NEW QUESTION 1

If a French controller has a car-sharing app available only in Morocco, Algeria and Tunisia, but the data processing activities are carried out by the appointed processor in Spain, the GDPR will apply to the processing of the personal data so long as?

- A. The individuals are European citizens or residents.
- B. The data processing activities are in Spain.
- C. The data controller is in France.
- D. The EU individuals are targeted.

Answer: D

NEW QUESTION 2

With the issue of consent, the GDPR allows member states some choice regarding what?

- A. The mechanisms through which consent may be communicated
- B. The circumstances in which silence or inactivity may constitute consent
- C. The age at which children must be required to obtain parental consent
- D. The timeframe in which data subjects are allowed to withdraw their consent

Answer: C

NEW QUESTION 3

To which of the following parties does the territorial scope of the GDPR NOT apply?

- A. All member countries of the European Economic Area.
- B. All member countries party to the Treaty of Lisbon.
- C. All member countries party to the Paris Agreement.
- D. All member countries of the European Union.

Answer: A

NEW QUESTION 4

A German data subject was the victim of an embarrassing prank 20 years ago. A newspaper website published an article about the prank at the time, and the article is still available on the newspaper's website. Unfortunately, the prank is the top search result when a user searches on the victim's name. The data subject requests that SearchCo delist this result. SearchCo agrees, and instructs its technology team to avoid scanning or indexing the article. What else must SearchCo do?

- A. Notify the newspaper that its article it is delisting the article.
- B. Fully erase the URL to the content, as opposed to delist which is mainly based on data subject's name.
- C. Identify other controllers who are processing the same information and inform them of the delisting request.
- D. Prevent the article from being listed in search results no matter what search terms are entered into the search engine.

Answer: A

NEW QUESTION 5

What is the consequence if a processor makes an independent decision regarding the purposes and means of processing it carries out on behalf of a controller?

- A. The controller will be liable to pay an administrative fine
- B. The processor will be liable to pay compensation to affected data subjects
- C. The processor will be considered to be a controller in respect of the processing concerned
- D. The controller will be required to demonstrate that the unauthorized processing negatively affected one or more of the parties involved

Answer: B

NEW QUESTION 6

Which area of privacy is a lead supervisory authority's (LSA) MAIN concern?

- A. Data subject rights
- B. Data access disputes
- C. Cross-border processing
- D. Special categories of data

Answer: C

NEW QUESTION 7

Data retention in the EU was underpinned by a legal framework established by the Data Retention Directive (2006/24/EC). Why is the Directive no longer part of EU law?

- A. The Directive was superseded by the EU Directive on Privacy and Electronic Communications.
- B. The Directive was superseded by the General Data Protection Regulation.
- C. The Directive was annulled by the Court of Justice of the European Union.
- D. The Directive was annulled by the European Court of Human Rights.

Answer: C

NEW QUESTION 8

If a company chooses to ground an international data transfer on the contractual route, which of the following is NOT a valid set of standard contractual clauses?

- A. Decision 2001/497/EC (EU controller to non-EU or EEA controller).
- B. Decision 2004/915/EC (EU controller to non-EU or EEA controller).
- C. Decision 2007/72/EC (EU processor to non-EU or EEA controller).
- D. Decision 2010/87/EU (Non-EU or EEA processor from EU controller).

Answer: B

NEW QUESTION 9**SCENARIO**

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

Bob, the President of Who-R-U, thinks there is a lot of interest for the product in the EU, and the company is exploring a number of plans to expand its customer base.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

If Who-R-U adopts the We-Track-U pilot plan, why is it likely to be subject to the territorial scope of the GDPR?

- A. Its plan would be in the context of the establishment of a controller in the Union.
- B. It would be offering goods or services to data subjects in the Union.
- C. It is engaging in commercial activities conducted in the Union.
- D. It is monitoring the behavior of data subjects in the Union.

Answer: D

NEW QUESTION 10

Which aspect of the GDPR will likely have the most impact on the consistent implementation of data protection laws throughout the European Union?

- A. That it essentially functions as a one-stop shop mechanism
- B. That it takes the form of a Regulation as opposed to a Directive
- C. That it makes notification of large-scale data breaches mandatory
- D. That it makes appointment of a data protection officer mandatory

Answer: D

NEW QUESTION 10

What type of data lies beyond the scope of the General Data Protection Regulation?

- A. Pseudonymized
- B. Anonymized
- C. Encrypted
- D. Masked

Answer: B

NEW QUESTION 14

In which of the following situations would an individual most likely to be able to withdraw her consent for processing?

- A. When she is leaving her bank and moving to another bank.
- B. When she has recently changed jobs and no longer works for the same company.
- C. When she disagrees with a diagnosis her doctor has recorded on her records.
- D. When she no longer wishes to be sent marketing materials from an organization.

Answer: D

NEW QUESTION 19

Under which of the following conditions does the General Data Protection Regulation NOT apply to the processing of personal data?

- A. When the personal data is processed only in non-electronic form
- B. When the personal data is collected and then pseudonymised by the controller

- C. When the personal data is held by the controller but not processed for further purposes
- D. When the personal data is processed by an individual only for their household activities

Answer: B

NEW QUESTION 23

Select the answer below that accurately completes the following: “The right to compensation and liability under the GDPR...

- A. ...provides for an exemption from liability if the data controller (or data processor) proves that it is not in any way responsible for the event giving rise to the damage.”
- B. ...precludes any subsequent recourse proceedings against other controllers or processors involved in the same processing.”
- C. ...can only be exercised against the data controller, even if a data processor was involved in the same processing.”
- D. ...is limited to a maximum amount of EUR 20 million per event of damage or loss.”

Answer: B

NEW QUESTION 24

Under the GDPR, who would be LEAST likely to be allowed to engage in the collection, use, and disclosure of a data subject’s sensitive medical information without the data subject’s knowledge or consent?

- A. A member of the judiciary involved in adjudicating a legal dispute involving the data subject and concerning the health of the data subject.
- B. A public authority responsible for public health, where the sharing of such information is considered necessary for the protection of the general populace.
- C. A health professional involved in the medical care for the data subject, where the data subject’s life hinges on the timely dissemination of such information.
- D. A journalist writing an article relating to the medical condition in QUESTION, who believes that the publication of such information is in the public interest.

Answer: B

NEW QUESTION 26

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company’s IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father’s company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company’s online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers’ philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer’s personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend’s daughter, Alice, who just graduated from law school in the U.S., to be the company’s new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company’s operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company’s IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone’s information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm.

In preparing the company for its impending lawsuit, Alice’s instruction to the company’s IT Department violated Article 5 of the GDPR because the company failed to first do what?

- A. Send out consent forms to all of its employees.
- B. Minimize the amount of data collected for the lawsuit.
- C. Inform all of its employees about the lawsuit.
- D. Encrypt the data from all of its employees.

Answer: B

NEW QUESTION 27

SCENARIO

Please use the following to answer the next question:

Sandy recently joined Market4U, an advertising technology company founded in 2016, as their VP of Privacy and Data Governance. Through her first initiative in conducting a data inventory, Sandy learned that Market4U maintains a list of 19 million global contacts that were collected throughout the course of Market4U’s existence. Knowing the risk of having such a large amount of data, Sandy wanted to purge all contacts that were entered into Market4U’s systems prior to May 2018, unless such contacts had a more recent interaction with Market4U content. However, Dan, the VP of Sales, informed Sandy that all of the contacts provide useful information regarding successful marketing campaigns and trends in industry verticals for Market4U’s clients.

Dan also informed Sandy that he had wanted to focus on gaining more customers within the sports and entertainment industry. To assist with this behavior, Market4U’s marketing team decided to add several new fields to Market4U’s website forms, including forms for downloading white papers, creating accounts to participate in Market4U’s forum, and attending events. Such fields include birth date and salary.

What is the best way that Sandy can gain the insights that Dan seeks while still minimizing risks for Market4U?

- A. Conduct analysis only on anonymized personal data.
- B. Conduct analysis only on pseudonymized personal data.
- C. Delete all data collected prior to May 2018 after conducting the trend analysis.
- D. Procure a third party to conduct the analysis and delete the data from Market4U’s systems.

Answer: A

NEW QUESTION 31

Which of the following is NOT considered a fair processing practice in relation to the transparency principle?

- A. Providing a multi-layered privacy notice, in a website environment.
- B. Providing a QR code linking to more detailed privacy notice, in a CCTV sign.
- C. Providing a hyperlink to the organization's home page, in a hard copy application form.
- D. Providing a "just-in-time" contextual pop-up privacy notice, in an online application from field.

Answer: A

NEW QUESTION 35

A multinational company is appointing a mandatory data protection officer. In addition to considering the rules set out in Article 37 (1) of the GDPR, which of the following actions must the company also undertake to ensure compliance in all EU jurisdictions in which it operates?

- A. Consult national derogations to evaluate if there are additional cases to be considered in relation to the matter.
- B. Conduct a Data Protection Privacy Assessment on the processing operations of the company in all the countries it operates.
- C. Assess whether the company has more than 250 employees in each of the EU member-states in which it is established.
- D. Revise the data processing activities of the company that affect more than one jurisdiction to evaluate whether they comply with the principles of privacy by design and by default.

Answer: B

NEW QUESTION 38

When does the European Data Protection Board (EDPB) recommend reevaluating whether a transfer tool is effectively providing a level of personal data protection that is in compliance with the European Union (EU) level?

- A. After a personal data breach.
- B. Every three (3) years.
- C. On an ongoing basis.
- D. Every year.

Answer: C

NEW QUESTION 41

Which institution has the power to adopt findings that confirm the adequacy of the data protection level in a non-EU country?

- A. The European Parliament
- B. The European Commission
- C. The Article 29 Working Party
- D. The European Council

Answer: B

NEW QUESTION 43

What is the MAIN reason GDPR Article 4(22) establishes the concept of the "concerned supervisory authority"?

- A. To encourage the consistency of local data processing activity.
- B. To give corporations a choice about who their supervisory authority will be.
- C. To ensure the GDPR covers controllers that do not have an establishment in the EU but have a representative in a member state.
- D. To ensure that the interests of individuals residing outside the lead authority's jurisdiction are represented.

Answer: A

NEW QUESTION 44

If a multi-national company wanted to conduct background checks on all current and potential employees, including those based in Europe, what key provision would the company have to follow?

- A. Background checks on employees could be performed only under prior notice to all employees.
- B. Background checks are only authorized with prior notice and express consent from all employees including those based in Europe.
- C. Background checks on European employees will stem from data protection and employment law, which can vary between member states.
- D. Background checks may not be allowed on European employees, but the company can create lists based on its legitimate interests, identifying individuals who are ineligible for employment.

Answer: C

NEW QUESTION 48

Assuming that the "without undue delay" provision is followed, what is the time limit for complying with a data access request?

- A. Within 40 days of receipt
- B. Within 40 days of receipt, which may be extended by up to 40 additional days
- C. Within one month of receipt, which may be extended by up to an additional month
- D. Within one month of receipt, which may be extended by an additional two months

Answer: C

NEW QUESTION 50

SCENARIO

Please use the following to answer the next question:

TripBliss Inc. is a travel service company which has lost substantial revenue over the last few years. Their new manager, Oliver, suspects that this is partly due to the company's outdated website. After doing some research, he meets with a sales representative from the up-and-coming IT company Techiva, hoping that they can design a new, cutting-edge website for TripBliss Inc.'s foundering business.

During negotiations, a Techiva representative describes a plan for gathering more customer information through detailed Questionnaires, which could be used to tailor their preferences to specific travel destinations. TripBliss Inc. can choose any number of data categories – age, income, ethnicity – that would help them best accomplish their goals. Oliver loves this idea, but would also like to have some way of gauging how successful this approach is, especially since the Questionnaires will require customers to provide explicit consent to having their data collected. The Techiva representative suggests that they also run a program to analyze the new website's traffic, in order to get a better understanding of how customers are using it. He explains his plan to place a number of cookies on customer devices. The cookies will allow the company to collect IP addresses and other information, such as the sites from which the customers came, how much time they spend on the TripBliss Inc. website, and which pages on the site they visit. All of this information will be compiled in log files, which Techiva will analyze by means of a special program. TripBliss Inc. would receive aggregate statistics to help them evaluate the website's effectiveness. Oliver enthusiastically engages Techiva for these services.

Techiva assigns the analytics portion of the project to longtime account manager Leon Santos. As is standard practice, Leon is given administrator rights to TripBliss Inc.'s website, and can authorize access to the log files gathered from it. Unfortunately for TripBliss Inc., however, Leon is taking on this new project at a time when his dissatisfaction with Techiva is at a high point. In order to take revenge for what he feels has been unfair treatment at the hands of the company, Leon asks his friend Fred, a hobby hacker, for help. Together they come up with the following plan: Fred will hack into Techiva's system and copy their log files onto a USB stick. Despite his initial intention to send the USB to the press and to the data protection authority in order to denounce Techiva, Leon experiences a crisis of conscience and ends up reconsidering his plan. He decides instead to securely wipe all the data from the USB stick and inform his manager that the company's system of access control must be reconsidered.

If TripBliss Inc. decides not to report the incident to the supervisory authority, what would be their BEST defense?

- A. The resulting obligation to notify data subjects would involve disproportionate effort.
- B. The incident resulted from the actions of a third-party that were beyond their control.
- C. The destruction of the stolen data makes any risk to the affected data subjects unlikely.
- D. The sensitivity of the categories of data involved in the incident was not substantial enough.

Answer: B

NEW QUESTION 54

In which of the following cases, cited as an example by a WP29 guidance, would conducting a single data protection impact assessment to address multiple processing operations be allowed?

- A. A medical organization that wants to begin genetic testing to support earlier research for which they have performed a DPIA.
- B. A data controller who plans to use a new technology product that has already undergone a DPIA by the product's provider.
- C. A marketing team that wants to collect mailing addresses of customers for whom they already have email addresses.
- D. A railway operator who plans to evaluate the same video surveillance in all the train stations of his company.

Answer: D

NEW QUESTION 59

Under what circumstances might the "soft opt-in" rule apply in relation to direct marketing?

- A. When an individual has not consented to the marketing.
- B. When an individual's details are obtained from their inquiries about buying a product.
- C. Where an individual's details have been obtained from a bought-in marketing list.
- D. Where an individual is given the ability to unsubscribe from marketing emails sent to him.

Answer: B

NEW QUESTION 61

How is the GDPR's position on consent MOST likely to affect future app design and implementation?

- A. App developers will expand the amount of data necessary to collect for an app's functionality.
- B. Users will be given granular types of consent for particular types of processing.
- C. App developers' responsibilities as data controllers will increase.
- D. Users will see fewer advertisements when using apps.

Answer: B

NEW QUESTION 62

Bioface is a company based in the United States. It has no servers, personnel or assets in the European Union. By collecting photographs from social media and other web-based services, such as newspapers and blogs, it uses machine learning to develop a facial recognition algorithm. The algorithm identifies individuals in photographs who are not in its data set based the algorithm and its existing data. The service collects photographs of data subjects in the European Union and will identify them if presented with their photographs. Bioface offers its service to government agencies and companies in the United States and Canada, but not to those in the European Union. Bioface does not offer the service to individuals.

Why is Bioface subject to the territorial scope of the General Data Protection Regulation?

- A. It collects data from European Union websites, which constitutes an establishment in the European Union.
- B. It offers services in the European Union by identifying data subjects in the European Union.
- C. It collects data from subjects and uses it for automated processing.
- D. It monitors the behavior of data subjects in the European Union.

Answer: A

NEW QUESTION 65

A company in France suffers a robbery over the weekend owing to a faulty alarm system. When it is determined that the break-in involves the loss of a substantial amount of data, the company decides on a CCTV system to monitor for future incidents. Company technicians install cameras in the entrance of the building, hallways and offices. Footage is recorded continuously, and is monitored by the home office in the United States. What is the most realistic step the company could take to address their security concerns and comply with the personal data processing principles set out in Article 5 of the GDPR?

- A. Seek informed consent from company employees.
- B. Have cameras recording during work hours only.
- C. Retain captured footage for no more than 30 days.
- D. Restrict camera placement to building entrances only.

Answer: A

NEW QUESTION 70

What should a controller do after a data subject opts out of a direct marketing activity?

- A. Without exception, securely delete all personal data relating to the data subject.
- B. Without undue delay, provide information to the data subject on the action that will be taken.
- C. Refrain from processing personal data relating to the data subject for the relevant type of communication.
- D. Take reasonable steps to inform third-party recipients that the data subject's personal data should be deleted and no longer processed.

Answer: C

NEW QUESTION 74

Which of the following would require designating a data protection officer?

- A. Processing is carried out by an organization employing 250 persons or more.
- B. Processing is carried out for the purpose of providing for-profit goods or services to individuals in the EU.
- C. The core activities of the controller or processor consist of processing operations of financial information or information relating to children.
- D. The core activities of the controller or processor consist of processing operations that require systematic monitoring of data subjects on a large scale.

Answer: D

NEW QUESTION 79

If a data subject puts a complaint before a DPA and receives no information about its progress or outcome, how long does the data subject have to wait before taking action in the courts?

- A. 1 month.
- B. 3 months.
- C. 5 months.
- D. 12 months.

Answer: B

NEW QUESTION 80

A mobile device application that uses cookies will be subject to the consent requirement of which of the following?

- A. The ePrivacy Directive
- B. The E-Commerce Directive
- C. The Data Retention Directive
- D. The EU Cybersecurity Directive

Answer: A

NEW QUESTION 81

Under Article 21 of the GDPR, a controller must stop profiling when requested by a data subject, unless it can demonstrate compelling legitimate grounds that override the interests of the individual. In the Guidelines on Automated individual decision-making and Profiling, the WP 29 says the controller needs to do all of the following to demonstrate that it has such legitimate grounds EXCEPT?

- A. Carry out an exercise that weighs the interests of the controller and the basis for the data subject's objection.
- B. Consider the impact of the profiling on the data subject's interest, rights and freedoms.
- C. Demonstrate that the profiling is for the purposes of direct marketing.
- D. Consider the importance of the profiling to their particular objective.

Answer: C

NEW QUESTION 85**SCENARIO**

Please use the following to answer the next question:

Due to rapidly expanding workforce, Company A has decided to outsource its payroll function to Company B. Company B is an established payroll service provider with a sizable client base and a solid reputation in the industry.

Company B's payroll solution for Company A relies on the collection of time and attendance data obtained via a biometric entry system installed in each of Company A's factories. Company B won't hold any biometric data itself, but the related data will be uploaded to Company B's UK servers and used to provide the payroll service. Company B's live systems will contain the following information for each of Company A's employees:

Name

Address

Date of Birth
Payroll number
National Insurance number
Sick pay entitlement
Maternity/paternity pay entitlement
Holiday entitlement
Pension and benefits contributions
Trade union contributions

Jenny is the compliance officer at Company A. She first considers whether Company A needs to carry out a data protection impact assessment in relation to the new time and attendance system, but isn't sure whether or not this is required.

Jenny does know, however, that under the GDPR there must be a formal written agreement requiring Company B to use the time and attendance data only for the purpose of providing the payroll service, and to apply appropriate technical and organizational security measures for safeguarding the data. Jenny suggests that Company B obtain advice from its data protection officer. The company doesn't have a DPO but agrees, in the interest of finalizing the contract, to sign up for the provisions in full. Company A enters into the contract.

Weeks later, while still under contract with Company A, Company B embarks upon a separate project meant to enhance the functionality of its payroll service, and engages Company C to help. Company C agrees to extract all personal data from Company B's live systems in order to create a new database for Company B. This database will be stored in a test environment hosted on Company C's U.S. server. The two companies agree not to include any data processing provisions in their services agreement, as data is only being used for IT testing purposes.

Unfortunately, Company C's U.S. server is only protected by an outdated IT security system, and suffers a cyber security incident soon after Company C begins work on the project. As a result, data relating to Company A's employees is visible to anyone visiting Company C's website. Company A is unaware of this until Jenny receives a letter from the supervisory authority in connection with the investigation that ensues. As soon as Jenny is made aware of the breach, she notifies all affected employees.

The GDPR requires sufficient guarantees of a company's ability to implement adequate technical and organizational measures. What would be the most realistic way that Company B could have fulfilled this requirement?

- A. Hiring companies whose measures are consistent with recommendations of accrediting bodies.
- B. Requesting advice and technical support from Company A's IT team.
- C. Avoiding the use of another company's data to improve their own services.
- D. Vetting companies' measures with the appropriate supervisory authority.

Answer: A

NEW QUESTION 88

SCENARIO

Please use the following to answer the next question:

Zandelay Fashion ('Zandelay') is a successful international online clothing retailer that employs approximately 650 people at its headquarters based in Dublin, Ireland. Martin is their recently appointed data protection officer, who oversees the company's compliance with the General Data Protection Regulation (GDPR) and other privacy legislation.

The company offers both male and female clothing lines across all age demographics, including children. In doing so, the company processes large amounts of information about such customers, including preferences and sensitive financial information such as credit card and bank account numbers.

In an aggressive bid to build revenue growth, Jerry, the CEO, tells Martin that the company is launching a new mobile app and loyalty scheme that puts significant emphasis on profiling the company's customers by analyzing their purchases. Martin tells the CEO that: (a) the potential risks of such activities means that Zandelay needs to carry out a data protection impact assessment to assess this new venture and its privacy implications; and (b) where the results of this assessment indicate a high risk in the absence of appropriate protection measures, Zandelay may have to undertake a prior consultation with the Irish Data Protection Commissioner before implementing the app and loyalty scheme.

Jerry tells Martin that he is not happy about the prospect of having to directly engage with a supervisory authority and having to disclose details of Zandelay's business plan and associated processing activities.

What would MOST effectively assist Zandelay in conducting their data protection impact assessment?

- A. Information about DPIAs found in Articles 38 through 40 of the GDPR.
- B. Data breach documentation that data controllers are required to maintain.
- C. Existing DPIA guides published by local supervisory authorities.
- D. Records of processing activities that data controllers are required to maintain.

Answer: A

NEW QUESTION 92

When assessing the level of risk created by a data breach, which of the following would NOT have to be taken into consideration?

- A. The ease of identification of individuals.
- B. The size of any data processor involved.
- C. The special characteristics of the data controller.
- D. The nature, sensitivity and volume of personal data.

Answer: B

NEW QUESTION 96

As a result of the European Court of Justice's ruling in the case of Google v. Spain, search engines outside the EEA are also likely to be subject to the Regulation's right to be forgotten. This holds true if the activities of an EU subsidiary and its U.S. parent are what?

- A. Supervised by the same Data Protection Officer.
- B. Consistent with Privacy Shield requirements
- C. Bound by a standard contractual clause.
- D. Inextricably linked in their businesses.

Answer: D

NEW QUESTION 100

Under Article 30 of the GDPR, controllers are required to keep records of all of the following EXCEPT?

- A. Incidents of personal data breaches, whether disclosed or not.
- B. Data inventory or data mapping exercises that have been conducted.
- C. Categories of recipients to whom the personal data have been disclosed.
- D. Retention periods for erasure and deletion of categories of personal data.

Answer: D

NEW QUESTION 103

SCENARIO

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

Bob, the President of Who-R-U, thinks there is a lot of interest for the product in the EU, and the company is exploring a number of plans to expand its customer base.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

The Customer for Life plan may conflict with which GDPR provision?

- A. Article 6, which requires processing to be lawful.

- B. Article 7, which requires consent to be as easy to withdraw as it is to give.
- C. Article 16, which provides data subjects with a rights to rectification.
- D. Article 20, which gives data subjects a right to data portability.

Answer: B

NEW QUESTION 107

According to the E-Commerce Directive 2000/31/EC, where is the place of “establishment” for a company providing services via an Internet website confirmed by the GDPR?

- A. Where the technology supporting the website is located
- B. Where the website is accessed
- C. Where the decisions about processing are made
- D. Where the customer’s Internet service provider is located

Answer: D

NEW QUESTION 108

Which of the following would NOT be relevant when determining if a processing activity would be considered profiling?

- A. If the processing is to be performed by a third-party vendor
- B. If the processing involves data that is considered personal data
- C. If the processing of the data is done through automated means
- D. If the processing is used to predict the behavior of data subjects

Answer: D

NEW QUESTION 110

Which mechanism, new to the GDPR, now allows for the possibility of personal data transfers to third countries under Article 42?

- A. Approved certifications.
- B. Binding corporate rules.
- C. Law enforcement requests.
- D. Standard contractual clauses.

Answer: A

NEW QUESTION 113

Based on GDPR Article 35, which of the following situations would trigger the need to complete a DPIA?

- A. A company wants to combine location data with other data in order to offer more personalized service for the customer.
- B. A company wants to use location data to infer information on a person’s clothes purchasing habits.
- C. A company wants to build a dating app that creates candidate profiles based on location data and data from third-party sources.
- D. A company wants to use location data to track delivery trucks in order to make the routes more efficient.

Answer: C

NEW QUESTION 114

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company’s IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father’s company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company’s online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers’ philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer’s personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend’s daughter, Alice, who just graduated from law school in the U.S., to be the company’s new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company’s operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company’s IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone’s information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm.

Ben’s collection of additional data from customers created several potential issues for the company, which would most likely require what?

- A. New corporate governance and code of conduct.
- B. A data protection impact assessment.
- C. A comprehensive data inventory.
- D. Hiring a data protection officer.

Answer: A

NEW QUESTION 119**SCENARIO**

Please use the following to answer the next question:

Dynaroux Fashion ('Dynaroux') is a successful international online clothing retailer that employs approximately 650 people at its headquarters based in Dublin, Ireland. Ronan is their recently appointed data protection officer, who oversees the company's compliance with the General Data Protection Regulation (GDPR) and other privacy legislation.

The company offers both male and female clothing lines across all age demographics, including children. In doing so, the company processes large amounts of information about such customers, including preferences and sensitive financial information such as credit card and bank account numbers.

In an aggressive bid to build revenue growth, Jonas, the CEO, tells Ronan that the company is launching a new mobile app and loyalty scheme that puts significant emphasis on profiling the company's customers by analyzing their purchases. Ronan tells the CEO that: (a) the potential risks of such activities means that

Dynaroux needs to carry out a data protection impact assessment to assess this new venture and its privacy implications; and (b) where the results of this assessment indicate a high risk in the absence of appropriate

protection measures, Dynaroux may have to undertake a prior consultation with the Irish Data Protection Commissioner before implementing the app and loyalty scheme.

Jonas tells Ronan that he is not happy about the prospect of having to directly engage with a supervisory authority and having to disclose details of Dynaroux's business plan and associated processing activities.

Which of the following facts about Dynaroux would trigger a data protection impact assessment under the GDPR?

- A. The company will be undertaking processing activities involving sensitive data categories such as financial and children's data.
- B. The company employs approximately 650 people and will therefore be carrying out extensive processing activities.
- C. The company plans to undertake profiling of its customers through analysis of their purchasing patterns.
- D. The company intends to shift their business model to rely more heavily on online shopping.

Answer: C
