

Exam Questions BCABA

Board Certified Assistant Behavior Analyst

<https://www.2passeasy.com/dumps/BCABA/>

NEW QUESTION 1

Which of the following would BEST contribute to a behavior analyst's professional development?

- A. attending a workshop that provides videotaped examples and practice activities for innovative interventions
- B. reading articles from a peer-reviewed applied behavior analysis journal that describe techniques that are applicable to her client population
- C. becoming a member of the Association for Behavior Analysis International, which is a rich resource for behavior analysts
- D. contributing an article to the newsletter of the local Association for Behavior Analysis chapter

Answer: B

NEW QUESTION 2

Before recruitment of participants for a research study begins, a behavior analyst needs to:

- A. obtain consent from participant(s) or legal guardian(s) if necessar
- B. obtain institutional review board approval or equivalent (e.g., an ethics committee).
- C. inform participants of their ability to withdraw from the stud
- D. inform participants about ethical requirements and experimental procedure

Answer: B

NEW QUESTION 3

Billy, a 20-year-old male, has the capacity to give consent for treatment. The behavior analyst has developed a program and explained it to Billy. Procedures, benefits, rights, and other information also were shown to him. The one element still needed for informed consent is approval from

- A. Bill
- B. clinical review committe
- C. human rights committe
- D. Billy's parent

Answer: A

NEW QUESTION 4

Fred does not follow some of the directives imposed by the direct care staff. A behavior analyst has been asked to put a program in place that will get Fred to comply with all directives. The behavior analyst should FIRST

- A. differentiate between compliance rates across different directive
- B. request that staff provide a ratio of compliant behaviors to noncompliant one
- C. determine a list of potential reinforcers for the behavior progra
- D. consider the ethical implications of training Fred to comply with all directive

Answer: D

NEW QUESTION 5

A behavior analyst specializing in developmental disabilities is informed by a cousin at a family gathering that their 2-year-old child has just received a diagnosis of autism and severe intellectual disability. The cousin asks the behavior analyst for advice. Which statement BEST conforms to the ethical and professional standards for behavior analysts?

- A. It would be unprofessional and unethical for the behavior analyst to advise a relativ
- B. The behavior analyst can consult with their cousin, but only on an informal basis once the cousin hires their own behavior analys
- C. Early intensive behavioral intervention may suit the child and famil
- D. The behavior analyst should suggest some people for the cousin to contac
- E. Tell the cousin that the child will benefit from behavioral intervention with the impact of the intervention depending on the specific treatment that is implemente

Answer: C

NEW QUESTION 6

A behavior analyst develops a program that decreases a baby's crying when her diaper is soiled. This is an example of

- A. development of a procedure to decrease maladaptive behavior
- B. differential reinforcement of alternative response
- C. extinctio
- D. misuse of a practitioner's ability to control behavior

Answer: D

NEW QUESTION 7

A colleague who is friends with one of a behavior analyst's clients asks the behavior analyst during a break at a local peer review meeting how the case is going. The behavior analyst should

- A. ask the colleague if the client has given permission to discuss the cas
- B. inform the colleague that he can't discuss this and change the subjec
- C. discuss the case in hypothetical terms without using the client's nam
- D. provide a minimum amount of information so that the colleague can assist hi

Answer:

B

NEW QUESTION 8

Which is NOT true of determinism?

- A. Science is based on determinis
- B. Determinism is in contrast to empiricis
- C. All science is predicated on determinis
- D. The universe is orderly and follows universal law

Answer: B

NEW QUESTION 9

What is the reinforcing consequence in "I itch, therefore I scratch?"

- A. automatic positive reinforcement
- B. automatic negative reinforcement
- C. proprioceptive positive reinforcement
- D. proprioceptive negative reinforcement

Answer: B

NEW QUESTION 10

When demands are placed on Raoul, he is often observed to hit his head, bite his hand, or slap the therapist. These behaviors are reinforced by termination of the demands. Taken together, these behaviors comprise

- A. an establishing operatio
- B. a functional response clas
- C. respondent behavior
- D. a topographical response clas

Answer: B

NEW QUESTION 10

A stimulus is defined as

- A. a change in behavior brought about by alterations of the physical environmen
- B. a change in the environment that can affect behavio
- C. a change in the environment that elicits a response with or without prior conditionin
- D. any environmental event exclusive of private event

Answer: B

NEW QUESTION 12

Which situation is likely to be an example of negative reinforcement?

- A. A child puts a coin into a machine and gets a gumbal
- B. An employee submits reports to a nagging boss and boss stops naggin
- C. An employee submits time sheet to payroll department and gets paid on Frida
- D. A student has a tantrum and the teacher gives a hug to calm them dow

Answer: B

NEW QUESTION 13

In the past, Parnelli consistently drove at high speeds on city streets. However, he was pulled over and had to immediately pay a very expensive fine. Afterward, Parnelli very seldom drove at high rates of speed. Which of the following might account for the effect of the lost money resulting from paying the fine?

- A. negative punishment
- B. negative reinforcement
- C. positive punishment
- D. escape conditioning

Answer: A

NEW QUESTION 17

Fiona cannot independently open her lunchbox. It is lunch time. The teacher closes the latch on Fiona's lunchbox and places it in front of Fiona. The teacher has manipulated the

- A. consequenc
- B. establishing operatio
- C. contingenc
- D. promp

Answer: B

NEW QUESTION 21

A person engages in target behaviors in environments different from the original training environment. This is a demonstration of

- A. stimulus generalizatio
- B. response generalizatio
- C. stimulus discriminatio
- D. response inductio

Answer: A

NEW QUESTION 25

What is the next step in the assessment process if data from the functional analysis do NOT support the original hypothesis?

- A. Base the intervention on the original hypothesis and re-assess after a time laps
- B. Design a package intervention to address all possible functions of the behavio
- C. Continue to conduct the functional assessment until the data coincides with the original hypothesi
- D. Alter the hypothesis regarding the maintaining variable of the behavior based on the results of the functional assessmen

Answer: D

NEW QUESTION 27

Holly is learning to use a spoon to feed herself. Applesauce is known to function as a reinforcer. Her teacher has selected the following objective for Holly: "Given a spoon and a 3-ounce dish of applesauce, Holly will independently scoop the applesauce to her mouth." This objective is incomplete. Which component is missing?

- A. antecedent stimulus
- B. consequence condition
- C. prerequisite skill criteria
- D. standard of performance

Answer: D

NEW QUESTION 32

Jim's teacher has taught him to say, "Hello, how are you?" and when he does this, she delivers praise. Now Jim says this whenever he meets anyone, and some people say, "Fine, how are you?" What is the natural consequence for Jim's behavior?

- A. increased number of friends
- B. continuous reinforcement
- C. improved social repertoire for Jim
- D. the responses of the people he meets

Answer: D

NEW QUESTION 37

When shopping with her dad, Sally knocks items off the shelf, especially canned goods. The cans make a loud noise when they hit the floor. Her dad decides to teach her an alternative behavior. What alternative behavior is the BEST choice to teach?

- A. Sally pushes the shopping cart with both hand
- B. Sally drops items into the cart when her dad gives them to he
- C. Sally keeps her hands in her pockets while in the stor
- D. Sally holds dad's hand while shopping and gets to let go when quie

Answer: B

NEW QUESTION 41

Jamie and Morgan have similar behavior challenges and similar daily schedules. A behavior analyst has spent extensive time and effort on developing and implementing Morgan's plan, which is proving to be very successful. How should the behavior analyst proceed with developing a treatment plan for Jamie?

- A. Because the behaviors are topographically similar, implementing the plan designed for Morgan would be appropriate as it is the least restrictive optio
- B. Complete a separate functional assessment and plan for Jami
- C. Use the same plan for both, just ensure the ecological variables correspond to the studen
- D. Do a separate functional analysis, but the same behavior supports can be applied to both student

Answer: B

NEW QUESTION 45

When using an alternating treatments design it is important to randomly:

- A. assign participants to treatment condition
- B. select participants from the population of interes
- C. order treatment conditions presented during each phas
- D. change each criterion leve

Answer: C

NEW QUESTION 48

Which of the following measures would be the MOST appropriate for reporting head banging during each 5-minute interval of work?

- A. duration of head banging
- B. latency from a request to the first response
- C. rate of head banging
- D. inter-response time

Answer: C

NEW QUESTION 49

A person "getting wet" in the rain is NOT considered an occurrence of behavior because "getting wet"

- A. does not specify an interaction between an organism and its environmen
- B. can occur under only one, very specific environmental conditio
- C. is a hypothetical construct and cannot therefore meet the criteria for an occurrence of behavio
- D. does not have social or clinical significance in a science of human behavio

Answer: A

NEW QUESTION 53

A major benefit of product recording is that:

- A. it is the easiest recording metho
- B. it is used when a behavior results in a certain tangible outcom
- C. the observer does not have to be present when the behavior occur
- D. one can always determine who engaged in the behavior that led to the product that was recorde

Answer: C

NEW QUESTION 56

What is the MOST important measure of behavior when the goal is to decrease the number of cigarettes smoked per day?

- A. duration per cigarette
- B. inter-response time
- C. percentage
- D. rate

Answer: D

NEW QUESTION 59

A behavior analyst is conducting research on the accuracy of a student's responding to written math problems based on the final answer with no scoring of intermediate calculations. Which is the BEST method for obtaining accurate inter-observer agreement results?

- A. Researcher and observer sit together to score the student's wor
- B. Photocopies of the student's work are scored independently by researcher and observe
- C. The student's scratch paper is scored if researcher and observer do not agree on a respons
- D. Researcher scores the student's work and the observer reviews the researcher's scores for accurac

Answer: B

NEW QUESTION 61

A teacher is tracking the performance of both math and spelling assignments for each of her 25 students. For feedback purposes, she wishes to display each student's percent correct for both areas using a line graph. What would be the MOST effective and efficient way to accomplish this?

- A. Prepare a large graph for spelling and a similar one for math and place on the graphs the average data for the entire class in the two content area
- B. Prepare a separate graph for each student and, using a unique symbol for each content area, record the data and connect the similar symbols to create data path line
- C. Prepare a single large graph and display each student's data for the spelling and math areas using unique symbols for each student and for each content are
- D. Prepare two graphs for each student, one for spelling and one for math, because there is no appropriate method for reporting these two content areas together on the same grap

Answer: B

NEW QUESTION 65

This graph BEST exemplifies:

- A. clear demonstration of an effective interventio
- B. a decrease in variability due to the interventio
- C. a change in the level between baseline and intervention phase
- D. a change in the trend between baseline and intervention phase

Answer: C

NEW QUESTION 68

An experimental design that starts with a baseline phase, followed by a treatment phase, then another baseline phase, and ends in the same type of treatment phase is called a (n):

- A. ABA desig
- B. reversal desig
- C. multi-element desig
- D. multiple baseline desig

Answer: B

NEW QUESTION 70

To definitively identify effective reinforcers for an individual, it is necessary to:

- A. complete a reinforcer assessmen
- B. complete a preference assessmen
- C. ascertain what reinforcers the individual has access t
- D. interview people who know the individual wel

Answer: A

NEW QUESTION 71

Jimmy is watching his favorite Saturday morning cartoon and playing with his train set. The cat walks past him and he pulls its tail. Jimmy's mother takes away one of his train cars. This is an example of.

- A. response interventio
- B. antecedent manipulatio
- C. response cos
- D. overcorrectio

Answer: C

NEW QUESTION 72

Unwanted side-effects associated with the use of an extinction procedure are MOST likely to appear:

- A. immediately after the extinction burs
- B. after the individual realizes that the procedure will be implemented consistentl
- C. when ratio schedules are increased too rapidl
- D. shortly after the procedure is first implemente

Answer: D

NEW QUESTION 75

In a token economy, what type of reinforcers are the tokens themselves?

- A. conditional reinforcers
- B. generalized conditioned reinforcers
- C. generalized unconditioned reinforcers
- D. unconditional reinforcers

Answer: B

NEW QUESTION 76

Mr. Winston has developed a reward system in his classroom where only those students who have submitted homework for 5 out of 5 days in the week receive a reward from the "treasure box." This is an example of a (n):

- A. co-dependent group contingenc
- B. dependent group contingenc
- C. independent group contingenc
- D. interdependent group contingenc

Answer: C

NEW QUESTION 78

Considering the potential impact of behavioral contrast, what is a likely outcome when there is an effective program targeting compliance at school when no formal program is implemented at home? Compliance at home would be predicted to:

- A. be more variabl
- B. decreas
- C. increas
- D. stay the sam

Answer: B

NEW QUESTION 82

The matching law states that when responding is reinforced on concurrent VI-20 and VI-50 schedules, the:

- A. number of responses will match the number of reinforcers obtained
- B. proportion of responses for each alternative will become equal over time
- C. organism will respond exclusively to the alternative with the highest rate of reinforcement
- D. proportion of responses across the two alternatives will equal the proportion of reinforcers obtained for those alternatives

Answer: D

NEW QUESTION 83

One of the basic requirements for staff training is that the:

- A. completion of training should be based on the demonstrated competency of the staff
- B. skills should be measured only upon the completion of training
- C. training should be accomplished by observation followed by a question-and-answer session
- D. underlying competency-based principles should be taught

Answer: A

NEW QUESTION 86

The decision to develop and implement a behavior intervention plan is not made unless:

- A. the behavior has the potential to cause harm
- B. data show the need for behavior change exists
- C. the interdisciplinary team has determined that it is necessary
- D. staff who will implement the procedures have demonstrated proficiency

Answer: B

NEW QUESTION 89

Teaching a receptive-identification task falls in the category of instruction.

- A. tact
- B. mand
- C. listener
- D. intraverbal

Answer: C

NEW QUESTION 91

The behavior analyst reviews Sandra's data and concludes that her behavior is spontaneous; that is, it occurs randomly, and not as a result of any other event(s). Which of the assumptions underlying behavior analysis has been violated in this interpretation?

- A. determinism
- B. empiricism
- C. philosophic doubt
- D. parsimony

Answer: A

NEW QUESTION 94

Behavior that can be directly observed only by the person behaving is called D.

- A. covert behavior
- B. overt behavior
- C. operant behavior
- D. respondent behavior

Answer: A

NEW QUESTION 96

A behavior analyst decides to replicate a published research project but finds that the information provided does not allow them to complete the project without more information from the author. The article violates which dimension of applied behavior analysis?

- A. effective
- B. ethical
- C. conceptually systematic
- D. technological

Answer: D

NEW QUESTION 99

Three boys with autism, ages 7–10 years old, served as participants in a study. During baseline, staff used response blocking when five instances of aggression or head-banging occurred within

10 seconds, until attempts ceased for 1 minute. During baseline and treatment, each occurrence of aggression and head-banging was recorded daily and converted to the number of responses per hour. Treatment comprised a differential reinforcement of incompatible behavior (DRI) schedule coupled with response blocking after every head-banging or aggression. The staff initially applied the treatment to head-banging, while continuing to take a baseline on aggression. After noting treatment effects on head-banging, the staff then applied the treatment to aggression. In this scenario, how was direct replication shown?

- A. Baseline and intervention conditions were include
- B. A baseline condition was implemente
- C. A changing criterion design was used wherein the criterion for reinforcement was gradually changed over tim
- D. The intervention was implemented in a staggered fashion across target behaviors after the initial baselin

Answer: D

NEW QUESTION 102

Which of the following could NOT function as an unconditioned punisher?

- A. a bitter taste
- B. social disapproval
- C. excessive stimulation
- D. physical restraint

Answer: B

NEW QUESTION 105

Intraverbal behavior is controlled by A.

- A. verbal stimulus; the behavior does not match that stimulus; and the reinforcer is non-specifi
- B. verbal stimulus; the behavior matches that stimulus; and the reinforcer is specifi
- C. verbal stimulus; the behavior matches that stimulus; and the reinforcer is non-specifi
- D. verbal stimulus; the behavior does not match that stimulus; and the reinforcer is specifi

Answer: A

NEW QUESTION 110

Which situation is the BEST example of contingency-shaped behavior?

- A. A task analysis is used to teach Lilly how to clean her roo
- B. Dean is able to change the scale on a computerized graph after reading “how to” instruction
- C. Billy’s mother tells him not to touch the stove because he could burn himsel
- D. Billy does not touch the stov
- E. Jennifer sees a candy bar and she mands for i
- F. Jennifer’s sister gives her the candy bar and she eats i

Answer: D

NEW QUESTION 111

One limitation of descriptive analysis is that it:

- A. does not allow the behavior analyst the opportunity to measure, record, and interpret the data on the target behavio
- B. does not permit the precise determination of functional relationship
- C. provides a less than adequate description of the topography and intensity of behavio
- D. violates the individual's right to privac

Answer: B

NEW QUESTION 116

A narrative recording is used to clearly determine all of the following EXCEPT:

- A. duration of a behavio
- B. function of a behavio
- C. presence of a particular behavio
- D. topography of undesirable behavio

Answer: B

NEW QUESTION 121

The use of an alternating treatments design should be considered iF.

- A. it is important that multiple interventions be evaluated quickl
- B. one needs to evaluate the effects of a single intervention across multiple setting
- C. the results of multiple reversal designs are ambiguou
- D. there is the possibility that the effect of one intervention will influence the effect of anothe

Answer: A

NEW QUESTION 125

John's instructional program has successfully increased the number of words he reads correctly per minute. The procedures used include special worksheets, contingent reinforcement for number of words read correctly, and peer tutoring. The behavior analyst wants to determine which part or parts of the treatment have been effective, so he systematically dismantles the treatment and withdraws elements until the reading no longer improves. The behavior analyst is completing A.

- A. component analysis
- B. multi-element design
- C. parametric examination
- D. reversal design

Answer: A

NEW QUESTION 129

One of the MOST important reasons for writing a precise definition of behavior is that a precise definition:

- A. produces greater interobserver agreement and requires less training time for observer
- B. allows for easier and more reliable quantification of temporal locus and temporal extent
- C. increases the likelihood that the behavior of interest will be reliably detected by observers or measurement equipment
- D. makes calibration checks of observers or measurement equipment less necessary

Answer: C

NEW QUESTION 131

During the hour immediately following meals, Bill asks for more food. Data are collected only during this hour after each meal. Which method of data collection would be MOST accurate?

- A. duration recording
- B. frequency recording
- C. narrative recording
- D. partial-interval recording

Answer: B

NEW QUESTION 133

A parent reports that her 2-year-old daughter uses a number of stalling techniques to avoid bedtime once she is told to go to bed. What would be a good progress measure for going to bed when told?

- A. frequency
- B. inter-response time
- C. latency
- D. compliance

Answer: C

NEW QUESTION 135

A child with food refusal behaviors accepts one bite out of the ten bites that her caregiver offered. What measure should be used to record this behavior?

- A. duration
- B. latency
- C. percent of occurrence
- D. trials to criterion

Answer: C

NEW QUESTION 139

Data were collected on the percentage of intervals at the end of which Thomas was present at his workstation. Which is the BEST method for displaying these data?

- A. cumulative record
- B. equal-interval line graph
- C. scatterplot
- D. standard behavior (semilogarithmic) chart

Answer: B

NEW QUESTION 142

In this graph, what is plotted on number 1?

- A. dependent variable
- B. independent variable
- C. session
- D. setting

Answer: A

NEW QUESTION 144

What could be done to clarify the differentiation in the frequency of aggression among the environments shown in this graph?

- A. Use an equal interval graph
- B. Record data for an entire week
- C. Include more environments along the horizontal axis
- D. Change the vertical axis so that the range is zero to twenty

Answer: D

NEW QUESTION 147

When given free access to playing with blocks, crayons, and trucks, Jeff plays with blocks about 50% of the time, plays with crayons about 30% of the time, and plays with trucks the remaining 20% of the time. According to the Premack principle, which of the following is true?

- A. Playing with trucks will serve as a reinforcer for playing with crayons
- B. Playing with trucks will serve as a reinforcer for playing with blocks
- C. Playing with crayons will serve as a reinforcer for playing with blocks
- D. Playing with crayons will serve as a reinforcer for playing with trucks

Answer: D

NEW QUESTION 150

When using time-out in a classroom, which concern is the MOST important to consider?

- A. Escape behavior could be punished
- B. Removal from the classroom may decrease learning opportunities
- C. The limited potential for abuse of the technique
- D. The social validity of time-out

Answer: B

NEW QUESTION 153

Which of the following is NOT a consideration when evaluating extinction as a possible intervention?

- A. correct determination of the reinforcer
- B. feasibility of eliminating reinforcement
- C. eliminating the opportunity for the occurrence of the target behavior
- D. plan for an initial increase in the target behavior

Answer: C

NEW QUESTION 156

Andrea has limited speech abilities. She has been attending speech therapy and is required to perform speech exercises at home. Other than her training sessions, Andrea chooses to remain essentially non-verbal. One evening, Andrea's sister called to invite Andrea on an outing. Andrea listened to her sister's invitation over the phone and nodded in excitement. Andrea's mother pointed out that her sister could not see her through the phone and that Andrea would need to speak so that her sister would know if she wanted to go. Andrea then said, "Yes, I want." This is a form of.

- A. contextual manipulation
- B. direct instruction
- C. incidental teaching
- D. whole task training

Answer: C

NEW QUESTION 161

If B is behavior, R is reinforcement, and 1 and 2 are the alternatives of a concurrent schedule, then would imply that the:

- A. number of responses will match the number of reinforcers obtained
- B. proportion of responses for each alternative will become equal over time
- C. organism will respond exclusively to the alternative with the highest rate of reinforcement
- D. proportion of responses across the two alternatives will equal the proportion of reinforcers obtained for those alternatives

Answer: D

NEW QUESTION 165

When given by a thirsty person in response to the question, "What do you want to drink?" the spoken word "water" is functioning as a (n):

- A. intraverbal
- B. man
- C. codi
- D. tac

Answer: B

NEW QUESTION 167

Mary Lee has been working on compliance. Given the same mand, in a 15-min. segment, Mary Lee complied with her teacher 4/5 times, her speech therapist, physical education teacher and mother 2/5 times. Six months later, given the same mand, in a 15-min. segment, Mary Lee complied with the bus driver 4/5 times, her physical therapist 4/5 times, the lunch lady 4/5 times and the vice-principal 4/5 times. This scenario is an example of.

- A. response generalization
- B. stimulus discrimination
- C. stimulus generalization
- D. stimulus equivalence

Answer: C

NEW QUESTION 168

For promoting maintenance, which approach is MOST appropriate?

- A. Continually reinforce the behavior in the natural environment
- B. Discontinue the schedule of reinforcement used in the training environment
- C. Implement a token economy including point gains and point losses for use in both the training setting and the natural environment
- D. Use a reinforcement schedule that most closely approximates the schedule in the natural environment

Answer: D

NEW QUESTION 169

The teachers have identified bullying as a problem behavior for a particular student. What should the behavior analyst do next?

- A. Raise awareness of the impact of bullying by holding a school-wide discussion
- B. Collect information about the frequency and duration of the behavior
- C. Develop an operational definition of the behavior
- D. Conduct a functional analysis of bullying

Answer: C

NEW QUESTION 174

When implementing punishment procedures, the behavior analyst:

- A. must include a reinforcement procedure
- B. can use punishment alone if a reinforcement procedure was not effective
- C. does not have to include a reinforcement procedure if consented to by the client
- D. is required to introduce a reinforcement procedure if the problem behavior increases

Answer: A

NEW QUESTION 177

Which action would MOST likely increase the effectiveness of a punisher?

- A. Clearly explain the punishment consequences to the person whose behavior is targeted for reduction
- B. Discontinue reinforcement contingencies for the behavior targeted for reduction
- C. Ensure that the punisher fits the behavior targeted for reduction
- D. Remove attention for the behavior targeted for reduction

Answer: B

NEW QUESTION 179

Amanda is evaluating the effects of video modeling on play skills. Her participants often show reactivity when they are observed. The BEST design to evaluate the video modeling is:

- A. withdrawal
- B. multiple probe
- C. changing criterion
- D. alternating treatment

Answer: B

NEW QUESTION 181

The MOST critical consideration when selecting a behavior change intervention is:

- A. availability of competent staff
- B. ease of implementation
- C. increasing a person's independence
- D. compliance with guardian request

Answer: C

NEW QUESTION 184

A behavior analyst is investigating fixed ratio schedules of praise delivery to determine which is most effective for changing the rate of question-asking by a

10-year-old child. This is an example of.

- A. an applied analysis of behavior
- B. an experimental social program
- C. a social learning program
- D. a stimulus control program

Answer: A

NEW QUESTION 189

A child touching a hot stove immediately withdraws his hand. In the future, the child avoids touching the stove. Avoiding the stove is an example of.

- A. establishing operation
- B. operant behavior
- C. punishment
- D. respondent behavior

Answer: B

NEW QUESTION 193

Specifying the hand with which Linda eats, writes, and works is an example of.

- A. response function
- B. an operant class
- C. a stimulus class
- D. response topograph

Answer: D

NEW QUESTION 194

When LeRoy sees his father arrive home, he begins to clean his room. Given this information, we can conclude ONLY that the father's arrival is:

- A. an antecedent
- B. a discriminative stimulus
- C. an establishing operation
- D. a visual prompt

Answer: A

NEW QUESTION 196

A behavior analyst has taught a student to look at the teacher when the teacher is speaking. Later, the student is observed looking at a classmate when the classmate is speaking. The student looking at the classmate is a result of.

- A. discrimination training
- B. response maintenance
- C. stimulus generalization
- D. response generalization

Answer: C

NEW QUESTION 200

A mand is:

- A. a demand for attention
- B. a verbal operant which specifies its reinforcer
- C. verbal behavior elicited by a particular reinforcer
- D. a verbal response which changes the value of a reinforcer

Answer: B

NEW QUESTION 201

A verbal response to a verbal stimulus where the correspondence between stimulus and response is arbitrary and derived from the verbal community is:

- A. an echo
- B. an intraverbal
- C. a tact
- D. imitation

Answer: B

NEW QUESTION 206

A behavior analyst is developing a generalization procedure for a newly mastered response. What strategy should be included in the procedure?

- A. positive practice
- B. reinforcement

- C. limited exemplars
- D. self-mediation

Answer: B

NEW QUESTION 208

What must happen for an alternating-treatments design to be optimally effective?

- A. An additional return to baseline is undertake
- B. Criterion changes are gradual to ensure complianc
- C. Participants discriminate easily between treatment condition
- D. Participants engage in multiple problem behavior

Answer: C

NEW QUESTION 212

What determines the amount of change at each step in a changing-criterion design?

- A. a 20% change at each step
- B. a standard five increment change
- C. the function of the behavior to be changed
- D. the particular behavior to be changed and its current incidence

Answer: D

NEW QUESTION 214

Which measurement would be MOST useful when evaluating a procedure designed to teach a person to respond at a uniform pace?

- A. duration
- B. inter-response time
- C. latency
- D. frequency

Answer: B

NEW QUESTION 218

Jason and Justin sit together and tease one another in class. Often the teasing evolves into Jason and Justin arguing with each other. The FIRST action should be to:

- A. change the seating so that Jason and Justin are not seated togethe
- B. operationally and functionally define teasing and arguin
- C. read Jason's and Justin's files to see if they have had these problems befor
- D. ask Jason and Justin why they are arguing and suggest alternative methods for them to resolve their issue

Answer: A

NEW QUESTION 223

The best method for identifying potential reinforcers is to use.

- A. peer identified reinforcer preference
- B. reinforcer inventories or checklist
- C. paired choice procedure
- D. in vivo observatio

Answer: C

NEW QUESTION 227

When using time out in a classroom, which of the following should be considered?

- A. Escape behavior could be punishe
- B. Positive reinforcement for the teacher is likely to contribute to increased duration of time ou
- C. The technique is easily abused and needs to be monitored and supervised carefull
- D. For children who are relatively non-disruptive and for innocuous behavior time out is optima

Answer: C

NEW QUESTION 232
