Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

NEW QUESTION 1

What common customer desire is addressed by HPE Aruba Networking Central network management?

- A. eliminating the need for network admins and letting server admins maintain the network
- B. deploying the network and then letting it run without the need for further management and monitoring
- C. managing each network silo with tools specialized for that silo's needs
- D. managing the network without having to install and maintain on-prem management tools

Answer: D

Explanation:

HPE Aruba Networking Central is a cloud-based network management solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure. It eliminates the need for customers to invest in, deploy, and maintain on-premises management tools, and provides a single pane of glass for managing campus, branch, remote, data center, and IoT networks from one dashboard.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Aruba Central for Cloud-managed networking | HPE Aruba Networking: "Built on a cloud- native, microservices architecture, Central is an AI-powered solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure."
- HPE Aruba Central | HPE United Kingdom - Hewlett Packard Enterprise: "Simplify how you provision, configure, and maintain networks by orchestrating all operations from a cloud-native dashboard. Aruba Central is your single point of visibility and control to oversee every aspect of wired and wireless LANs, WANs, and VPNs across campus, branch, remote, and data center locations."

NEW QUESTION 2

What is a use case for HPE Aruba Networking Central with AIOps?

- A. Simplifying the architecture of a data center attached to the campus.
- B. Finding network connectivity and performance issues before they impact business- critical apps.
- C. Upgrading the network more frequently by leasing, rather than purchasing, infrastructure devices.
- D. Enhancing the deployment of IoT devices by delivering an analytics platform at the edge.

Answer: B

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-native network management solution that leverages artificial intelligence to provide full-stack insights for enhanced root cause analysis, impact assessment, and recommendations. It helps IT teams simplify network operations and improve productivity by reducing manual tasks and proactively identifying and resolving network issues before they affect users and business applications. References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 15: "Aruba Central with AIOps provides AI-powered full-stack insights for enhanced root cause analysis (RCA), impact assessment, and recommendations. It helps IT teams simplify network operations and improve productivity by reducing manual tasks and proactively identifying and resolving network issues before they affect users and business applications."
- HPE Aruba Networking simplifies IT operations with AIOps-driven cloud management and new network-as-a-service capabilities available on HPE GreenLake: "To alleviate time spent on network troubleshooting and optimization, the HPE Aruba Networking Central cloud network management platform has been re-designed to simplify operations and improve productivity by leveraging artificial intelligence for IT operations (AIOps) to reduce manual tasks, so stretched networking teams can focus on more strategic and higher-value projects."
- HPE Aruba network platforms gain AIOps, Agile NaaS: "The next generation of HPE Aruba Networking Central will leverage artificial intelligence for IT operations (AIOps), providing AI-powered full-stack insights for enhanced root cause analysis (RCA), impact assessment and recommendations."

NEW QUESTION 3

Which customer challenge indicates a good opportunity for selling HPE Aruba Networking EdgeConnect solutions?

- A. The customer needs more WAN bandwidth but finds it cost-prohibitive to expand bandwidth on the company's current leased lines.
- B. The customer needs to simplify troubleshooting for the HPE Aruba Networking infrastructure devices already deployed at the main office.
- C. The customer needs to simplify by deploying a consistent switching platform across the campus and data center.
- D. The customer has no IT staff and needs a simple mobility solution for the company's single small site.

Answer: A

Explanation:

HPE Aruba Networking EdgeConnect solutions enable customers to leverage multiple WAN transport options, such as broadband internet, 4G/5G/LTE, and MPLS, to optimize bandwidth, performance, and cost. EdgeConnect solutions also provide dynamic path control, which automatically steers traffic to the best available path based on business intent policies and real-time network conditions. This way, customers can increase WAN bandwidth without increasing costs or complexity.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 16: "EdgeConnect SD-WAN platform enables customers to use any combination of WAN transport technologies without compromising network or application performance. It supports MPLS, 4G/5G/LTE, and internet-based hybrid WAN data paths and a control plane that is automated and secured by Aruba Orchestrator management software to provide policy-based virtual network segmentation and acceleration of on-premise and SaaS cloud applications."
- Aruba EdgeConnect SD-WAN | HPE Aruba Networking: "Aruba EdgeConnect SD-WAN | HPE Aruba Networking Home / Products / SD-WAN / EdgeConnect EdgeConnect SD- WAN The EdgeConnect SD

NEW QUESTION 4

What is one way you can differentiate HPE Aruba Networking AIOps from the competition?

- A. HPE Aruba Networking is the only vendor that has more than 5 years of proven domain expertise creating machine learning models.
- B. HPE Aruba Networking is the only vendor that applies AIOps to SD-Branch solutions.
- C. HPE Aruba Networking AIOps accesses an extensive telemetry data lake to provide IT staff with useful insights to act upon.

D. HPE Aruba Networking AIOps is based on open standards, rather than proprietary technology.

Answer: C

Explanation:

HPE Aruba Networking AIOps is a cloud-based solution that leverages artificial intelligence and machine learning to provide insights, automation, and security for wired, wireless, and SD-WAN networks¹. One way you can differentiate it from the competition is by highlighting its access to an extensive telemetry data lake, which collects and analyzes data from millions of devices and hundreds of thousands of networks around the world². This enables HPE Aruba Networking AIOps to provide IT staff with useful insights, such as network performance optimization, device classification, user experience monitoring, and proactive remediation³.

NEW QUESTION 5

Based on recent trends, which common challenge can HPE Aruba Networking help customers overcome?

- A. Struggles in optimizing overprovisioned networks for a lower-edge device load.
- B. Difficulties making employees understand that it is impossible to access applications securely from home.
- C. Difficulties providing secure, consistent connectivity for remote workers.
- D. Struggles in accommodating the shift of data away from the edge to the main corporate data center.

Answer: C

Explanation:

HPE Aruba Networking helps customers overcome the challenges of enabling hybrid work, where employees need to access applications securely from home or anywhere. HPE Aruba Networking offers solutions such as Remote Access Points, Virtual Intranet Access, and EdgeConnect SD-WAN that provide seamless, reliable, and secure connectivity for remote workers¹².

NEW QUESTION 6

Which customer need does HPE Aruba Networking EdgeConnect Mobile address?

- A. Enabling users to run demanding video conferencing applications over wireless connections at the corporate main office
- B. Enabling employees to connect to the corporate network from mobile devices and work from anywhere, including public locations
- C. Enabling secure connectivity between small branches and both the Internet and the corporate data center
- D. Enabling Zero Trust Security for wireless users accessing cloud applications from mid- sized branches

Answer: B

Explanation:

HPE Aruba Networking EdgeConnect Mobile is a secure SD-WAN solution that extends the benefits of HPE Aruba Networking EdgeConnect to mobile users and devices. It enables employees to connect to the corporate network from their smartphones, tablets, or laptops, and work from anywhere, including public locations such as airports, hotels, or coffee shops¹. It also provides consistent security, performance, and quality of experience for cloud and SaaS applications².

NEW QUESTION 7

You are discussing HPE Aruba Networking ESP (Edge Services Platform) solutions with a customer. This customer has mentioned supporting remote and hybrid workers as a key business initiative. What benefit of HPE Aruba Networking solutions should you emphasize?

- A. Remote employees can log into HPE Aruba Networking Central to access the centralized services and applications they need.
- B. These solutions offer a completely separate, dedicated mobility architecture for remote offices versus campuses.
- C. Remote employees can use HPE Aruba Networking Central to easily troubleshoot any issues on their own without IT support.
- D. These solutions make it simpler for customers to apply consistent, role-based policies no matter where users connect.

Answer: D

Explanation:

HPE Aruba Networking ESP (Edge Services Platform) solutions enable customers to deliver a consistent and secure network experience to remote and hybrid workers, regardless of their location or device. By using HPE Aruba Networking Central, customers can define and enforce granular, role-based policies that are automatically applied across the network, from the edge to the cloud. This simplifies network management and enhances security and compliance.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 12: "Aruba ESP enables IT to deliver a consistent and secure network experience to remote and hybrid workers, regardless of their location or device."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 14: "Aruba Policy Enforcement Firewall (PEF) is a key component of Aruba ESP that provides granular, role-based access control and security for wired and wireless networks. PEF enables IT to define and enforce policies based on user identity, device type, location, time, and application, across the network from the edge to the cloud."

NEW QUESTION 8

You want to determine if a business decision-maker might be interested in HPE Aruba Networking Central with AIOps. What is a good topic to discuss?

- A. The cost to the business when network issues interfere with user productivity
- B. The benefits of better aligning the data center IT operations team with the development team
- C. The security benefits of applying intelligent access policies that follow users and devices
- D. The difference between machine learning and other forms of artificial intelligence (AI)

Answer: A

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-native network management platform that leverages artificial intelligence to provide insights, automation, and security for wired, wireless, and SD-WAN networks¹. A good topic to discuss with a business decision-maker is how HPE Aruba Networking Central with AIOps can help reduce the cost of network downtime, improve user experience, and optimize network performance².

NEW QUESTION 9

Which approach does HPE Aruba Networking ESP (Edge Services Platform) take toward network management?

- A. Providing many separate management tools, each specialized for a different customer requirement.
- B. Avoiding integration with third-party solutions so that customers receive a simpler, edge- to-edge solution.
- C. Prioritizing on-prem management, as it is the only way for customers to manage their network assets securely.
- D. Providing a unified platform from which the customer can manage all wired and wireless devices across multiple sites.

Answer: D

Explanation:

HPE Aruba Networking ESP (Edge Services Platform) is a cloud-native architecture that unifies infrastructure, security, policies, and AI-powered management across all your edges¹. It enables customers to manage their network assets securely and efficiently from a single dashboard, whether they are on-premises, in the cloud, or at the edge². It also integrates with third-party solutions to provide a comprehensive and flexible network management solution³.
