storage and encryption costs are reduced.
- B. Data retention efficiency is enhanced.
- C. The associated threat surface is reduced.
- D. Compliance requirements are met.

Answer: B

Explanation:

Unfortunately, the financial liability portion of retained personal information rarely shows up on an organization's financial balance sheet. And yet it is indeed a liability: the impact on an organization when cybercriminals steal that information or when the information is misused is real, in the form of breach response costs, the costs related to reducing harm inflicted on affected parties (think of credit monitoring services, a frequent remedy for stolen credit card numbers), fines from governmental regulators, and the occasional class-action lawsuit.

NEW QUESTION 4

Which of the following system architectures BEST supports anonymity for data transmission?

- A. Client-server
- B. Plug-in-based
- C. Front-end
- D. Peer-to-peer

Answer: A

NEW QUESTION 5

Which of the following is MOST important when developing an organizational data privacy program?

- A. Obtaining approval from process owners
- B. Profiling current data use
- C. Following an established privacy framework
- D. Performing an inventory of all data

Answer: D

NEW QUESTION 6

Which of the following hard drive sanitation methods provides an organization with the GREATEST level of assurance that data has been permanently erased?

- A. Degaussing the drive
- B. Factory resetting the drive
- C. Crypto-shredding the drive
- D. Reformatting the drive

Answer: A

NEW QUESTION 7

Which of the following zones within a data lake requires sensitive data to be encrypted or tokenized?

- A. Trusted zone
- B. Clean zone
- C. Raw zone
- D. Temporal zone

Answer: D

NEW QUESTION 8

An organization wants to ensure that endpoints are protected in line with the privacy policy. Which of the following should be the FIRST consideration?

- A. Detecting malicious access through endpoints
- B. Implementing network traffic filtering on endpoint devices
- C. Managing remote access and control
- D. Hardening the operating systems of endpoint devices

Answer: B

NEW QUESTION 9

Within a business continuity plan (BCP), which of the following is the MOST important consideration to ensure the ability to restore availability and access to personal data in the event of a data privacy incident?

- A. Offline backup availability
- B. Recovery time objective (RTO)
- C. Recovery point objective (RPO)
- D. Online backup frequency

Answer: C

NEW QUESTION 10

Which key stakeholder within an organization should be responsible for approving the outcomes of a privacy impact assessment (PIA)?

- A. Data custodian
- B. Privacy data analyst
- C. Data processor
- D. Data owner

Answer: D

NEW QUESTION 10

During which of the following system lifecycle stages is it BEST to conduct a privacy impact assessment (PIA) on a system that holds personal data?

- A. Functional testing
- B. Development
- C. Production
- D. User acceptance testing (UAT)

Answer: A

NEW QUESTION 15

Which party should data subject contact FIRST if they believe their personal information has been collected and used without consent?

- A. Privacy rights advocate
- B. Outside privacy counsel
- C. Data protection authorities
- D. The organization's chief privacy officer (CPO)

Answer: C

NEW QUESTION 17

Which of the following scenarios poses the GREATEST risk to an organization from a privacy perspective?

- A. The organization lacks a hardware disposal policy.
- B. Emails are not consistently encrypted when sent internally.
- C. Privacy training is carried out by a service provider.
- D. The organization's privacy policy has not been reviewed in over a year.

Answer: D

NEW QUESTION 21

Which of the following tracking technologies associated with unsolicited targeted advertisements presents the GREATEST privacy risk?

- A. Online behavioral tracking
- B. Radio frequency identification (RFID)
- C. Website cookies
- D. Beacon-based tracking

Answer: C

NEW QUESTION 26

Which of the following is the best reason for a health organization to use desktop virtualization to implement stronger access control to systems containing patient records?

- A. Limited functions and capabilities of a secured operating environment
- B. Monitored network activities for unauthorized use
- C. Improved data integrity and reduced effort for privacy audits
- D. Unlimited functionalities and highly secured applications

Answer: B

NEW QUESTION 30

Which of the following is a PRIMARY consideration to protect against privacy violations when utilizing artificial intelligence (AI) driven business decisions?

- A. De-identifying the data to be analyzed
- B. Verifying the data subjects have consented to the processing
- C. Defining the intended objectives
- D. Ensuring proper data sets are used to train the models

Answer: B

NEW QUESTION 32

Which of the following should be of GREATEST concern when an organization wants to store personal data in the cloud?

- A. The organization's potential legal liabilities related to the data
- B. The data recovery capabilities of the storage provider
- C. The data security policies and practices of the storage provider
- D. Any vulnerabilities identified in the cloud system

Answer: C

NEW QUESTION 37

Which of the following is MOST important when designing application programming interfaces (APIs) that enable mobile device applications to access personal data?

- A. The user's ability to select, filter, and transform data before it is shared
- B. Umbrella consent for multiple applications by the same developer
- C. User consent to share personal data
- D. Unlimited retention of personal data by third parties

Answer: C

NEW QUESTION 38

Which of the following features should be incorporated into an organization's technology stack to meet privacy requirements related to the rights of data subjects to control their personal data?

- A. Providing system engineers the ability to search and retrieve data
- B. Allowing individuals to have direct access to their data
- C. Allowing system administrators to manage data access
- D. Establishing a data privacy customer service bot for individuals

Answer: B

Explanation:

Any organization collecting information about EU residents is required to operate with transparency in collecting and using their personal information. Chapter III of the GDPR defines eight data subject rights that have become foundational for other privacy regulations around the world:
Right to access personal data. Data subjects can access the data collected on them.

NEW QUESTION 41

Which of the following is MOST important to ensure when developing a business case for the procurement of a new IT system that will process and store personal information?

- A. The system architecture is clearly defined.
- B. A risk assessment has been completed.
- C. Security controls are clearly defined.
- D. Data protection requirements are included.

Answer: D

NEW QUESTION 45

Which of the following is the PRIMARY reason that a single cryptographic key should be used for only one purpose, such as encryption or authentication?

- A. It eliminates cryptographic key collision.
- B. It minimizes the risk if the cryptographic key is compromised.
- C. It is more practical and efficient to use a single cryptographic key.
- D. Each process can only be supported by its own unique key management process.

Answer:

C

NEW QUESTION 49

An organization is concerned with authorized individuals accessing sensitive personal customer information to use for unauthorized purposes. Which of the following technologies is the BEST choice to mitigate this risk?

- A. Email filtering system
- B. Intrusion monitoring
- C. Mobile device management (MDM)
- D. User behavior analytics

Answer: B**NEW QUESTION 53**

Which of the following is the BEST way to protect the privacy of data stored on a laptop in case of loss or theft?

- A. Strong authentication controls
- B. Remote wipe
- C. Regular backups
- D. Endpoint encryption

Answer: B**NEW QUESTION 58**

Which of the following should FIRST be established before a privacy office starts to develop a data protection and privacy awareness campaign?

- A. Detailed documentation of data privacy processes
- B. Strategic goals of the organization
- C. Contract requirements for independent oversight
- D. Business objectives of senior leaders

Answer: B**NEW QUESTION 61**

Which of the following is the PRIMARY consideration to ensure control of remote access is aligned to the privacy policy?

- A. Access is logged on the virtual private network (VPN).
- B. Multi-factor authentication is enabled.
- C. Active remote access is monitored.
- D. Access is only granted to authorized users.

Answer: D**NEW QUESTION 66**

An organization uses analytics derived from archived transaction data to create individual customer profiles for customizing product and service offerings. Which of the following is the IT privacy practitioner's BEST recommendation?

- A. Anonymize personal data.
- B. Discontinue the creation of profiles.
- C. Implement strong access controls.
- D. Encrypt data at rest.

Answer: A**NEW QUESTION 69**

Which of the following MOST effectively protects against the use of a network sniffer?

- A. Network segmentation
- B. Transport layer encryption
- C. An intrusion detection system (IDS)
- D. A honeypot environment

Answer: C**NEW QUESTION 72**

Which of the following is the BEST way to validate that privacy practices align to the published enterprise privacy management program?

- A. Conduct an audit.
- B. Report performance metrics.
- C. Perform a control self-assessment (CSA).
- D. Conduct a benchmarking analysis.

Answer: D
