# IBM

## Exam Questions C1000-132

IBM Maximo Manage v8.0 Implementation

**NEW QUESTION 1**
How many failure reports can be created for the same Work Order?

A. one failure report for the work order and only one for each task of the work order
B. unlimited failure reports for either a work order or any of its tasks
C. unlimited failure reports for each work order, but none for a task
D. just one failure report

**Answer:** D

**Explanation:**
https://maximosecrets.com/2022/04/14/failure-codes-and-failure-reporting/ In IBM Maximo, only one failure report can be created per work order. This failure report captures details about the issues encountered, including the failure class, problem, cause, and remedy codes. It is recorded in the Failure Reporting tab within the Work Order Tracking or Quick Reporting applications, and is designed to provide a structured report on the failure encountered for the specified work order
While Maximo allows for multiple failure details to be reported across different work orders, each individual work order is limited to a single failure report. Tasks or child work orders associated with the main work order do not support additional, separate failure reports for each task; instead, the primary work order holds the single comprehensive report.

**NEW QUESTION 2**
In which Maximo application can Workflow Delegation be set?

A. People
B. Person Group
C. Workflow Administration
D. Labor

**Answer:** A

**NEW QUESTION 3**
In the Purchase Requisitions application and with default settings, what status does the Purchase Requisition change to when all of its lines have been copied to a Purchase Order or a Contract?

A. INPRG
B. COMPLETE
C. CLOSE
D. APPR

**Answer:** B

**Explanation:**
In the Purchase Requisitions application with default settings in IBM Maximo Manage, when all lines of a Purchase Requisition have been copied to a Purchase Order or a Contract, the status of the Purchase Requisition changes to COMPLETE.

**NEW QUESTION 4**
When setting up a Crew Type, Required Crafts and Required Tools can be specified. What other characteristic can be required for the Crew Type?

A. Required Assets
B. Required Qualifications
C. Required Labor
D. Required Skills

**Answer:** B

**NEW QUESTION 5**
What combination of information on a Work Order is used to create a histogram in the Graphical Scheduling application?

A. Craft/Skill Level Quantity and Hours
B. Labor and Crew Hours
C. Craft Quantity and Hours
D. Crew Work Group Quantity and Hours

**Answer:** C

**Explanation:**
The Graphical Scheduling application in Maximo Manage v8.0 uses histograms to provide a visual representation of resource allocation. To generate these histograms for work orders, it relies on the following information:
? Craft Quantity: This refers to the number of personnel from a specific craft (e.g.,
electricians, mechanics) required to complete the work order.
? Hours: This represents the total number of hours that the specified craft is needed for the work order.
By combining these two pieces of information, the histogram displays the overall workload demand for each craft across the scheduled work orders. This allows schedulers to:
? Identify potential resource bottlenecks: See if there are periods where the demand
for a particular craft exceeds its availability.
? Optimize resource allocation: Allocate crafts effectively to ensure that enough personnel are available to complete the work within the scheduled timeframe.
? Balance workloads: Distribute work among crafts to avoid overloading specific teams. (Reference: IBM Maximo Manage v8.0 documentation - Graphical Scheduling application)

**NEW QUESTION 6**
Which application in the IBM Maximo Application Suite can be used to perform criticality scoring?

A. Maximo Supervision
B. Maximo Manage
C. Maximo Prevent
D. Maximo Health

**Answer:** D

**Explanation:**
The Maximo Health application in the IBM Maximo Application Suite can be used to perform criticality scoring.

**NEW QUESTION 7**
What is the result of selecting the Validate GL Component Combinations in the Chart of Accounts application on financial transactions?

A. Any GL component can be used.
B. Any valid GL component can be used.
C. Only valid GL accounts can be used.
D. Validates transactions occurred during an active financial period.

**Answer:** C

**Explanation:**
When selecting the Validate GL Component Combinations in the Chart of Accounts application on financial transactions in IBM Maximo Manage, only valid GL accounts can be used.

**NEW QUESTION 8**
The IoT Connector provides Maximo Manage, Maximo Health and Maximo Predict the ability to connect to which two data sources?

A. Maximo Spatial
B. Maximo Assist
C. IBM Watson IoT Platform
D. Maximo Safety
E. Maximo Monitor

**Answer:** CE

**Explanation:**
IoT Connector provides Maximo Manage, Maximo Health and Maximo
Predict the ability to connect to C. IBM Watson IoT Platform and E. Maximo Monitor data sources. The IoT Connector in the Administration Work Center can be used to configure a connection to an IoT platform such as IBM Watson IoT Platform and IBM Maximo Asset Monitor1.

**NEW QUESTION 9**
In which three applications can Asset Depreciation be configured?

A. Chart of Accounts
B. Tools
C. Asset Templates
D. Locations
E. Assets
F. Item Master

**Answer:** CEF

**Explanation:**
Asset Depreciation can be configured in the following three applications:
? C. Asset Templates: You can define depreciation settings within asset templates to standardize how assets of the same type depreciate. This ensures consistency and saves time when creating new assets. (Reference: IBM Maximo Manage v8.0 documentation - Asset Templates)
? E. Assets: Depreciation can be configured directly on individual asset records. This allows for flexibility if an asset has unique depreciation circumstances that differ from the template. (Reference: IBM Maximo Manage v8.0 documentation - Assets application)
? F. Item Master: When creating an item record that will be used as an asset, you can specify depreciation information. This is useful for items that are commonly capitalized and tracked as assets. (Reference: IBM Maximo Manage v8.0 documentation - Item Master application)

**NEW QUESTION 10**
Which statement is true regarding Master Preventative Maintenance (PM) records?

A. Associated PM records can only be created for a rotating item's asset.
B. Associated PM records can be created for a Master PM which does not have an item
C. Associated PM records are temporary and expire after 90 days.
D. Associated PM records can only be created for a rotating item's location.

**Answer:** B

**Explanation:**
Regarding Master Preventative Maintenance (PM) records in IBM Maximo Manage, associated PM records can be created for a Master PM which does not have an item.

**NEW QUESTION 10**
How can a user ignore the availability of items in a storeroom for the Work Order (WMATL) status?

A. Modify mxe.wo.status.iqnoresrmavail settinq in the System Properties application.
B. Change Work Order Options in the Work Order Tracking application
C. Use the Item/Organization Details in the Item Master application.
D. Inventory Options in the Organization application.

**Answer:** D

**NEW QUESTION 14**
What item status in the Inventory application is needed to receive a purchased item into inventory?

A. PENDING
B. APPROVED
C. ACTIVE
D. PLANNING

**Answer:** C

**NEW QUESTION 16**
What would happen if a Ticket Template with a set of Activities with Job Plans is applied to a Service Request?

A. The activities become follow-up Work Orders with a Job Plan applied, they are visible from the Related Records tab of the Service Request.
B. The activities are ignored when applying to a Service Request as Activities are only used with Incidents and Problems.
C. Each activity will create a Work Order record of class ACTIVITY, no tasks would be created because records of class ACTIVITY cannot have tasks.
D. Each activity will create a Work Order record of class ACTIVITY with the Job Plans applied, there may be tasks if the Job Plan had tasks.

**Answer:** D

**NEW QUESTION 19**
In the Item Master application can an item be associated with a meter?

A. It can be associated with all items.
B. A meter field can only be associated with rotating items.
C. It cannot be associated with any item.
D. A meter field can only be associated with non-rotating items.

**Answer:** D

**NEW QUESTION 23**
A Service Level Agreement is defined at the System level. What is the purpose of the Organization and Site fields?

A. They are used to filter the SLAs which a user can see based on Security Group Site access.
B. They are used to filter the SLAs that can be associated with a Contract.
C. They are used to filter the SLAs that can be included as Related SLAs.
D. They are used to filter the SLAs that could be applied to the object.

**Answer:** D

**NEW QUESTION 24**
When working with Purchase Requests, which statement is correct?

A. Purchase Request Description is mandatory in the header section.
B. One Purchase Request can contain both Item and Material type lines
C. All Purchase Requests must be approved by an authorized person.
D. Purchase Request must have a vendor specified.
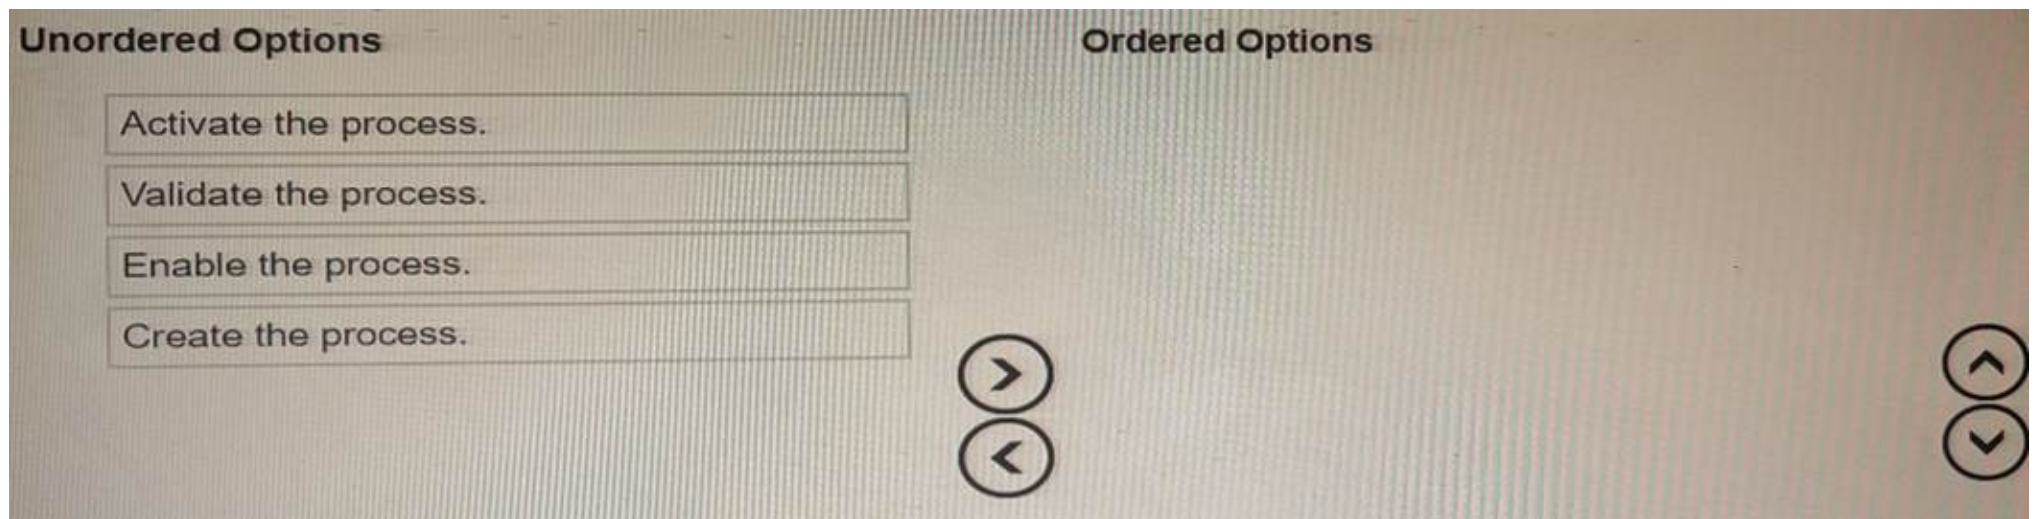

**Answer:** B

**Explanation:**
When working with Purchase Requests in IBM Maximo Manage, one Purchase Request can contain both Item and Material type lines.

**NEW QUESTION 26**
DRAG DROP
Select all that apply
What is the appropriate order of phases in order to create a workflow process?

| Unordered Options | Ordered Options |
|---|---|
| Activate the process. | |
| Validate the process. | |
| Enable the process. | |
| Create the process. | |

A. Mastered
B. Not Mastered

**Answer:** A

**Explanation:**
The appropriate order of phases in order to create a workflow process in IBM Maximo Manage is:
? Create the process: This involves designing the workflow process using the
Workflow Designer application, including creating the activities, transitions, and conditions that make up the process.
? Validate the process: This involves ensuring that the process has been designed
correctly and meets the desired requirements. This can be done by testing the process and making any necessary adjustments.
? Enable the process: This involves making the process available for use in the
system by enabling it in the Workflow Designer application.
? Activate the process: This involves activating the process in the Workflow Administration application so that it is ready for use by the system.

**NEW QUESTION 27**
Which statement describes Non-Rotating Items?

A. It can be contained within a Kit.
B. It has assets associated with it.
C. It can be attached to a parent asset on issue.
D. It can have a meter group associated with it.

**Answer:** A

**NEW QUESTION 29**
In which three applications can a failure class be applied? (Choose three.)

A. Work Order Tracking
B. Job Plans
C. Locations
D. Item Masters
E. Tools
F. Assets

**Answer:** ACF

**NEW QUESTION 34**
Which two automation script launch points can be triggered directly by a workflow?

A. Object
B. Custom Condition
C. Attribute - '
D. Action
E. Integration

**Answer:** BD

**Explanation:**
two automation script launch points that can be triggered directly by a
workflow are B. Custom Condition and D. Action. An action launch point associates a script with an action and executes when the specified action occurs1. A custom condition launch
point associates a script with a condition and executes when the specified condition is evaluated2.
https://www.ibm.com/docs/en/mam/7.6.0?topic=lp-script-action-launch-point

**NEW QUESTION 38**
Which statement is true regarding Work Assets in the Safety Plans application?

A. A Work Asset is either a Location or an Asse
B. A user does not need to specify Work Assets, as a Safety Plan can be applied without it.
C. A Work Asset is either a Location or an Asse
D. A user needs to specify at least one of these for each record.

E. A Work Asset is either a Rotating Item, a Location, or an Asse
F. A user needs to specify at least one of these for each record.
G. A Work Asset is either an Asset, Asset Type, or a Locatio
H. A user does not need to specify Work Assets, as a Safety Plan can be applied without it.

**Answer:** A

**Explanation:**
 In the Safety Plans application, a Work Asset is either a location or an asset that requires the safety plan. Each safety plan record must have at least one work asset specified, and the work asset can be a location or an asset.

**NEW QUESTION 39**
Which two domain types can have a specified error message?

A. SYNONYM
B. NUMERIC
C. TABLE
D. CROSSOVER
E. ALN

**Answer:** D

**Explanation:**
 In IBM Maximo Manage, the two domain types that can have a specified error message are TABLE and ALN.

**NEW QUESTION 43**
What are three statuses used in the Service Requests application? (Choose three.)

A. COMPLETED
B. ENTERED
C. RESOLVED
D. QUEUED
E. APPROVED
F. PENDING

**Answer:** CDF

**NEW QUESTION 45**
In the Meters application what are the three meter types?

A. GAUGE
B. CHARACTERISTIC
C. CONTINUOUS
D. FEATURES
E. CONSTANT
F. CALIBRATION

**Answer:** ABC

**Explanation:**
 In the Meters application, the three meter types are GAUGE, CHARACTERISTIC, and CONTINUOUS. GAUGE meters measure a discrete value or range of values, such as the oil pressure in an engine. CHARACTERISTIC meters measure a specific attribute of an asset, such as the temperature of an engine. CONTINUOUS meters track usage or consumption over time, such as the number of hours an asset has been in operation.

**NEW QUESTION 49**
How is the Lock Out / Tag Outs application structured?

A. Specify a Lock Out on an Asset with a Locking Device and define the Tag Out Operations.
B. Specify a Lock Out on the Location or Asset and define the Tag Out Operations.
C. Specify a Tag Out on the Location or Asset and define the Lock Out Operations.
D. Define the isolation procedures on a set of related assets and specify a sequence.

**Answer:** C

**NEW QUESTION 50**
In the Security Groups application which security group are all users added to using default settings?

A. MAXIMOUSERS
B. DEFLTREG
C. DEFUSRREG
D. NEWUSER

**Answer:** B

**NEW QUESTION 52**
In the Assets application when reporting downtime, what is an example of a Downtime Type?

A. Starting Up
B. Line Change Over
C. Shutting Down
D. Non-Operational

**Answer:** D

**NEW QUESTION 53**
Which Maximo Application Suite add-on enables managing certificates for assets and training requirements for personnel?

A. Health, Safety and Environment (HSE)
B. Asset Configuration Manager
C. Maximo HR Manager
D. Service Provider

**Answer:** A

**Explanation:**
The Health, Safety and Environment (HSE) add-on in the IBM Maximo Application Suite enables managing certificates for assets and training requirements for personnel. This add-on provides functionality for managing health and safety risks, including compliance with regulations, management of environmental incidents, and tracking of personnel certifications and training.

**NEW QUESTION 56**
Which three Safety Module applications require a Site (SITEID) to be defined for each record? (Choose three.)

A. Accident Reporting
B. Danger Zones
C. Tag Outs
D. Safety Plans
E. Hazards
F. Precautions

**Answer:** CDF

**NEW QUESTION 58**
When using flow control on a Work Order, how ca from the Parent to Child Work Orders? user ensure that Work Order status changes are inherited

A. Check the Inherit Status Changes flag on the Work Order and ensure the mxe.app.wo.flowControlStatusInheritance System Properties is set to 1.
B. In the Organization application, check the Intarit Status Changes flag in Work Order Options -> Flow Control Options.
C. Ensure the Asset or Locationon both the Parent and Child Work Order.
D. Check the Roll Down Status Changes flag on the Parent and Child Work Order.

**Answer:** A

**Explanation:**
When using flow control on a Work Order in IBM Maximo Manage, to ensure that Work Order status changes are inherited from the Parent to Child Work Orders, you should go to the Organization application and check the Inherit Status Changes flag in Work Order Options -> Flow Control Options.

**NEW QUESTION 60**
What occurs by default when a Desktop Requisition with one direct issue line is submitted?

A. A assignment is created for the purchase agen
B. B Desktop Requisition will wait for a Workflow action
C. A Purchase Requisition will be created.
D. An authorized person must approve the Desktop Requisition.

**Answer:** C

**NEW QUESTION 61**
In which application can a user view a history of changes made to attributes in the Specifications tab?

A. Locations
B. Item Master
C. Purchase Orders
D. Assets

**Answer:** D

**NEW QUESTION 63**
A user wishes to perform the same work tasks on several assets simultaneously. How can this be configured?

A. A Route should be created with each stop being one Asset and the Job Plan associated with the Route record.
B. A Master Job Plan should be created with Tasks for each Asset.
C. A Work Order Hierarchy should be created against the same Job Plan used for all stops.
D. The Assets should be specified on the Multiple Assets, Locations and CIs table on the Work Order.

**Answer:** D

**Explanation:**
In IBM Maximo Manage, when the same work tasks need to be applied simultaneously to multiple assets, the recommended method is to use the Multiple Assets, Locations, and CIs table on a single Work Order. This approach allows users to specify multiple assets for the work order without creating separate child work orders or task hierarchies, streamlining record management and reducing complexity.
? Multiple Assets, Locations and CIs Table: This table allows the user to list all
assets requiring the same work on a single work order. When tasks are defined on
the work order, they apply uniformly across all assets listed in this table. This method is efficient for routine inspections, simple tasks, or other repetitive maintenance where the same task applies to multiple assets
? Routes as an Alternative: A route could also be configured so that each route stop (representing different assets or locations) populates the Multiple Assets, Locations, and CIs table on a single work order when applied. This allows for sequence control and record management while still using a single main work order This setup minimizes the need to manage multiple child work orders or complex work order hierarchies, particularly when performing similar tasks on several assets simultaneously.

**NEW QUESTION 65**
Where can Default Values be specified for Service Requests created using the Service Request Work Center?

A. Service Desk Application
B. in the users Profile
C. Administration Work Center
D. Application Designer

**Answer:** C

**NEW QUESTION 69**
Which two records can be included as a contract line item on a Lease/Rental Contract?

A. Non-Rotating Asset
B. Rotating item
C. Asset
D. Tool
E. Non-Rotating item

**Answer:** AB

**Explanation:**
In IBM Maximo Manage, two records that can be included as a contract line item on a Lease/Rental Contract are a Rotating item and an Asset.

**NEW QUESTION 73**
What are the three default classes of a Ticket?

A. Problem
B. Activity
C. Service Request
D. Change
E. Incident
F. Release

**Answer:** ACE

**Explanation:**
The three default classes of a Ticket in IBM Maximo Manage are Problem, Service Request and Incident.

**NEW QUESTION 78**
In what Maximo Manage application are the specifications of an asset for calibration entered?

A. Classifications
B. Asset
C. Data Sheet Template
D. Improvements

**Answer:** C

**Explanation:**
In IBM Maximo Manage, the specifications of an asset for calibration are entered in the Data Sheet Template application.

**NEW QUESTION 81**
At which data storage level are locations, assets and storerooms defined?

A. Set
B. Site
C. System
D. Organization

**Answer:** B

**Explanation:**
Locations, assets and storerooms are defined at the Site level in IBM Maximo Manage.

**NEW QUESTION 83**
When creating a new Inspection form, a client requires a Work Order to be created if certain responses are recorded. Which two actions are required for this to be achieved?

A. Choose Work Order on question action.
B. Make the question response interactive.
C. In Form Settings add an Action Script.
D. In the Question Options, set the Require action flag.
E. Create an escalation on the QRESPONSE Object.

**Answer:** CD

**NEW QUESTION 85**
Where in Maximo can the Server IP Addresses and Logged in users be observed?

A. Database Configuration application
B. Administration Work Center
C. Server Management Consol
D. Maximo Management Interface Work Center

**Answer:** D

**Explanation:**
In Maximo Manage, the Server IP Addresses and Logged in users can be observed in the Maximo Management Interface Work Center.

**NEW QUESTION 87**
In the Preventive Maintenance (PM) application, how is the Estimated Next Due Date calculated when Adjust Next Due Date is selected?

A. Extended Date + Alert Lead (Days)
B. Extended Date + Frequency
C. Extended Date + Target Start Time
D. Extended Date -Alert Lead (Days)

**Answer:** B

**NEW QUESTION 90**
When adding an Asset to a Work Order, both the Asset and its Location record have a Failure Class defined. Which Failure Class will be used on the Work Order?

A. It will use the record with the highest priority.
B. It will be left empty.
C. Location
D. Asset

**Answer:** D

**NEW QUESTION 95**
How can a user be granted access to a Work Center application?

A. using the Maximo Management Interface
B. using the Security Groups application
C. by using self-registration
D. using the Administration Work Center

**Answer:** B

**NEW QUESTION 99**
What are three available associations in the Hazards application?

A. Lock Outs
B. Material Safety Data Sheets (MSDS)
C. Hazardous Materials
D. Tag Outs
E. Precautions
F. Safety Plans

**Answer:** CDE

**Explanation:**
The Hazards application in IBM Maximo Manage v8.0 allows users to associate Material Safety Data Sheets (MSDS), Hazardous Materials, and Precautions with a particular hazard. These associations help in managing safety information related to
hazards and in ensuring compliance with safety regulations.

**NEW QUESTION 104**
When setting up Premium Pay Codes in the Crafts application, what are the three rate types available? (Choose three.)

A. Formula
B. Hourly
C. Increment
D. Weekend
E. Overtime
F. Multiplier

**Answer:** BCF

**NEW QUESTION 109**
What are the three default values used with the position of a Crew Type or Crew?

A. Helper
B. Supervisor
C. Driver
D. Leader
E. Apprentice
F. Technician

**Answer:** ADE

**Explanation:**
In IBM Maximo Manage v8.0 implementation, the three default values used with the position of a Crew Type or Crew are Helper, Leader, and Apprentice. These values represent the different roles that members of a crew can assume.

**NEW QUESTION 114**
In which application can a Contract property default be set for a specific contract type, for example Is early termination allowed by the Customer?

A. Database Configuration
B. Organizations
C. System Properties
D. Contract Administration

**Answer:** B

**Explanation:**
The Contract Administration application is used to set contract property defaults for specific contract types. For example, you can set whether early termination is allowed by the customer for a specific contract type.

**NEW QUESTION 119**
Apart from Standard and Average, what other three costing methods can be used in the Inventory application?

A. FIFO
B. FILO
C. Asset
D. LIFO
E. Weighted Average
F. LILO

**Answer:** ACD

**Explanation:**
Apart from Standard and Average costing methods in IBM Maximo Manage??s Inventory application, three other costing methods that can be used are FIFO (First In First Out), LIFO (Last In First Out) and Weighted Average.

**NEW QUESTION 121**
On a Work Order with no GL Account specified, which GL Account will take precedence?

A. Work Order Control Account
B. Job Plan
C. Asset
D. Location

**Answer:** C

**NEW QUESTION 124**
What Downtime Types are available?

A. Critical and Non-critical
B. Operational and Non-operational
C. Planned and Unplanned
D. Started and Stopped

**Answer:** B

**NEW QUESTION 125**
In the Automation Scripts application, which launch point can be triggered?

A. Formula
B. Escalation
C. Integration
D. Cron Task

**Answer:** C

**Explanation:**
 In the IBM Maximo Automation Scripts application, several types of launch points can be configured to trigger scripts, including Integration launch points. The supported launch points in Maximo are:
? Object Launch Point: Triggers on events related to specific objects (MBOs), such
as creation, modification, or deletion
? Attribute Launch Point: Triggers when specific attributes within an MBO are accessed or modified
? Action Launch Point: Executes custom actions, often triggered by workflows or escalations, allowing for automation without custom Java code
? Condition Launch Point: Activates when a defined condition is met, commonly used for security or workflow condition logic
? Integration Launch Point: Designed specifically to interact with Maximo Integration Framework (MIF) components, including publish channels, enterprise services, and invocation channels. This enables automation scripts to respond to data exchanges between Maximo and external systems, making it a powerful tool for integration-related automations
The Integration launch point is thus the correct answer as it allows scripts to be triggered by data flow events through MIF.
